

## **Stop Processing Alternative**

The USPS® will consider an Alternative False Positive Reporting and Stop Processing Function that may assist in more efficient processing for mailing activities that demonstrate a low risk of abuse. In these cases, users will be required to demonstrate to the satisfaction of the USPS that their business and the ability to prepare and enter mail into the mailstream would suffer a severe negative impact via the Stop Processing Function within CASS Certified™ software.

If you are interested in applying for the Stop Processing Alternative, please email your request to [ncoalink@usps.gov](mailto:ncoalink@usps.gov).
