

PostalOne!®
Version 20.0.1.2 –Pre-Release Notes

An emergency patch to *PostalOne!* Release 20.0.1. will be deployed Tuesday, June 30, 2009 to correct a critical issue with the system.

This Pre-Release Note describes what is planned for deployment in Release 20.0.1.2.

1.	MAILERS	2
	<u>Periodicals</u>	2

1. Mailers

Release 20.0.1.2 of *PostalOne!* will contain an enhancement to the system for continued support for Full-Service implementation. A critical issue identified after deployment of Release 20.0.1.1 will be resolved in this release. The following item describes that which is of interest to external users of *PostalOne!*

Periodicals

The change to Mail.dat processing of Periodicals files is described as follows:

The postal clerk shall be able to change the component weight in the edition weight worksheet for a mail piece unit that has a single component and the affected postage statements shall be calculated with the changed weight. The mailer shall be able to display the changed weight in the edition weight worksheet for a mail piece unit that has a single component and the changed postage statements. The workaround to submit the corrected weights in the Mail.dat file for the mail piece units with single components will no longer be necessary.

NOTE: If you have any questions or need any assistance regarding the *PostalOne!*® system please contact our *PostalOne!*® Help Desk at **1 – 800 – 522 – 9085**.
