Manifest Certified Software Products List

Introduction

The MAC/MAC Gold Certified Products List contains products that have passed the rigorous testing procedures of the MAC and MAC Gold programs. The list is broken out by type of certification and then organized alphabetically by company name. Each product's listing includes sales contact information and indicates the certified manifest categories and options supported. Hardware, software platforms, and price range are indicated when appropriate. Although this program evaluates and validates manifesting products manufactured by developers, neither MAC nor MAC Gold guarantees acceptance of mail prepared using certified hardware/software platforms. The MAC and MAC Gold program does however, provide national approval of computer-generated facsimiles of USPS postage statements, standardized documentation, and other manifest documentation.

This product information is for quick reference purposes only, please contact the developer for specifics concerning their product.

What is MAC?

The United States Postal Service, in cooperation with the mailing industry, has developed a certification process to evaluate manifesting software known as Manifest Analysis and Certification (MAC) certification. The process is available only to software manufacturers who actually develop manifest software either for retail or for internal use. MAC tests the ability of the manifest software to produce accurate postage and fees as well as quality documentation. It also provides a common platform to measure the quality of manifest products and determines their accuracy in accordance with requirements set forth in the Domestic Mail Manual (DMM) and Publication 401: Guide to Manifest Mailing. The purpose of MAC is to improve the accuracy of manifested mailings, thereby improving the flow of your mail.

What is MAC Gold ?

The MAC (Manifest Analysis and Certification) Gold Certification program evaluates manifest systems (scales and printers) along with the manifest software to determine the systems' compliance with the manifesting standards set forth in the current Domestic Mail Manual (DMM) and Publication 401: Guide to Manifest Mailing. The scope of MAC Gold is focused on the manifest system's ability to correctly process First-Class Mail, Priority Mail, Parcel Post (all single-piece rate), and Insurance with the integrated barcode and Confirmation Services. MAC Gold tests the ability of the manifest system to produce accurate postage and fees as well as quality documentation. This certification program is only available to manifest system developers.

There are many benefits to the MAC Gold program:

- Customers experience quick, easy start-ups
- Developers can expand their customer base mailing with the USPS
- Systems are uniform and accurate
- Customers are not required to maintain quality control documentation
- USPS administrative costs are reduced

Once the appropriate forms are submitted (i.e., Form 1357 and application) to the National Customer Support Center (NCSC), mailers using a MAC Gold system are pre-certified to use Confirmation services. Furthermore, no additional Manifest Mailing System (MMS) approval is necessary to begin mailings as long as the system is installed and operated according to the developer's instructions. MAC Gold approval procedures, mailer quality control requirements, and postal acceptance procedures are different from the typical MMS procedures and are outlined in the Publication 401, Chapter 11-2.

Company Name: DYDACOMP INC
Address: 11-D COMMERCE WAY
City: TOTOWA
State: NJ
ZIP: 07512-1154
