## History

*FASTforward* was developed by the United States Postal Service (USPS) to provide the mailing industry with another method to obtain Change of Address (COA) information. *FASTforward* was developed in two versions, one for the Multiline Optical Character Readers (MLOCR) and one for Mail List Corrections (MLC). *FASTforward* for MLOCR sprays the new address on the mailpiece just before it enters the mailstream. *FASTforward* for MLC provides mailers with updates for their electronic files.

## Introduction to Move Update Notification

*FASTforward*<sup>®</sup> Move Update Notification (FFMUN) gives the MLOCR version a method to provide COA information back to the customer in an electronic file. The electronic file can then be used to update the customers database. It is the responsibility of the customer to create the necessary applications to process the FFMUN electronic file.

## FFMUN Process

The list owner will submit the *FASTforward* Move Update Service Application located at the end of this document to the USPS. The USPS will issue a “Participant Code” which will be used to activate the FFMUN MLOCR process when the customer wishes to collect new address information. When FFMUN is activated, the USPS *FASTforward* system will accumulate the data to be transmitted to the USPS for processing and fulfillment.

The fulfillment file will only be available through the USPS Rapid Information Bulletin Board System (RIBBS) located at the Web site <http://ribbs.usps.gov>. The Web access application is located at the end of this document.

The USPS *FASTforward* program is administrated and supported through the USPS National Customer Support Center (NCSC) in Memphis, TN.

## *FASTforward* Processing

Once a Participant code is obtained, the list owner must notify and provide the *FASTforward* Licensee with the Participant Code and notification requesting the FFMUN option. The MLOCR must currently be licensed for *FASTforward* and the MLOCR software must support the FFMUN process. FFMUN generation will only occur after receiving a valid Participant Code during MLOCR/*FASTforward* active mode processing. During the FFMUN process the MLOCR will continue to spray the new address information on the mailpiece.

## FFMUN Implementation Suggestions

- Determine the impact, if any, this system may have with existing COA processing such as direct customer contact, Address Change Service, National Change of Address (NCOA) and endorsements.
- In processing any COA data, regardless of origin, it is a good idea for the base file to contain flags/fields that provide the necessary information on the origin of the COA and when the record was updated. In conjunction with other COA processes, circumstances may occur in which automated updating of certain base records could be selectively prohibited and/or diverted to a different process. The utilization of these flags/fields and other data elements will facilitate systemic decision making. Additional explanations regarding these circumstances can be provided by your interface developer and by contacting the USPS *FASTforward* department.
- Understand all of the components of the COA data, including the different styles of addresses, to insure the base file is being updated properly. The publications below are recommended as reference material:

“Postal Addressing Standards” (Publication 28)

“Address Information System Products Technical Guide”

- Mailpieces and electronic files may contain multiple named individuals, especially in the financial and insurance environment. The multiple named individuals within a base record may or may not contain the same last name. Regardless, it is the responsibility of the organization to identify the primary target name for submission to the *FASTforward* process or develop processes to handle these records. If the mailpiece contains multiple addressees, a COA match could be made to any one of the addressees. If this occurs, the COA information in the FFMUN fulfillment file may not be for the primary account holder and your mailpiece may not reach the intended target. Additional explanations regarding these circumstances can be provided by the *FASTforward* Licensee and by contacting the USPS *FASTforward* department.
- *FASTforward* contains two modes of operation, Standard and Strict. The modes of operation directly affect name matching logic. In the Standard mode of operation the name matching logic is determined by the move type (Family, Individual, Business) in the data record on the *FASTforward* COA database that is a candidate for a match. When the Strict mode of operation is utilized, all FAMILY candidate COA's will be treated as if they were an Individual move. The associated Name Logic is defined as follows:
  - Individual - Match on first name, middle name or initial, surname and title required.
  - Family - Match on surname (last name) only.
  - Business - Match on entire business name.

(NOTE: The FASTforward customer/mailler can request the Strict mode which will utilize only individual match logic even if the move type is Family.)

It is the responsibility of the organization or customer/client to understand these modes and select/determine the appropriate mode of operation for their files. Additional explanations regarding these circumstances can be provided by your FASTforward Licensee and by contacting the USPS FASTforward department.

- Potential COA Matching examples to consider:

Assuming the address matches

Standard matching logic:

Mail Addressees:	COA	Result
Charles Anyone Michelle Anybody	Randy Anybody (Family)	Match
Barbara Somebody Jim Someone	Randy Someone (Individual)	No Match
Charles Who Michelle You	Michelle You (Individual)	Match

Assuming the address matches

Strict matching logic:

Mail Addressees:	COA	Result
Charles Anyone Michelle Anybody	Randy Anybody (Family)	No Match
Barbara Somebody Jim Someone	Randy Someone (Individual)	No Match
Charles Who Michelle You	Michelle You (Individual)	Match

- It is recommended that validation edits be implemented on the returned name and address information against the base file name and address records.
- A gradual implementation plan should be utilized to ensure the system is performing as designed.

**Disclaimers:**

---

**Disclaimers:**

The creation of the electronic FFMUN file is dependent upon the *FASTforward* licensee entering proper participant codes. The USPS is not responsible for FFMUN files/transactions not being created/produced. The USPS is not responsible for any FFMUN files/transactions created utilizing the wrong Participant Code, thus potentially providing your information to other customers. The USPS is not responsible for the presentation of the optically lifted data (name and old address) which is utilized in obtaining a COA match. FFMUN is not a guaranteed service; the USPS makes no assurance that any minimum percentage of a mailer's address correction notifications will be provided electronically rather than manually. While the USPS *FASTforward* COA matching logic attempts to correctly identify specific movers, there is a potential for receiving inaccurate information, therefore the USPS does not warrant the accuracy of the data received.

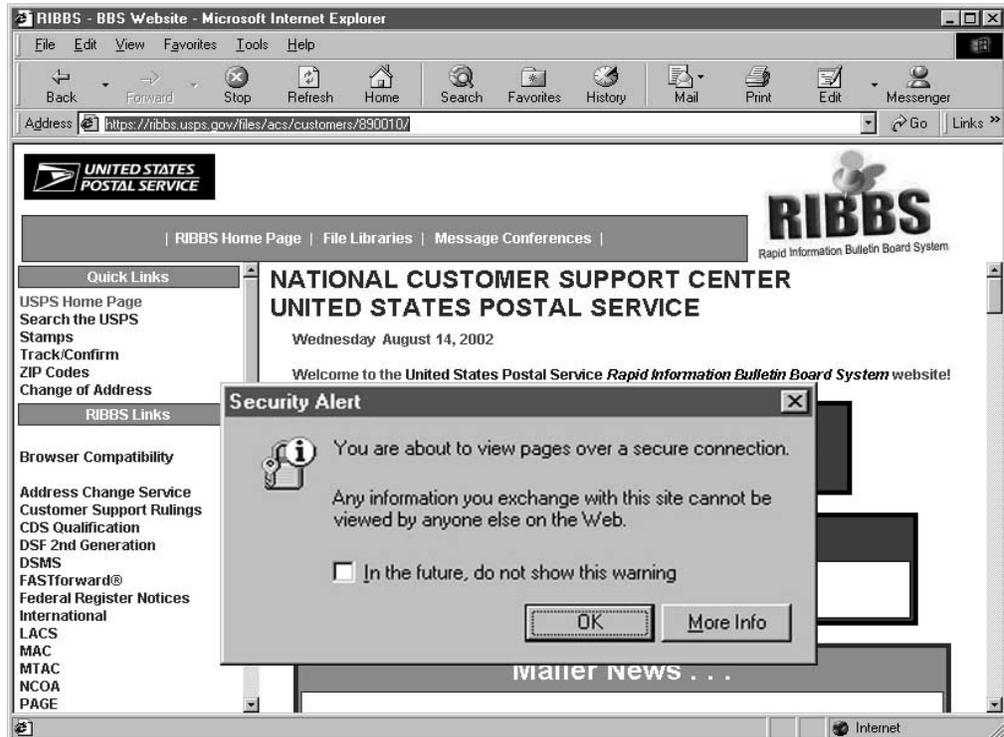

## FFMUN Retrieval

Retrieving files will require Internet access and a Web browser. We recommend Microsoft Internet Explorer (versions 5.0 or greater) or Netscape (versions 4.75 or greater). Once the FFMUN application and the WEB Access Request Form have been processed you will receive a Customer number/User name and password. This information will be used to download the files from a secure server.

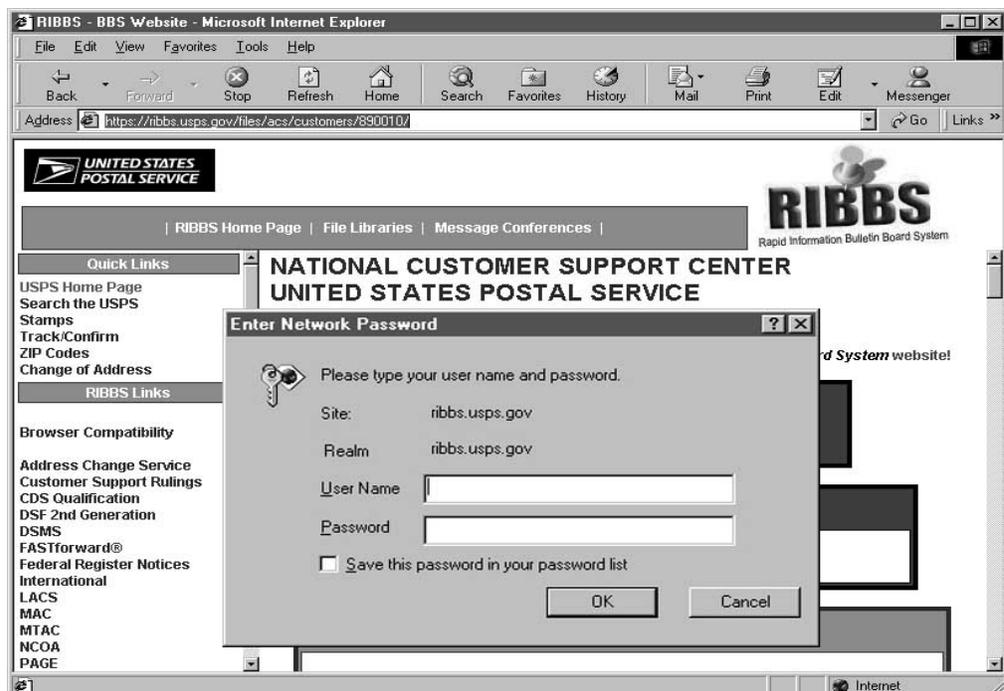

In this example assume the Customer number/User name is 890010. Open the browser, enter <https://ribbs.usps.gov/files/acs/customers/890010/> in the URL address field and click 'GO'. This will navigate the browser to the secure WEB site. Please make sure "https" is used to initiate the secure connection.

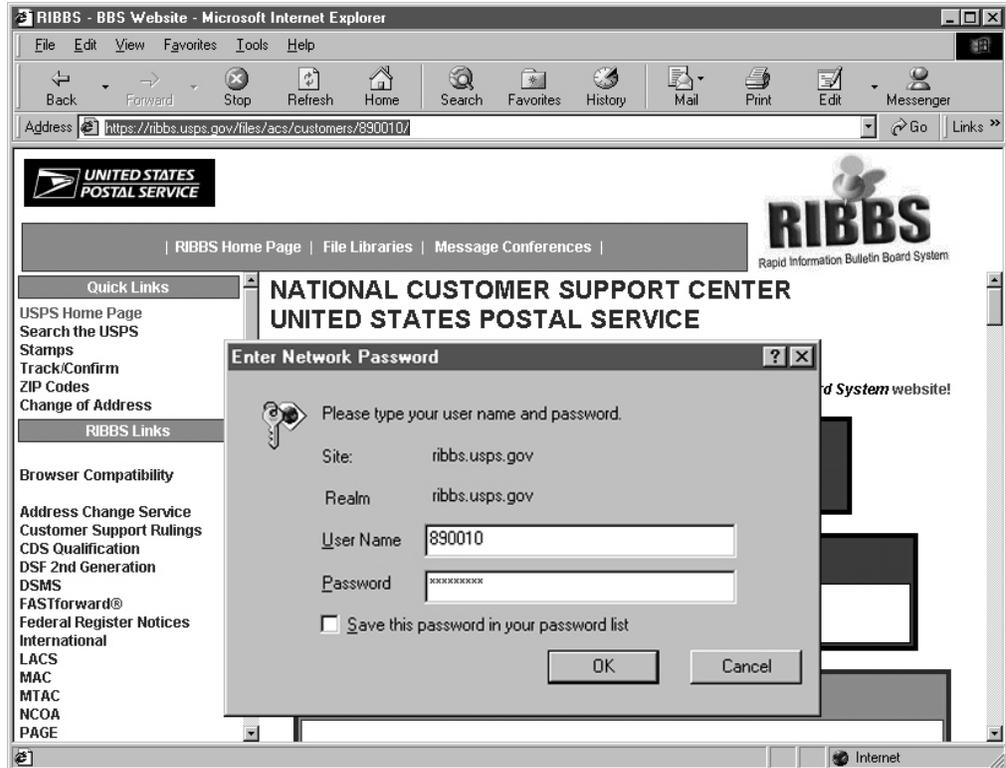

The screenshot shows a Microsoft Internet Explorer browser window displaying the RIBBS website. The address bar shows the URL <https://ribbs.usps.gov/files/acs/customers/890010/>. The website header includes the United States Postal Service logo and the RIBBS logo (Rapid Information Bulletin Board System). The main content area is titled "NATIONAL CUSTOMER SUPPORT CENTER UNITED STATES POSTAL SERVICE" and dated "Wednesday August 14, 2002". It features a welcome message and three prominent sections: "Safety & Security of the Mail USPS Fact Sheet", "Weather Alerts . . ." with a link to "Update On Current Weather Conditions", and "Mailer News . . ." with a link to "July 26, 2002 U.S. Postal Service Board of Governors to Meet in Washington, DC, August 5-6, 2002". A left sidebar contains various links such as "Quick Links" (USPS Home Page, Search the USPS, Stamps, Track/Confirm, ZIP Codes, Change of Address), "RIBBS Links", "Browser Compatibility", and "Address Change Service". The status bar at the bottom shows the current page URL as [http://www.usps.com/news/2001/press/pr01\\_1023fact.htm](http://www.usps.com/news/2001/press/pr01_1023fact.htm).

You may receive a security alert depending on how the browser is configured.

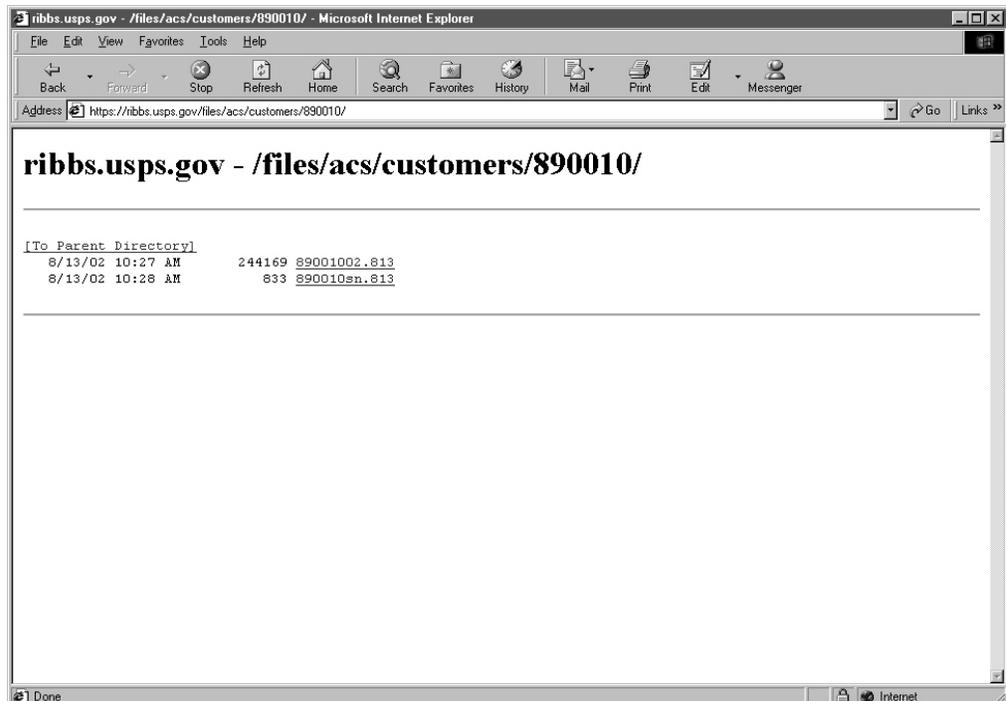

When you reach the Internet site, a network password screen will appear. Enter the User Name, which in this example is 890010. Enter the Password that was assigned with the Customer ID/User name. Select the "OK" button. The password is case sensitive so be sure to enter it the way it was supplied to you.

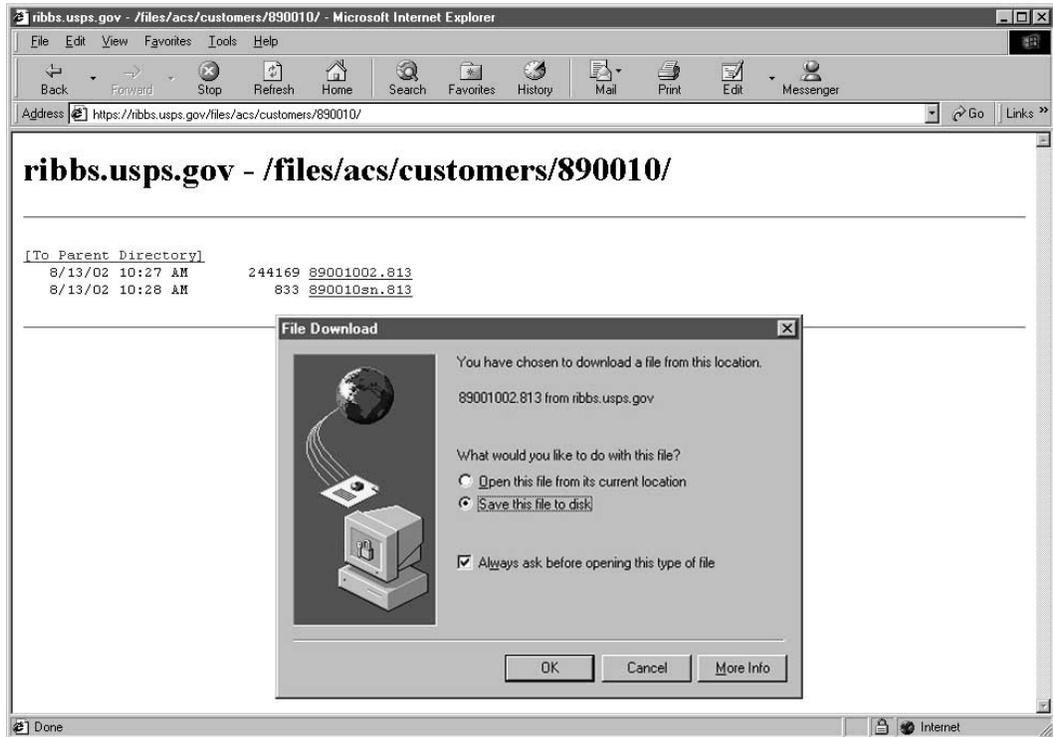

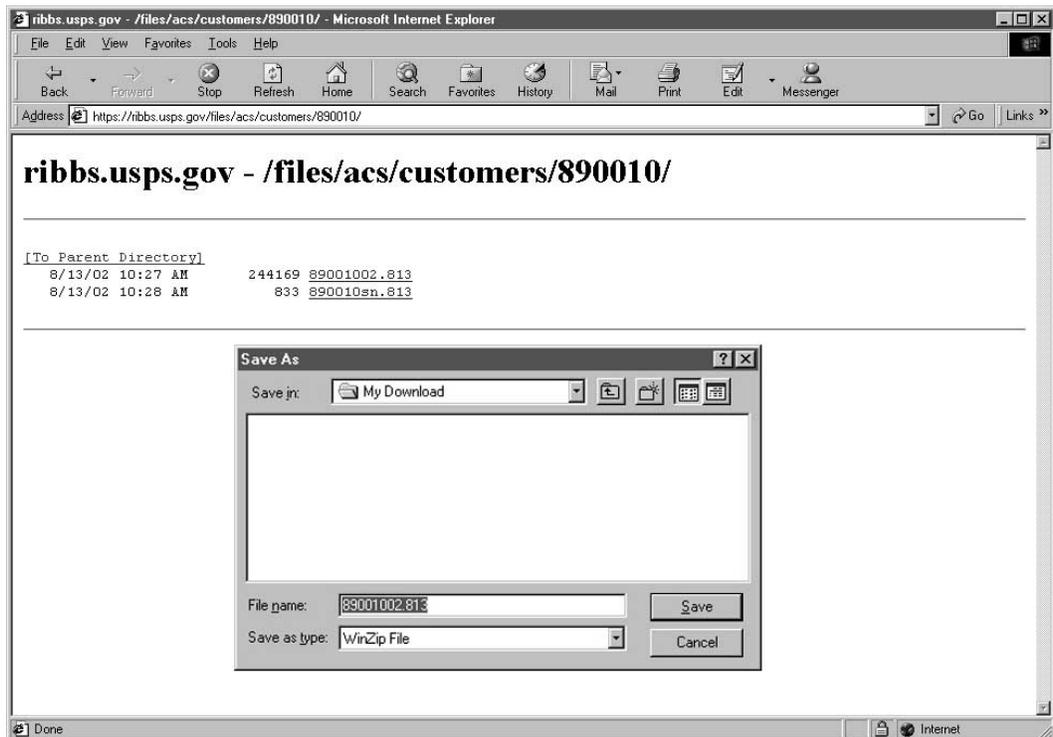

After entering the correct User Name and Password, the browser will now have access to the account which contains the FFMUN data. In this example, the file named 89001002.813 is a password protected PKZIP file that contains the FFMUN data. The file named 890010SN.813 is a password protected PKZIP file that contains the shipping notice reflecting the number of records contained in the data file.

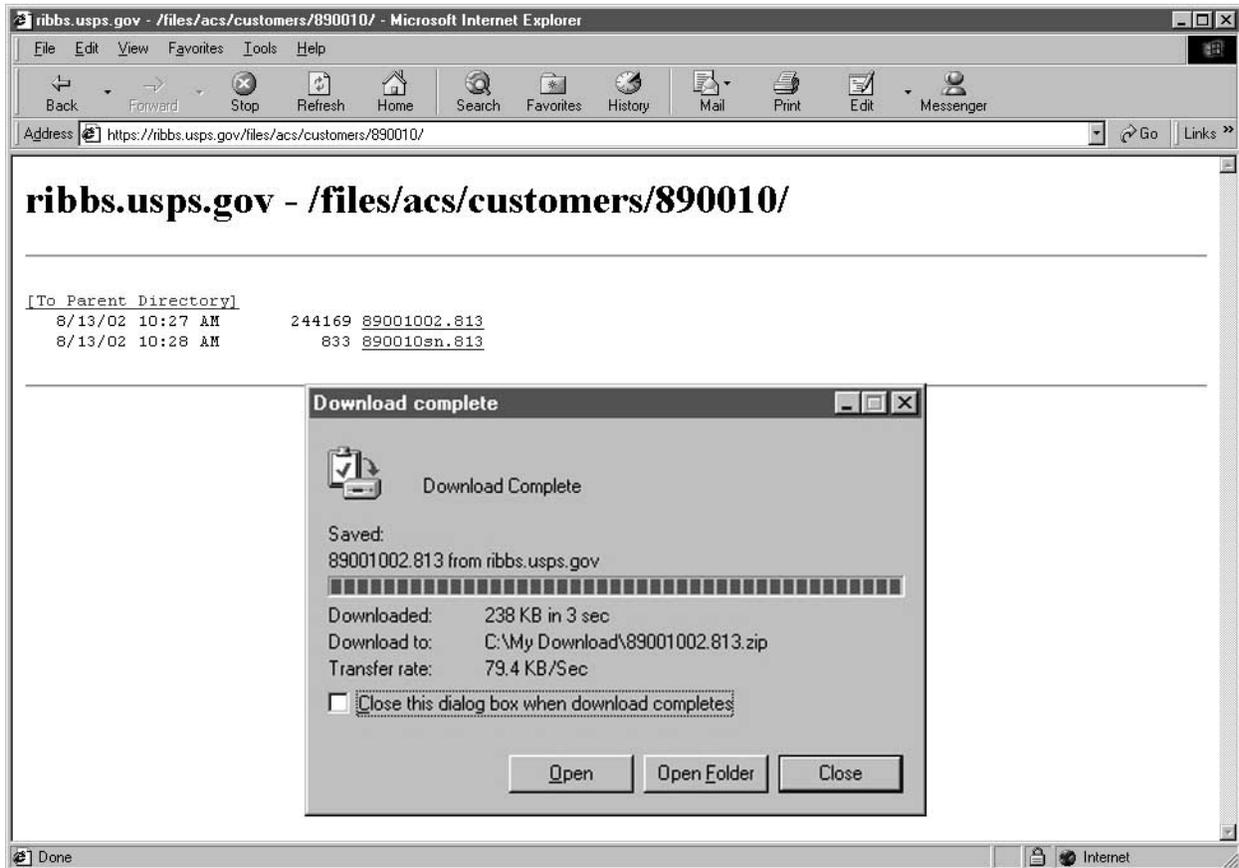

Using the mouse, click either filename and a download screen will appear. Select save to disk.

Then a screen will appear which will ask you to select where to store the file on your computer system. Enter where you want the file saved.

When the file is finished downloading, a download complete message will appear. Repeat the steps as many times as necessary to retrieve all the files. Please pay close attention to where the file is being downloaded and the name of the file. In the example below, the file name was appended with the '.zip' extension.

The files that were downloaded in this example were 89001002.813.zip and 890010SN.813.zip.

Before the files can be used, a utility program called PKUNZIP or WINZIP must be used to decrypt/uncompress the files. If you do not have these utility programs or do not know how to use them, then you will need to contact your internal computer support staff for assistance.

A password will be required by the utility program to decrypt/uncompress the files. The password will consist of the letter 'P' in upper case and the Customer ID/User name. In this example, it will be "P890010". During the decrypt/uncompress process, additional files will be created containing the decrypted/uncompressed data. The associated filenames below will be extracted from their respective files:

89001002.813.zip >>> D020813  
890010SN.813.zip >>> S020813

The file FFSNTC will contain a shipping notice similar to the following:

**Note:** *Each record contains a Carriage Return/Line Feed at the end of each record for a total record length of 549.*

**Note:** *When the move-type is identified as a business move, the following Fields will be considered a single concatenated Field that contains a character length of 47. This field will contain a Business Name up to the maximum length of 40 characters. The remaining seven characters should be treated as filler or spaces.*

---

*FASTforward* Move Update Notification (FFMUN)  
Fulfillment Record  
Data Element Definitions

AUX-MATCH-INFO	This field is for future use.
COA-SITE	This provides an ID for the mailing house that provided this COA.
DASH	The literal interpretation of a dash (-) .
DNF-CODE	Do Not Forward(DNF) code. This field contains the following values: K = MOVED LEFT NO ADDRESS - Carrier filed action G = PO BOX CLOSED - Carrier filed action C = Undeliverable - Carrier filed action F = Foreign - New Address not present O = Moved - COA present Note: Codes K,G,C,F do not contain a new address.
FF-CUSTOMER-ID	The field contains the customer information utilized by the MLOCR to process the mail.
FF-BOX-NUMBER	Notes the USPS <i>FASTforward</i> System used to capture this information. Used when site has multiple USPS <i>FASTforward</i> systems.
FF-LICENSE	Contains the <i>FASTforward</i> License ID, which identifies the Licensee who processed the mail.
FF-PLATFORM-ID	Identifies the specific MLOCR that processed the mail.
FF-SERIAL-NUMBER	Contains the serial number of the MLOCR that processed the mail.
FILLER	Contains spaces.
FIRST-NAME	Contains first name information of the person who moved. A first name may not exist if the move type is Family.
HDR-COA-COUNT	Contains a count of FFMUN transactions.
HDR-DATE	Contains the date the file was produced- CCYYMMDD format.
HDR-END-MARKER	Contains the literal asterisk.
HDR-INDICATOR	Contains the literal (H) for header
HDR-MEDIUM-TYPE	Reflects the type of media that is utilized to produce the fulfillment file.
HDR-PART-CLASS	Contains a numeric value of 8 (eight).
HDR-PUBLISHER-ID	Contains the account number of the company who should receive this file.
HDR-SHIP-NO	Shipment number for billing purposes.
HDR-TOT-COUNT	Total count of all records including the header record.

---

FASTforward Move Update Notification (FFMUN)  
Fulfillment Record  
Data Element Definitions

LAST-NAME	Contains the last name of the person who moved.
MAILPIECE-ID	The MLOCR identifier for the transaction in a job or run. Currently this field will be spaces.
MOVE-EFFECTIVE-DATE	Contains the month and year the move became effective - CCYYMM format.
MOVE-TYPE	Contains one of the following: F = Family move - Everyone with the same last name moved I = Individual move - Only that individual moved B = Business move - The move is a business <i>Note: Family moves may not contain a first name.</i> <i>Note: Please see note after Fulfillment Record Layout.</i>
NEW-ADDRESS-TYPE	This code defines the type of address that is present in the address field. A = Military PSC B = Military PSC with Box C = Military Unit D = Military Unit with Box E = Military other/Ship Y = Military CMR Z = Military CMR with Box S = STREET G = GENERAL DELIVERY. P = PO BOX X = RURAL ROUTE with BOX V = HIGHWAY CONTRACT with BOX F = FOREIGN R = RURAL ROUTE H = HIGHWAY CONTRACT U = URBANIZATION NOTE: All address types are represented here for compatibility for future expansion and possible incorporation. The current new address types that should not be found are: G,R,H,U
NEW-CITY-NAME	Reflects the city name.
NEW-DPBC	Contains the Delivery Point Barcode information and check digit.
NEW-PLUS-4-CODE	Reflects the ZIP+4 Code
NEW-POST-DIRECT	Contains the post directional information N/S/E/W/NW/NE/SW/SE.
NEW-PRE-DIRECT	Contains the pre directional information N/S/E/W/NW/NE/SW/SE.
NEW-PRIMARY-NAME	Contains the primary street name.
NEW-PRIMARY-NUMBER	Contains the primary number.

---

*FASTforward* Move Update Notification (FFMUN)  
Fulfillment Record  
Data Element Definitions

NEW-SECONDARY-NUMBER	Contains the secondary number. This number is used in conjunction with the Unit-Designator to provide the appropriate output such as APT 1.
NEW-STATE	Contains the two character state abbreviation.
NEW-SUFFIX	Contains address suffix information.
NEW-UNIT-DESIGNATOR	Contains the descriptor for the secondary number.
NEW-URBANIZATION	Urbanization information for addresses normally located in Puerto Rico.
NEW-ZIP	The five digit ZIP Code.
NEW-ZIP-PLUS-4	Contains the ZIP+4 Code for the address.
OLD-ADDRESS-TYPE	This code defines the type of address that is present in the address field. A = Military PSC B = Military PSC with Box C = Military Unit D = Military Unit with Box E = Military other/Ship Y = Military CMR Z = Military CMR with Box S = STREET P = PO BOX X = RURAL ROUTE with BOX V = HIGHWAY CONTRACT with BOX G = GENERAL DELIVERY. R = RURAL ROUTE H = HIGHWAY CONTRACT U = URBANIZATION NOTE: The address types presented here are for compatibility for future expansion and possible incorporation. The current old address types that should not be found are: G,R,H,U.
OLD-CITY-NAME	Reflects the city name.
OLD-POST-DIRECT	Contains the post directional information N/S/E/W/NW/NE/SW/SE.
OLD-PRE-DIRECT	Contains the pre directional information N/S/E/W/NW/NE/SW/SE.
OLD-PRIMARY-NAME	Contains the primary street name.
OLD-PRIMARY-NUMBER	Contains the primary number.
OLD-SECONDARY-NUMBER	Contains the secondary number. This number is used in conjunction with the Unit-Designator to provide the appropriate output, such as APT 1.
OLD-STATE	Contains the two character state abbreviation.

---

Fulfillment Record  
Data Element Definitions

OLD-SUFFIX	Contains address suffix information.
OLD-UNIT-DESIGNATOR	Contains the descriptor for the secondary number.
OLD-URBANIZATION	Urbanization information for addresses normally located in Puerto Rico.
OLD-ZIP	Contains the 5 digit ZIP Code.
OLD-ZIP-PLUS-4	Contains the ZIP+4 Code.
PARTICIPANT-CHECK	Contains the check digit for the participant code.
PARTICIPANT-CODE	<i>FASTforward</i> Move Update participant code. Code used to identify the owner of the mail.
PREFIX-TITLE	Additional name information.
RECORD-TYPE	Contains the literal 'F'.
SEQUENCE-NUMBER	Contains the sequence number which identifies a specific record in the fulfillment file.
SUBMITTED-NAME-1	Contains the optically lifted name information from the mailpiece. Note: Optically lifted names may not correctly read or interpret all characters.
SUBMITTED-NAME-2	Contains the optically lifted name information from the mailpiece. Note: Optically lifted names may not correctly read or interpret all characters.
SUFFIX-TITLE	Additional name information.
TRANSACTION-DATE	Contains the date the transaction was created.
TRANSACTION-TIME	Contains the time the transaction was created.

Purpose: Use this form to create a WEB based account with the National Customer Support Center (NCSC). This account will be used to send and receive (upload/download) files for the business affiliation indicated below to/from the NCSC. Please complete the form and return it by mail or fax using the information at the bottom of this form. We will send you an e-mail you to notify you of approved access.

Select a business affiliation (complete a separate form for each business affiliation request):

- Address Change Service (ACS)

Privacy Act Statement: Your information will be used to process your request for access to data and/or files on USPS computer systems. Collection is authorized by 39 USC 401, 403, & 404.

Providing the information is voluntary, but if not provided, we may not process your request. We do not disclose your information without your consent to third parties, except to facilitate the request, to act on your behalf or request, or as legally required. This includes the following limited circumstances: to a congressional office on your behalf; to financial entities regarding financial transaction issues; to a USPS auditor; to entities, including law enforcement, as authorized by law or in legal proceedings; and to contractors and other entities aiding us to fulfill the service (service providers). For more information on our privacy policies see our privacy link on usps.com.

<b>Fulfillment File Option File Format:</b> Bulletin Board	<b>Delivery Schedule:</b> Within 48 hours of run
--	--

### Registration Pricing Information

\$100 yearly registration fee for each code for service until January 2003. Changes may occur based on participation and handling costs. Fees are prorated by calendar quarter after January 2003.

### Authorization

I hereby authorize the United States Postal Service (USPS) to provide change-of-address information for the customer ID(s) listed, under the prescribed terms and conditions of the *FASTforward* program. I understand that FFMUN is an electronic enhancement to and not a replacement of the traditional manual address correction process. FFMUN is designed to reduce the volume of manual address corrections provided on properly forwarded mail. I understand that a Processing Acknowledgement Form (PAF) must be in place before any transaction may occur.
