

# LICENSING ANNOUNCEMENT

## JULY 29, 2009

### Accessing FFMUN Data

**Primary Audience:** *FASTforward*<sup>®</sup> Licensees and Manufacturers

**What:** The *FASTforward* data product release 882 contains an incorrectly sized UMF file. This file contains a listing of all active and inactive FFMUN participant codes issued by the USPS<sup>®</sup> for the purpose of capturing FFMUN data. The USPS is currently scheduling an electronic download of an updated UMF file to all active *FASTforward* and LPE systems.

**Impact:** Due to the incorrectly sized UMF file, any mailings processed with an FFMUN participant code that was eliminated from the 882 data release, FFMUN COA data will not be captured or made available to Licensees or their customers.

**What you need to do:** Once the download is completed, Licensees will be contacted via email and phone with instructions to reset their systems.

Please share this information with all your customers.  
Licensees should continue to perform *FASTforward* processing in active mode with the FFMUN option activated.  
We apologize for this inconvenience.

If you have any questions regarding this announcement, please contact the Licensing Department at 1-800-589-5766.
