

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

1. Purpose

- 1.1 The purpose of these performance requirements is to establish standard criteria of performance with which USPS[®] requires NCOA^{Link}® Full Service Providers (“Licensees”) to comply. The NCOA^{Link} Product will enable Licensees to provide the following address list services:
 - New address when a name and old address match the change of address file
 - Detection of undeliverable addresses due to change of address
- 1.2 Licensee’s matching software must adhere to specific USPS requirements regarding the services as well as to the matching rules and specifications herein. Licensees must utilize CASS Certified™ software for ZIP + 4[®] processing. In addition, Licensee’s NCOA^{Link} system will be tested on a periodic basis.

2. Product Description and Fulfillment

- 2.1 The NCOA^{Link} Product utilizes what is referred to as “hash” tables. The hash tables are secure datasets that will only provide new address information when queried, through use of a software interface, with a specific algorithm of the name and old address from a mailer’s address list which matches the algorithm of the information as it appears on a Change of Address form (PS 3575).
- 2.2 The input algorithm uses a complete name, a 9-digit ZIP + 4 Code and a parsed address to obtain a match to a COA. The NCOA^{Link} Product cannot assign a ZIP+4™ nor will it respond to a non-ZIP + 4 coded address.
- 2.3 Licensee is responsible for obtaining all necessary software. A software interface, which must be written or purchased, will customize the type of input format, provide the desired output, and contain appropriate links with ZIP + 4 matching software.
 - 2.3.1 Licensee’s matching software must be able to load updates for all required Products.
- 2.4 Weekly updates containing the full 48-month NCOA^{Link} Product datasets will be provided via DVD to Licensees. Licensees shall install the current weekly NCOA^{Link} database upon receipt no later than the following Monday. Licensees must utilize the current CASS™ ZIP + 4 product with the NCOA^{Link} updates to provide the up-to-date address. Refer to Exhibit A for acceptable use dates of the ZIP + 4 product.

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

- 2.5 Weekly updates more than 45 days old shall be destroyed using common practice for disposal of sensitive materials. Examples of acceptable methods of destruction include shredding, punching, incinerating, or breaking the DVDs.
- 2.6 Multiple service processing is required of Full Service Provider Licensees:
- 2.6.1 Additional processes, such as ZIP + 4, DPV[®], LACS^{Link}® and Suite^{Link}™, can be run either independently or interactively with NCOA^{Link} processing. The software required for processing multiple services may be bundled as a single integrated software package or provided separately for each individual service.
- 2.6.2 Prior to NCOA^{Link} processing, input addresses presented to NCOA^{Link} must be processed through CASS Certified matching software to obtain ZIP + 4 coded, parsed addresses. The ZIP + 4 coded, parsed result and the corresponding name will be used to query NCOA^{Link}. If a LACS^{Link} match is made to the original address during CASS processing, Licensees must query the NCOA^{Link} Product using the LACS^{Link} converted address. ZIP + 4 results must be obtained within the valid window for processing based on the date NCOA^{Link} processing is performed and the chart of valid ZIP + 4 dates provided in Exhibit A.
- 2.6.3 Licensees must perform DPV processing. The requirements for DPV processing are set forth in Appendix A of these Licensee Performance Requirements. The DPV Product release must be synchronized with the ZIP + 4 data release.
- 2.6.4 Licensees are required to perform LACS^{Link} processing. The requirements are set forth in Appendix B of these Licensee Performance Requirements. The LACS^{Link} Product release must be synchronized with the ZIP + 4 data release.
- 2.6.5 Licensees are required to perform Suite^{Link} processing on business address lists. The requirements are set forth in Appendix C of these Licensee Performance Requirements. The Suite^{Link} Product release must be synchronized with the ZIP + 4 data release.

3. General Requirements

- 3.1 Any Licensee wishing to provide NCOA^{Link} processing must first obtain (either by purchase or developer license) a licensed and certified Interface Product. The

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

Interface must be reviewed, tested, and approved for use at Licensee's site(s) by USPS prior to any actual NCOA^{Link} processing occurring in a production environment to ensure that all license requirements are met. After review and testing, USPS will provide Licensee with written approval (in the form of a License Agreement) of their use of the certified NCOA^{Link} system.

- 3.2 Licensee, in order to utilize the NCOA^{Link} Product, must meet all requirements and specifications contained within the License Agreement and the most current version of the Licensee Performance Requirements, unless explicitly allowed, prohibited, or modified by USPS in writing. Copies of these documents, the Certification Procedures and any new updates to the documents will be posted on the RIBBS website at <http://ribbs.usps.gov/files/NCOALink>.
- 3.3 Licensee must incorporate use of the Daily Delete process into all NCOA^{Link} processing. The Daily Delete file will be available from the USPS website <http://ribbs.usps.gov/files/NCOALink>. Instructions for use of this process must be obtained from the Licensee's software interface supplier.

4. Specific Requirements

- 4.1 Licensees must use USPS certified NCOA^{Link} software to access the NCOA^{Link} Product.
- 4.2 Licensee must use USPS CASS Certified Address Matching software parsed, standardized output to query the NCOA^{Link} Product.
- 4.3 Licensee must adhere to the provisions of Standards of Performance as detailed in Section 8.
- 4.4 Licensees must provide all specific reports as required in Section 9.
- 4.5 Licensees will assign each Mailing List a unique ID as defined in Section 9.2.
- 4.6 Licensees must be capable of:
 - a) Responding to all address inquiries from subscribers and the Licensor.
 - b) Updating the system with full file replacement weekly via DVD.
 - c) Updating ZIP + 4 and City State Products monthly.
 - d) Providing customers with Delivery Point Code Information for all input addresses that are ZIP + 4 coded via ZIP + 4 process and all new addresses returned as a result of a match to NCOA^{Link}.
 - e) Offering processing options to clients on basis of file content and process frequency.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- f) Providing results of additional address hygiene processes as required in Section 2.4.
 - g) Licensee shall provide USPS with access to any resource used in performance of this license and with the necessary equipment and/or reports to monitor performance at Licensee's facility.
 - h) Licensee shall provide the USPS with any changes to contact information.
- 4.7 Licensee shall establish a central email address for receipt and disbursement of USPS electronic correspondence within Licensee's organization.

5. Basic NCOA^{Link} Product Output

- 5.1 Standardized return codes have been established to provide consistency of products and facilitate USPS evaluation of customer data.
- 5.2 For each address submitted by a customer, Licensee's NCOA^{Link} software must be able to return the following output:
- a) Each original unaltered input name and address as it was presented.
 - b) The standardized input address appended with the correct ZIP + 4/DPC, other postal values and any other intelligence flags or footnotes that result from the CASS processing segment.
 - c) For each mailing address for which there is a match to the NCOA^{Link} Product, a standardized new address with 11-digit Delivery Point Barcode (DPBC) and standard return codes as listed in Exhibit B.
 - d) When a match is made, the following elements must be returned: the move effective date, the specific name and address utilized in the query that obtained the match, and the move type. The move type is determined by the Interface based on the specific name inquiry utilized to obtain the match.
 - e) For each mailing address for which there is not a match to the NCOA^{Link} Product, the Interface shall return all elements as appropriate under items a and b as well as any standard return codes as may be appropriate as listed in Exhibit B.
 - f) The urbanization name information, when applicable.
 - g) The carrier route information for new (updated) addresses.
 - h) DPV results for the input address, if requested.
 - i) LACS^{Link} results, if requested.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- j) Suite^{Link} results, if requested.
- k) Processing summary report containing information to identify the specific list and the statistics resulting from the NCOA^{Link} process performed on the list.

6. Quality Standards and Testing Criteria

- 6.1 The NCOA^{Link} Product will be subject to periodic audit and evaluation of the organization's NCOA^{Link} process and its adherence to the conditions of the NCOA^{Link} License Agreement. Please note that the USPS audit file must be processed through the same NCOA^{Link} system, including any and all pre- and/or post-processes, Licensees utilize for customer processing.
- 6.2. The NCOA^{Link} software will provide the necessary output as described in Section 5 utilizing the specific USPS format as described in Exhibit C. Upon notification of the transmission of an audit file, it can be retrieved from Licensee's specific USPS account via the internet. Licensee's output file and supporting documentation derived from the NCOA^{Link} process will be posted to the same account.
- 6.3. The audit file will test Licensee's NCOA^{Link} software with a series of known forwardable addresses and known non-forwardable addresses to validate Licensee's ability to query the NCOA^{Link} Product and return the appropriate output and responses.
- 6.4. The audit will also verify the administrative output of the NCOA^{Link} process.
- 6.5. Auditing will be performed once annually or as specified by USPS. If necessary, subsequent audits due to failures must be completed within the annual license period to prevent suspension and/or termination.
- 6.6. Upon validation of the results, Licensee will receive official audit results from USPS.
- 6.7. The system shall provide accurately matched responses for at least 99% of the inquiries where data to support these responses are known to be in the USPS file and shall produce no unexpected matches.
 - a) The percentage of audit file input name and address records that achieve the correct result shall not be less than 99% when compared to USPS expected results.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- b) The audit file output shall not result in a match that is not expected and would result in returning incorrect information that would eventually cause the misdirection of mail.
 - c) The audit file output must correctly provide all NCOA^{Link} elements with 100% accuracy.
- 6.8. In the event that a problem is identified by USPS that is related to the NCOA^{Link} process, USPS will, at its sole discretion, direct correction of the problem and/or exercise the suspension or termination provisions of the License, as it deems appropriate by the situation.
- 6.8.1. When directed to correct deficiencies, Licensee will be given 30 days from the date of the notification in which to remedy the deficiencies and retest.
 - 6.8.2. If Licensee fails to remedy the deficiencies within 30 days, a suspension notice will be issued. The suspension notice will direct Licensee to cease all NCOA^{Link} activities during the term of suspension and remedy all deficiencies within 60 days to regain good standing. USPS will also discontinue data fulfillment during the term of suspension.
 - 6.8.3. At the end of the term of suspension, the License Agreement between Licensee and USPS will be terminated if Licensee has not successfully remedied all deficiencies.

7. *Maintaining Full Service Qualification*

- 7.1. More than fifty per cent (50%) of all addresses processed through NCOA^{Link} by Licensee must be for unrelated Entities (“external processing”). At least once annually, a review of all processing will be performed by USPS to determine that Licensee meets this requirement.
- 7.2. If external processing levels fall below this level, USPS will issue a warning to Licensee for this level to be raised within 90 days.
- 7.3. If subsequent review reveals that Licensee has been unsuccessful in attaining this level, Licensee will be given the option at the end of the Term of the Agreement to 1) change their service level from Full Service Provider to Limited Service Provider or 2) terminate their NCOA^{Link} License Agreement.
- 7.4. If Licensee elects to terminate the License Agreement, USPS may refund the unused pro-rated portion of the license fee by request from Licensee within thirty (30) days of the effective date of the termination.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- 7.5. Any Licensee whose license is terminated, voluntarily or involuntarily, will be ineligible to obtain another NCOA^{Link} License Agreement for a period of five (5) years.

8. Standards of Performance

- 8.1. Licensee must, prior to processing any Mailing List through NCOA^{Link}, have on file for each customer submitting a Mailing List, a fully executed Processing Acknowledgment Form (PAF). In addition, the customer must be provided with a copy of the PAF along with the Required Text Document (see the sample PAF in Exhibit D and the Required Text Document in Exhibit F). Original hardcopies of these executed forms shall be maintained by Licensee and made available for Postal Service[®] review for a period of 6 years from date of execution. Licensee will reproduce and provide this form and the Required Text Document to its customers at its own expense annually.
- 8.1.1. For storage and retrieval purposes, hardcopy PAF documents may be scanned and stored electronically allowing Licensee to store or archive the original completed documents either on-site or off-site in a secure location. Images of scanned documents may be used to satisfy audit requirements. Licensee must be able to retrieve the original documents upon request from USPS.
- 8.2. Licensee must process and return all customer address list files within seven (7) business days of receipt unless a longer period is specified by the customer in writing. (Business days are defined as Monday through Friday.) The fulfillment cycle starts the day the customer file is received by Licensee.
- 8.3. Licensee must maintain a service log, which will include the PAF ID as prescribed in Section 9.2. These service logs will be maintained and be made available for Postal Service review for a period of 5 years. The customers' written requests for longer turnaround times shall be reported on the log, maintained with the hardcopy PAFs, and retained for six (6) years. This service log shall also be kept on a computer file and shall be submitted to USPS electronically on a monthly basis (see Exhibit H for format).
- 8.4. Licensee shall determine the necessary staffing level and shall be capable of adjusting the number of supervisory and operational personnel to accommodate variations in the volume of customer requirements. The Postal Service cannot

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

forecast the volume or the schedule of names and addresses received from mailers, nor will the Postal Service attempt to direct mailer inquiries to any particular Licensee.

- 8.5. Licensee shall repair or have repaired all equipment, hardware and/or software deficiencies related to the NCOA^{Link} system within 30 days of identification of said deficiencies.
- 8.6. Since multiple NCOA^{Link} License awards are anticipated, the marketplace will establish a competitive price for the service. However, the intent of the U.S. Postal Service is that this service will be widely available at reasonable cost to customers.
- 8.7. Licensees are permitted to "bundle" services such as CRIS and merge/purge along with NCOA^{Link}. Charges for such add-on services must be separated from NCOA^{Link}, but may be consolidated on one bill provided to Licensee's customer.
- 8.8. Licensee is responsible for providing all necessary customer support for its Services. Licensee's customers requiring technical information must contact a customer service group managed by Licensee. Licensee's customer service group shall be responsible for providing resolution to all inquiries concerning the processing output.
- 8.9. It shall be Licensee's responsibility to ensure that its customers understand the NCOA^{Link} process and output. Each customer wishing to subscribe to NCOA^{Link} must be provided with a product/service brochure by Licensee. This brochure must explain the NCOA^{Link} process in detail. The Postal Service will provide Licensee with the required text that, in addition to Licensee's own marketing material, must be included in, or with, its product/service brochure. Inclusion of the Required Text information in the product/service brochure provided to the customers shall be at Licensee's own expense. This required text may be revised by the Postal Service from time to time without prior notice to Licensees. Required text revisions shall be provided to Licensee customers within 30 days of receipt from the Postal Service. The Required Text document is included in the Licensee Performance Requirements as Exhibit F and will be posted on the USPS designated web site at <http://ribbs.usps.gov/files/NCOALink>.
- 8.10. Pursuant to the advertising guidelines of the License Agreement, each approved advertisement must contain the document tracking number assigned by USPS during the review and approval processes. For specific information with regards to

**NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

the review and approval process, please reference the Advertising Technical Guide on the RIBBS website at <http://ribbs.usps.gov/files/ncoalink>.

- 8.11. Licensee is responsible for redistributing license related electronic correspondence from USPS to the appropriate personnel within Licensee's organization. Pursuant to Paragraph 4.7, all electronic correspondence will be directed to a central email address within Licensee's organization. The email address must be ncscinfo@<yourcompany>.com. In the event that this address is already assigned for some other purpose, an alternate address must be submitted to USPS for approval. Licensee will subsequently distribute all applicable USPS notifications internally to ensure receipt by the proper staff. Such correspondence will also be sent to the pertinent contacts provided during the application process but in the event of "bounce backs" successful delivery via the central email address will be considered confirmation of receipt.

9. Reports

- 9.1. Prior to any NCOA^{Link} processing, and once annually thereafter, Licensee shall obtain a complete and signed copy of the PROCESSING ACKNOWLEDGEMENT FORM (PAF) from each of its customers and for any internal mailing lists processed. The form is intended to be prepared by Licensee who is actually performing the NCOA^{Link} service to ensure that it will contain that company's name and officer's signature. This form is also intended to be signed by the **list owner** whose address list is being processed. A faxed PAF from each location will be acceptable. The USPS does not at this time endorse any particular electronic alternate methods for verification of client identity. Any electronic system that meets these requirements is sufficient. The Licensee will decide what methods best suit their business needs and address their business risk, while still maintaining the appropriate PAF information. Licensee may implement multiple methods for verification based on the Licensee's business needs. All information from the forms is to be maintained in an electronic format for the purposes of customer validation and reporting. The data and completed forms are to be maintained by Licensee and made available for Postal Service review for a period of six (6) years from the date of execution. Exhibit D contains an example of the PAF and the associated data file layout is part of Exhibit H.

**NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- 9.1.1. Every PAF distributed must be accompanied by a product information package which includes, at a minimum, the Required Text Document as described in Section 8.9 above.
- 9.1.2. In the event the USPS, at its sole discretion, determines a Licensee is not diligently verifying the identity and role all parties involved in the transaction (including, but not limited to, brokers and list owners) when using equivalent electronic methods, the USPS reserves the right to require the Licensee to revert to the traditional paper method of PAF completion. Any method used by a Licensee for verification under this new ruling applies ONLY to PAF collection under the NCOA^{Link} Full Service License Agreement. There is no implied or implicit application of this ruling to ANY relationship, practice or agreement between the USPS and the Licensee. The USPS offers a wide range of services to its customers, and separately sets the appropriate requirements for each of these services, including electronic processes.
- 9.1.3. For specific information regarding completion of PAFs, please reference the PAF Guide on the RIBBS website at <http://ribbs.usps.gov/files/ncoalink>.
- 9.2. Licensee will assign each NCOA^{Link} customer file, list, or database a unique NCOA^{Link} PAF ID. This ID will be used by the software to verify that the customer has a valid, active PAF on file with Licensee. This ID will also be used to provide a relationship between Licensee's service log and PAF information files. The format of the ID will be an eighteen character alphanumeric field consisting of four sub-parts. Positions 1-4 are alpha and will identify Licensee to USPS and will be assigned to Licensee by USPS. Positions 5-10 are numeric and will identify the business in which the list owner engages by the North American Industry Classification System (NAICS). The list owner may obtain the appropriate NAICS from the internet at www.census.gov/epcd/www/naics.html. Positions 11-12 are numeric and will identify the frequency of NCOA^{Link} processing on an annual basis (value range 01-52). If multiple selects from a master list are processed at different frequencies under the same ID, positions 11-12 must contain "99." Positions 13-18 may be alpha, numeric, or alphanumeric and will identify the Mailing List to Licensee and to USPS; this portion of the ID is assigned by Licensee. This ID will be used to streamline USPS disclosure accounting procedures. Licensee will ensure that each of their customers has a unique and never duplicated PAF ID. The software must not allow duplicate IDs. The ID shall be assigned by Licensee

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

upon execution of the Processing Acknowledgement Form and be used throughout the system as prescribed. The unique and complete 18-character PAF ID will be recorded on the PAF. The form will not be complete and acceptable if this ID is omitted or erroneous.

- 9.2.1. A single PAF may be completed to cover processing for all lists submitted by the list owner provided that the official signing the document has the authority to do so for each separate list. If multiple lists are covered by a single PAF, Licensee must record "MULTIPLE" in the space provided for the PAF ID on the pre-printed PAF. When "MULTIPLE" appears as the PAF ID, an itemization of the list names and corresponding PAF IDs assigned to each must be recorded on the back of the PAF.
- 9.3. NCOA^{Link} service requests submitted on behalf of mail list owners by third parties must be fully disclosed and duly recorded on the appropriate PAF. Each of these third parties must be assigned a unique ID similar to the format of the PAF ID. The third party ID will be a sixteen character alphanumeric field consisting of three sub-parts excluding the 2-digit processing frequency recorded in the PAF ID.
 - 9.3.1. Under no circumstances shall a third party Broker, Agent, or List Administrator be considered the Mailing List owner nor have the authority to sign on behalf of the Mailing List owner.
- 9.4. The Combined PAF and Required Text documents (see the sample PAF in Exhibit E and the Combined Required Text documents in Exhibit G) for Full and Limited Service Providers are available for Limited Service Providers who broker NCOA^{Link} processing services to Full Service Providers. This PAF is designed for list owners who submit their files for processing primarily to Limited Service Providers, who in turn submit list owners' files to Full Service Providers occasionally for 48-month processing. This PAF may also be used by Limited Service Providers to submit ANK^{Link} files to Full Service Providers for further processing. For more information on the Combined PAF, please refer to the PAF Guide on the RIBBS website at http://www.ribbs.usps.gov/files/NCOALINK/PAF_GUIDE.PDF.
 - 9.4.1. The Combined PAF is intended solely for use by NCOA^{Link} Service Providers and shall not be utilized by third-party brokers.
 - 9.4.2. To utilize the Combined PAF, Limited Service Providers must have a direct relationship with the List Owner.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- 9.4.3. All list owners' files must be processed by the same Full Service Provider that is listed on the Combined PAF.
- 9.4.4. Foreign-based companies are strictly prohibited from using the Combined PAF; there are no exceptions.
- 9.5. Licensees performing NCOA^{Link} processing for cooperative databases must have a PAF on file for each participant in the cooperative database. The company that hosts the cooperative database must appear as the List Administrator. If the cooperative database host company is also a database participant, the PAF for the host company shall not list the host company as the List Administrator. Licensees are not allowed to process cooperative databases under a single PAF or as an internal file even if the host company is also a participant in the cooperative database.
 - 9.5.1. It is strictly prohibited for Licensees to select new movers from a cooperative database.
- 9.6. Licensee shall produce monthly performance reports by site and/or system platform. The reports begin on the first day of the month and terminate on the last day of the month. The reports will be maintained and made available for Postal Service review for a period of five (5) years at Licensee's facility. The reports shall be submitted within seven (7) calendar days of the end of the month via electronic submission to the National Customer Support Center, Memphis TN. The electronic report file layouts are provided as Exhibit H. Performance reports include:
 - 9.6.1. Customer Service Log – record of all Mailing Lists processed through the NCOA^{Link} service and the resultant statistics. Requirement: one record per Mailing List processed.
 - 9.6.2. PAF Customer Information Log – record of all customer information contained on the PAF and significant ID and date information of Licensee and applicable third parties. Minimum Requirement: one record per PAF ID appearing in the corresponding Customer Service Log.
 - 9.6.3. Broker/Agent / List Administrator Log – record of all third party List Brokers/Agents and/or List Administrators handling the address lists of their clients that are processed through the NCOA^{Link} service. Minimum Requirement: one record per third party ID appearing in the PAF Customer Information Log.

**NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

9.7. The monthly performance reports will be named using a four-part eight-character identification scheme. The first character will identify the report: "C" for Customer Service Log, "P" for PAF Customer Information Log or "B" for Broker/Agent / List Administrator Log. Characters 2-5 will contain Licensee's USPS-assigned four-character platform identification code. The sixth character will identify the month of the report as indicated in the chart below. The last two characters will identify the year of the report by the last two digits of the calendar year.

Month	Code
January	1
February	2
March	3
April	4
May	5
June	6
July	7
August	8
September	9
October	A
November	B
December	C

**NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

9.8. NCOA^{Link} is intended solely for use as a Mailing List update tool. Testing of any kind using NCOA^{Link} is generally discouraged by USPS. However, USPS does acknowledge that certain testing is necessary. In an effort to obtain an accurate statistical reporting regarding addresses updated by NCOA^{Link}, the type of processing must be accurately and consistently recorded. Therefore, the following list of codes must be used to populate the "PROCESSING CATEGORY" field in the service log:

Code	Description	Disposition of Results
EMP TRAIN	File processed as part of employee training.	Results discarded; no update performed or information released.
INT DB TST	Testing involving proprietary Licensee database.	No updates performed; results discarded after analysis.
MKTG TEST	Testing involving external customer lists.	Return information consists of statistics only; COA data is discarded, not returned to customer.
NORMAL	Process mailing list for update prior to mailing.	COA information provided to mailer and/or mailer's representative.
STAGE I	Test of matching performance against USPS self-test file.	Results used for internal program analysis and subsequently discarded.
STAGE II	Test of matching performance scored by USPS.	Output transmitted to USPS for evaluation and discarded when test results finalized.
SYS TEST	File processed as part of system testing such as loading of USPS file updates.	Results discarded; no updates performed or information released.

9.9. Licensee must provide a hardcopy report to each customer summarizing the processing of each mailing list processed. The report shall be named NCOA^{Link®} Processing Summary Report. The report may contain any and all information gathered to fulfill the requirements of Section 10.4. At a minimum, the processing summary must contain:

- Licensee Company Name
- PAF ID
- Mailer Company Name
- File/List/Database Name
- Processing Category
- Pre-Processes Performed flag
- Concurrent Processes Performed flag

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

- Post-Processes Performed flag
- Standard Output Returned flag
- Matching Logic Applied flag
- Data Returned flag
- Class of Mail
- Date NCOA^{Link} Processing Completed
- Date File Returned to Customer
- Total Number of Records Processed
- Total Number of Records Matched
- Total Number of Records ZIP + 4[®] Coded
- Total Number of Records DPV[®] Confirmed
- Total Number of Records LACS^{Link}® Matched
- Total Number of Records Suite^{Link}™ Matched
- Listing of all processes used in obtaining final results

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

**Exhibit A
ZIP + 4[®] Product Use Dates**

Per the DMM[®], the ZIP + 4 and City/State data must be updated within 45 days of the release date. Licensees are required to update these files on a monthly basis. The following chart is provided to assist in determining which data release is current.

Release	Required Use Date	Last Use Date
January 15	March 1	March 31
February 15	April 1	April 30
March 15	May 1	May 31
April 15	June 1	June 30
May 15	July 1	July 31
June 15	August 1	August 31
July 15	September 1	September 30
August 15	October 1	October 31
September 15	November 1	November 30
October 15	December 1	December 31
November 15	January 1	January 31
December 15	February 1	February 28 (Feb 29 in leap year)

**NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

**Exhibit B
NCOA^{Link®} Return Code Descriptions**

Code = Return Code

Address = "Y" = New Address provided

"N" = New Address not provided

Description = Explanation of Return code

How = "D" = Derived by data – returned in lieu of 11 digit

"S" = Derived by software

Code	Description	Address	How
A	COA Match - The input record matched to a COA record. A new address could be furnished.	Y	D
00	No Match - The input record COULD NOT BE matched to a COA record. A new address could not be furnished.	N	D
01	Found COA: Foreign Move – The input record matched to a COA record but the new address was outside USPS® delivery area.	N	D
02	Found COA: Moved, Left No Address (MLNA) – The input record matched to a COA record, but the new address was not provided to USPS.	N	D
03	Found COA: Box Closed, No Order (BCNO) – The Input record matched to a COA record containing an old address of PO BOX, which has been closed without a forwarding address provided.	N	D
04	Cannot match COA: Street Address with Secondary – In the STANDARD mode utilizing Family matching logic the input record was a potential match to a family type COA record with an old address that contained secondary information. The input record does not contain secondary information. The record is a ZIP + 4® street level match. This address match situation requires individual name matching logic to obtain a match and individual names do not match.	N	D
05	Found COA: New 11-digit DPBC is Ambiguous – The input record matched to a COA record. The new address on the COA record could not be converted to a deliverable address because the DPBC represents more than one delivery point.	N	D
06	Cannot Match COA: Conflicting Directions: Middle Name Related –There is more than one COA record for the match algorithm and the middle names or initials on the COAs are different. Therefore, a single match result could not be determined.	N	D
07	Cannot Match COA: Conflicting Directions: Gender Related –There is more than one COA record for the match algorithm and the genders of the names on the COAs are different. Therefore, a single match result could not be determined.	N	D
08	Cannot Match COA: Other Conflicting Instructions – The input record was a potential match to two COA records. The two records were compared and due to differences in the new addresses, a match could not be made.	N	D
09	Cannot Match COA: High-rise Default – The input record was a potential match to a family COA record from a High-rise address ZIP + 4 coded to the building default. This address match situation requires individual name matching logic to obtain a match and individual names do not match.	N	D
10	Cannot Match COA: Rural Default – The input record was a potential match to a family COA record from a Rural Route or Highway Contract Route address ZIP + 4 coded to the route default. This address situation requires individual name matching logic to obtain a match and individual names do not match.	N	D
11	Cannot Match COA: Individual Match: Insufficient COA Name for Match – There is a COA record with the same surname and address but there is insufficient first/middle name information on the COA record to produce a match using individual matching logic.	N	D

**NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

Exhibit B – NCOA^{Link} Return Code Descriptions – continued

Code	Description	Address	How
12	Cannot Match COA: Middle Name Test Failed – The input record was a potential match to a COA record. A match cannot be made because the input name contains a conflict with the middle name or initials on the COA record.	N	S
13	Cannot Match COA: Gender Test Failed – The input record was a potential match to a COA record. A match cannot be made because the gender of the name on the input record conflicts with the gender of the name on the COA record.	N	S
14	Found COA: New Address Would Not Convert at Run Time – The input record matched to a COA record. The new address could not be converted to a deliverable address.	N	S
15	Cannot Match COA: Individual Name Insufficient – The input record was a potential match to a COA record that contains a first initial and middle initial/name [ex. C M Smith or C Mary Smith]. A match cannot be made because the input middle initial/name is missing or does not equal the middle initial/name on the COA.	N	S
16	Cannot Match COA: Secondary Number Discrepancy – The input record was a potential match to a street level COA record. However, a match is prohibited based on one of the following reasons: 1) There is conflicting secondary information on the input and COA record; 2) the input record contained secondary information and matched to a family record that does not contain secondary information. In item 2, this address match situation requires individual name matching logic to obtain a COA match and individual names do not match.	N	S
17	Cannot Match COA: Other Insufficient Name – The input record was a potential match to a COA record that contains a full first name and full middle name. The input middle initial/name is missing or different from the middle name on the COA. A match cannot be made because the first name on the COA was truncated (drop-n flag) and the middle names must be equal in order to make this match.	N	S
18	Cannot Match COA: General Delivery – The input record was a potential match to a COA record from a General Delivery address. This address situation requires individual name matching logic to obtain a match and individual names do not match.	N	D
19	Found COA: New Address not ZIP + 4 coded or New address primary number not DPV confirmable – There is a change of address on file but the new address cannot be ZIP + 4 coded and therefore there is no 11-digit DPBC to store or return, or the new address primary number cannot be confirmed on DPV.	N	D
20	Cannot Match COA: Conflicting Directions after re-chaining – Multiple COA records were potential matches to the input record. The COA records contained different new addresses and a single match result could not be determined.	N	D
66	Daily Delete – The input record matched to a business, individual or family type COA record with an old address that is present in the daily delete file. The presence of an address in the daily delete file means that a COA record with this address is pending deletion from the COA master file and that <u>no</u> mail may be forwarded from this address.	N	S
91	COA Match: Secondary Number dropped from COA – The input record matched to a COA record. The COA record had a secondary number and the input address did not.	Y	S
92	COA Match: Secondary Number Dropped from input address – The input record matched to a COA record. The input record had a secondary number and the COA record did not. The record is a ZIP + 4 street level match.	Y	S

Exhibit B – NCOA^{Link} Return Code Descriptions – continued

Other Return Code Descriptions

Code	Description	Process
AA	Input Address ZIP+4™ match	ZIP+4
A1	Input Address ZIP+4 not matched	ZIP+4
M1	Input Address Primary Number Missing	DPV
M3	Input Address Primary Number Invalid	DPV
P1	Input Address Missing PO, RR, or HC Box number	DPV
P3	Input Address PO, RR, or HC Box number invalid	DPV
BB	Input Address DPV [®] matched (all components)	DPV
RR	Input Address DPV matched to CMRA	DPV
CC	Input Address DPV Primary Number match, Secondary Number not Matched (secondary number present but is not DPV confirmed)	DPV
N1	Input Address DPV Primary Number match, High-rise Address Missing Secondary Number	DPV
R1	Input Address DPV matched to CMRA but PMB Number not Present	DPV
F1	Input Address matched to a Military Address	DPV
G1	Input Address matched to a General Delivery Address	DPV
U1	Input Address matched to a Unique ZIP Code	DPV

*Note: These codes are all generated during the DPV process. The Process indicator of “ZIP+4” or “DPV” denotes from which portion of DPV processing the return codes was generated.

NCOA^{Link}® PROCESSING ACKNOWLEDGEMENT FORM

The collection of information on this Processing Acknowledgement Form (PAF) is required by the Privacy Act of 1974. The United States Postal Service[®] (USPS[®]) requires that each NCOA^{Link} Licensee have a completed NCOA^{Link} PAF for each of their NCOA^{Link} customers prior to providing the NCOA^{Link} service. The Licensee is also required by the USPS to retain a copy of the completed form for each of its customers and to obtain an updated PAF from each of its customers at minimum once per year. Any signature upon this PAF shall be considered valid for all purposes and have the same effect whether it is an ink-signed hardcopy document or equivalent alternative.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

**Exhibit F
Service Provider Required Text Document**

<<Service Provider>> is a non-exclusive Licensee of the USPS[®] (United States Postal Service[®]) to provide Full and/or Limited Service NCOA^{Link}® processing.

It is important to note that not all Service Providers can provide the same level of service. Data quantity differs based on license level. Full Service Providers receive the full 48 month data while Limited Service Providers receive an 18 month data set. All data fulfillments to Service Providers are provided weekly under direct license from the USPS.

The full NCOA^{Link} file is a consolidated file of move information that on average contains approximately 160 million permanent changes-of-address (COAs) filed with the United States Postal Service (USPS). These COAs are retained on the file for a four-year period from the move-effective date and the file is updated weekly.

Before being added to the NCOA^{Link} file, the **Old** address supplied by the Postal customer must be ZIP + 4 coded. The **New** addresses must be ZIP + 4 coded and validated using the USPS' proprietary database of actual delivery points. (NOTE: The delivery point database does not include NAMES or COA information.) Each delivery point confirmed **New** address is included on the NCOA^{Link} file. If unable to validate the **New** address, the NCOA^{Link} process will indicate that a move exists but will not provide the undeliverable **New** address.

New address information is provided only when a match to the input name and address is attained. The typical profile of the **New** address information contained on the NCOA^{Link} file is as follows:

- 80.92% Forwardable moves containing delivery point confirmed **New** addresses –
New address provided
- 1.18% Moves containing unconfirmed **New** addresses – **New** address not provided
- 13.80% Moved, left no address
- 3.92% PO Box Closed
- 0.18% Foreign moves

When possible, postal customers who move multiple times within the NCOA^{Link} time period are “linked” or “chained” to ensure that the latest address is furnished when an NCOA^{Link} match is attained. This is not always possible if subsequent COAs are not filed in exactly the same manner as a COA filed previously (e.g., name spelling differences or conflicting secondary information).

The provision of change of address information is controlled by strict name and address matching logic. NCOA^{Link} processing will only provide new address information when queried with a specific algorithm of the name and input address from a mailers address list which matches the information on the NCOA^{Link} Product. Data contained in and information returned by NCOA^{Link} is determined by the name and move type (Business, Individual, or Family) indicated on a Postal customer's Change of Address form.

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

The data contained within the NCOA^{Link} Product is comprised of approximately 40% family moves, 54% individual moves, and 6% business moves.

All matches made to the NCOA^{Link} file require a ZIP + 4 coded, parsed input address.

The five types of processing modes are Standard (S); Business and Individual (C); Individual (I); Business (B); and Residential (R).

Standard Processing Mode (S)

- Standard Processing Mode requires inquiries in the following order:
 - Business – Match on business name.
 - Individual – Match on first name, middle name, surname and title required. Gender is checked and nickname possibilities are considered.
 - Family – Match on surname only.
- **Under no circumstances shall there be a “Family” match only option.**

Business and Individual Processing Mode (C)

- The NCOA^{Link} customer may choose to omit all “Family” match inquiries and allow only “Individual” and “Business” matches to be acceptable. This matching process is also known as C Processing Mode.

Individual Processing Mode (I)

- The NCOA^{Link} customer may also choose to omit “Business” match inquiries when processing individual names for mailing lists that contain no business addresses.

Business Processing Mode (B)

- The NCOA^{Link} customer may choose to process for only “Business” matches when processing a “Business-to-Business” mailing list which contains no residential (Individual or Family) addresses.

Residential Processing Mode (R)

- The NCOA^{Link} customer may choose to omit “Business” match inquiries and allow only “Individual” and “Family” matches to be acceptable under Residential Processing Mode. This matching process is also known as R Processing Mode.

The USPS has opted to remove soundex from the matching logic process. Consequently, the USPS has established a process called the “Rules Table.” This process will produce matches that otherwise would not be possible, i.e. JOHNY and JOHNNY, without the risks associated with soundex.

All nickname possibilities are derived from a standard USPS nickname list. In considering alternate presentations of an input name, only reasonable derivatives of the original input name are acceptable. If an input name and address do not match to NCOA^{Link} and alternative queries are attempted, any variations which obtain NCOA^{Link} matches will be provided to the NCOA^{Link} customer for analysis.

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

When a match or a near match of an input name and address to NCOA^{Link} is identified, a standard NCOA^{Link} return code is provided indicating the type of match made or reason that a match could not be made.

The standard output of a USPS NCOA^{Link} process is:

- a) Each original unaltered input name and address as it was presented.
- b) The standardized input address appended with the correct ZIP + 4/DPC, other postal values and any other intelligence flags or footnotes that result from the CASSTM processing segment.
- c) For each mailing address for which there is a match to the NCOA^{Link} Product, a standardized new address with 11-digit Delivery Point Barcode (DPBC) and standard return codes.
- d) When a match is made, the following elements must be returned: the move effective date, the specific name and address utilized in the query that obtained the match, and the move type. The move type is determined by the Interface based on the specific name inquiry utilized to obtain the match.
- e) For each mailing address for which there is not a match to the NCOA^{Link} Product, the Interface shall return all elements as appropriate under items a and b as well as any standard return codes as may be appropriate.
- f) The urbanization name information, when applicable.
- g) The carrier route information for new (updated) addresses.
- h) DPV results for the input address, if requested.
- i) LACS^{Link} results, if requested.
- j) Suite^{Link} results, if requested.
- k) Processing summary report containing information to identify the specific list and the statistics resulting from the NCOA^{Link} process performed on the list.

Although every record must be returned, the format of the records returned by a Service Provider to their clients is determined by a separate agreement between the processor and the customer.

NCOA^{Link} processing has the potential to reduce returned mail, yet the USPS does not make any guarantees, express or implied, on the reduction of such mail. Thus any costs associated with returned mail are the Licensees' and/or their customers' sole responsibility.

An NCOA^{Link} customer with questions about the specific results returned from an NCOA^{Link} process must first contact the processor for explanation and resolution.

Prior to the processing of NCOA^{Link} data, every customer must have completed and returned to their NCOA^{Link} Licensee the "NCOA^{Link} PROCESSING ACKNOWLEDGEMENT FORM" provided to them by their Licensee or Agent. It is inappropriate to misrepresent any of the information on the form. Punitive action will be taken by the USPS if the customer, agent or licensee is found to have knowingly supplied false information. Depending on the severity of the offense, actions may include litigious or even criminal charges being brought against the offender.

The ANK^{Link} option is available through Limited Service Provider Licensees to enable mailers to make informed choices regarding a specific customer contact. If the data indicates a move, the mailer may choose to suppress the record from their list or attempt to determine the actual new address by engaging the services of an NCOA^{Link} Full Service Provider (FSP) Licensee.

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

Mailers choosing to engage the services of an FSP Licensee may submit only those ANK^{Link} matches for which they need additional processing provided that:

- 1) The mailer informs the FSP Licensee that the list is derived from a prior ANK^{Link} process.
- 2) The list submitted to the FSP for processing meets the mailing list requirement of at least 100 unique names and addresses.
- 3) The final results are incorporated back into the original list.
- 4) The records separated for processing are not used to create a derivative product.

The following trademarks are owned by the United States Postal Service[®]: ANK^{Link}, CASS, DPV, LACS^{Link}, NCOA^{Link}, Suite^{Link}, United States Postal Service, USPS and ZIP + 4.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

**Exhibit G
Full and Limited Service Provider
Required Text Document
For Combined PAF Use Only**

<<Full Service Provider>> is a non-exclusive Licensee of the USPS[®] (United States Postal Service[®]) to provide Full Service NCOA^{Link} processing, ZIP + 4[®] Coding, DPV[®], LACS^{Link} and Suite^{Link}™. <<Limited Service Provider>> is a non-exclusive Licensee of the USPS to provide Limited Service NCOA^{Link} processing.

It is important to note that not all Service Providers can provide the same level of service. Data quantity differs based on license level. Full Service Providers receive the full 48 month data set, while Limited Service Providers receive an 18 month data set. All data fulfillments to Service Providers are provided weekly under direct license from the USPS.

The full NCOA^{Link} file is a consolidated file of move information that on average contains approximately 160 million permanent changes-of-address (COAs) filed with the United States Postal Service (USPS). These COAs are retained on the file for a four-year period from the move-effective date and the file is updated weekly.

Before being added to the NCOA^{Link} file, the **Old** address supplied by the Postal customer must be ZIP + 4 coded. The **New** addresses must be ZIP + 4 coded and validated using the USPS' proprietary database of actual delivery points. (NOTE: The delivery point database does not include NAMES or COA information.) Each delivery point confirmed **New** address is included on the NCOA^{Link} file. If unable to validate the **New** address, the NCOA^{Link} process will indicate that a move exists but will not provide the undeliverable **New** address.

New address information is provided only when a match to the input name and address is attained. The typical profile of the **New** address information contained on the NCOA^{Link} file is as follows:

- 80.92% Forwardable moves containing delivery point confirmed **New** addresses –
New address provided
- 1.18% Moves containing unconfirmed **New** addresses – **New** address not provided
- 13.80% Moved, left no address
- 3.92% PO Box Closed
- 0.18% Foreign moves

When possible, postal customers who move multiple times within the NCOA^{Link} time period are "linked" or "chained" to ensure that the latest address is furnished when an NCOA^{Link} match is attained. This is not always possible if subsequent COAs are not filed in exactly the same manner as a COA filed previously (e.g., name spelling differences or conflicting secondary information).

The provision of change of address information is controlled by strict name and address matching logic. NCOA^{Link} processing will only provide new address information when queried with a specific algorithm of the name and input address from a mailers address list which matches the information on the NCOA^{Link} Product. Data contained in and information returned by NCOA^{Link} is determined by the name and move type (Business, Individual, or Family) indicated on a Postal customer's Change of Address form.

NCOA^{Link}® FULL SERVICE PROVIDER LICENSEE PERFORMANCE REQUIREMENTS

The data contained within the NCOA^{Link} Product is comprised of approximately 40% family moves, 54% individual moves, and 6% business moves.

All matches made to the NCOA^{Link} file require a ZIP + 4 coded, parsed input address.

The five types of processing modes are Standard (S); Business and Individual (C); Individual (I); Business (B); and Residential (R).

Standard Processing Mode (S)

- Standard Processing Mode requires inquiries in the following order:
 - Business – Match on business name.
 - Individual – Match on first name, middle name, surname and title required. Gender is checked and nickname possibilities are considered.
 - Family – Match on surname only.
- **Under no circumstances shall there be a “Family” match only option.**

Business and Individual Processing Mode (C)

- The NCOA^{Link} customer may choose to omit all “Family” match inquiries and allow only “Individual” and “Business” matches to be acceptable. This matching process is also known as C Processing Mode.

Individual Processing Mode (I)

- The NCOA^{Link} customer may also choose to omit “Business” match inquiries when processing individual names for mailing lists that contain no business addresses.

Business Processing Mode (B)

- The NCOA^{Link} customer may choose to process for only “Business” matches when processing a “Business-to-Business” mailing list which contains no residential (Individual or Family) addresses.

Residential Processing Mode (R)

- The NCOA^{Link} customer may choose to omit “Business” match inquiries and allow only “Individual” and “Family” matches to be acceptable under Residential Processing Mode. This matching process is also known as R Processing Mode.

The USPS has opted to remove soundex from the matching logic process. Consequently, the USPS has established a process called the “Rules Table.” This process will produce matches that otherwise would not be possible, i.e. JOHNY and JOHNNY, without the risks associated with soundex.

All nickname possibilities are derived from a standard USPS nickname list. In considering alternate presentations of an input name, only reasonable derivatives of the original input name are acceptable. If an input name and address do not match to NCOA^{Link} and alternative queries are attempted, any variations which obtain NCOA^{Link} matches will be provided to the NCOA^{Link} customer for analysis.

When a match or a near match of an input name and address to NCOA^{Link} is identified, a standard NCOA^{Link} return code is provided indicating the type of match made or reason that a match could not be made.

**NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS**

The standard output of a USPS NCOA^{Link} process is:

Note: All numeric fields are right justified, zero filled. All alphanumeric fields are left justified, spaced filled.

Note: This file shall be submitted in standard ASCII text format and electronically transmitted to the NCSC. The file shall be named using “P,” the 4-character code assigned by the NCSC, the 1-character code for the month and the year with an extension of DAT. (e.g. PNAAC02.DAT)

A single PAF may be completed to cover processing for all lists submitted by the list owner provided that the official signing the document has the authority to do so for each separate list. If multiple lists are covered by a single PAF, Licensee must record "MULTIPLE" in the space provided for the PAF ID on the pre-printed PAF. When "MULTIPLE" appears as the PAF ID, an itemization of the list names and corresponding PAF IDs assigned to each must be recorded on the back of the PAF.

All PAF information may be maintained in a single dataset within Licensee's system. At the time of reporting, Licensee must provide a single record of the PAF information for each unique PAF ID which appears in the Customer Service Log for the corresponding time period. A second record for a PAF ID will be necessary only if the list is processed before and after PAF renewal during the month in which that PAF is renewed.

Note: All numeric fields are right justified, zero filled.

All alphanumeric fields are left justified, spaced filled.

Note: This file shall be submitted in standard ASCII text format and electronically transmitted to the NCSC. The file shall be named using "B," the 4-character code assigned by the NCSC, the 1-character code for the month and the year with an extension of DAT. (e.g. BNAAAC02.DAT)

A Broker/Agent or List Administrator representative must sign the PAF of each of its customers. All information on these third parties may be maintained in a single dataset within Licensee's system. At the time of reporting, Licensee must provide a single record of the third party information for each unique ID which appears in the corresponding PAF Information Log.

A Broker/Agent is defined as an external third party who generates business for Licensee. The Broker/Agent may or may not actually handle the mailer's lists for processes other than NCOA^{Link}. The Broker/Agent does not perform any address updates for the mailer.

A List Administrator is defined as a third party who maintains the database(s) of a mailing list owner. All address updates are performed by the List Administrator on behalf of the list owner. In instances where a list owner outsources maintenance of its data to Licensee, Licensee must be listed on the PAF and recorded in the Log files as the List Administrator.

APPENDIX A
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
DPV[®] REQUIREMENT

Introduction

The United States Postal Service[®] (USPS[®]) has a technology product that will help mailers validate the accuracy of their address information, right down to the physical delivery point. Mailers will be able to identify individual addresses within a mailing list that are potentially undeliverable-as-addressed due to an addressing deficiency. This technology is called the DPV[®] Product and is made available under license from USPS.

Although DPV can validate the accuracy of an existing address, it cannot be used to create address lists. The DPV Product is a secure dataset of the 145+ million USPS-delivered addresses; it does not contain addresses that are not delivered by USPS. Instead of clear-text data, DPV data is in a binary data format that is unintelligible to the reader. There is no text data embedded in the DPV data. Only by presenting an address and processing it using the specific logic defined by USPS can the user obtain any useful information. The information returned from a DPV inquiry is limited to a “YES/NO” interpretation. This is why DPV is not an address list; it cannot by itself be used to produce a listing of addresses.

1. General Requirements

- 1.1 DPV will be required by the NCOA^{Link} Full Service Provider Licensees as an adjunct process in combination with the ZIP + 4[®] coding and NCOA^{Link} processing.
- 1.2 To initiate and track the NCOA^{Link}/DPV interface, a modified Certification process will be used. If the NCOA^{Link} Full Service Provider Licensee is certified for DPV or DSF²™ processing, Licensee may use these processing methods to satisfy the NCOA^{Link}/DPV requirement. If the NCOA^{Link} Full Service Provider Licensee does not hold a certification for DPV or DSF²™ processing, Licensee can choose from the following options:
 - a. Select a CASS™ vendor with a DPV-enabled ZIP + 4 engine.
 - b. Write a proprietary interface for NCOA^{Link}/DPV only. To exercise this option, the following will apply:
 1. Request, in writing, the DPV Interface Developer Guide.
 2. Develop or outsource development of DPV interface in accordance with the DPV Product License, DPV Licensee Performance Requirements, and the Interface Developer Guide.

APPENDIX A
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
DPV[®] REQUIREMENT

3. Request a Stage II CASS/DPV certification test when DPV Interface is completed.

2. Specific Requirements

- 2.1 Although only NCOA^{Link} Full Service Provider Licensees under 1.2.b above will be issued a specific separate DPV license, except for the following, all Licensees shall be bound by the restrictions and requirements of that license (obtain the most current copy at <http://ribbs.usps.gov/files/dpv>):
 - a. Section 2.1, Sole Purpose and Scope, of the DPV License Agreement – The NCOA^{Link}/DPV interface will not be allowed to be “...incorporated into one or more products to be marketed by Licensee in its own name to mailers and subsequent software integrators in their own name...”. The NCOA^{Link}/DPV interface is not authorized to be sub-licensed or repackaged/resold from the NCOA^{Link} Licensee to any other vendor for DPV processing (unless independently licensed as a DPV Licensee and then only to authorized NCOA^{Link} Full Service Provider Licensees).
 - b. Section 3.1, Grant of Rights, of the DPV License Agreement –: NCOA^{Link} Full Service Provider Licensees may develop their own interface or outsource to have it written. They do not have to be “... a Coding Accuracy Support System (CASS)-certified software developer...”.
- 2.2 For NCOA^{Link} Full Service Provider Licensees choosing option 1.2.b to write a proprietary NCOA^{Link}/DPV only interface, the following exceptions are also permitted:
 - a. Section 6.1, Payments, of the DPV License Agreement – Licensee will not be required to pay the DPV license fee for an interface used solely to fulfill this NCOA^{Link}/DPV requirement.
 - b. Section 5.6.2.1, Specific Requirements, of the DPV Licensee Performance Requirements – Licensee will not need to create a “one time only, restart code” since the product will be utilized in-house only.
 - c. Section 5.2, Specific Requirements, of the DPV Licensee Performance Requirements – Licensee will not be required to encapsulate or encrypt the DPV-integrated product since it cannot be resold or remarketed and must be used in-house only.

APPENDIX A
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
DPV[®] REQUIREMENT

3. Standards of Performance

- 3.1 NCOA^{Link} Full Service Provider Licensees must conform to the latest published version of the DPV Licensee Performance Requirements. Any changes will be published at <http://ribbs.usps.gov/files/dpv>.
- 3.2 NCOA^{Link} Full Service Provider Licensees will process DPV only as a part of NCOA^{Link} processing. Processing of address lists solely for DPV only is not authorized. If a DPV enabled CASS Certified ZIP + 4 product is obtained independently then the use of the CASS/DPV product is allowed as part of the NCOA^{Link} process as well as outside the NCOA^{Link} process.
- 3.3 NCOA^{Link} Full Service Provider Licensees will complete a DPV process for all address lists presented for NCOA^{Link} processing whether or not the customer wishes to have the DPV footnote information.
- 3.4 NCOA^{Link} Full Service Provider Licensees will provide DPV footnote information in accordance with the DPV Licensee Performance Requirements as requested by the customer.
- 3.5 NCOA^{Link}/DPV interface will be tested with a CASS/DPV Stage II test file in accordance with the DPV license.
- 3.6 The software used by NCOA^{Link} Full Service Provider Licensees for NCOA^{Link} processing will not be required to terminate DPV processing when a False Positive address is encountered on a mailer's file. In this instance, the list can be processed to completion but may not be released to the mailer until authorization to do so is received from the National Customer Support Center.
- 3.7 The Full Service Provider Licensee is required to collect all addresses matched to False Positives and submit the addresses to the NCSC via email to dsf2stop@usps.gov in the format provided below, along with the mailer's name, the total number of addresses processed and number of addresses matched. This information will be analyzed to determine whether the processed list can be returned to the mailer.

4.0 REPORTS AND ADMINISTRATIVE REQUIREMENTS

- 4.1 NCOA^{Link} Licensees will provide USPS with a monthly electronic statistics report. The statistical information required is incorporated into the NCOA^{Link} Full Service Provider Customer Service Log which can be found under Exhibit H.

APPENDIX B
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
LACS^{Link}® REQUIREMENT

Introduction

The United States Postal Service[®] (USPS[®]) has a technology product that will help mailers obtain corrected address information for addresses which have been renamed or renumbered. Mailers will be able to identify individual addresses within a mailing list that are potentially undeliverable-as-addressed due to an address conversion. This technology is called the LACS^{Link}® Product and is made available under license from USPS.

Although the LACS^{Link} Product can correct an existing address, it cannot be used to create address lists. Only by presenting an address and processing it using the specific logic defined by USPS can the user obtain any useful information. The information returned from a LACS^{Link} inquiry is limited to the converted representation of the same address. This is why LACS^{Link} is not an address list; it cannot by itself be used to produce a listing of addresses.

1. General Requirements

- 1.1 NCOA^{Link} Full Service Provider Licensees shall be required to offer LACS^{Link} services.
- 1.2 NCOA^{Link} Full Service Provider Licensees shall obtain a certified LACS^{Link} interface through software development or purchase of a commercially available product.
- 1.3 NCOA^{Link} Full Service Provider Licensees may obtain the LACS^{Link} Product directly from USPS by executing a LACS^{Link} End User License Agreement

2. Specific Requirements

- 2.1 All NCOA^{Link} Full Service Provider Licensees shall be bound by the restrictions and requirements of the LACS^{Link} End User License Agreement and Licensee Performance Requirements (obtain the most current copy at <http://ribbs.usps.gov/files/lacslink>) with the following exception:
 - 2.1.1 Section 10.1, Payments, of the LACS^{Link} End User License Agreement – Licensee will not be required to pay the LACS^{Link} license fee to obtain data used solely to fulfill this requirement.
- 2.2 NCOA^{Link} Full Service Provider Licensees will not be required to obtain a “one time only, restart code” upon encountering False Positive addresses within LACS^{Link}.

APPENDIX B
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
LACS^{Link}® REQUIREMENT

Developers of NCOA^{Link} Full Service Provider software interfaces are granted an exception to the LACS^{Link} Developer Licensee Performance Requirements to accommodate this exception as follows:

2.2.1 Section 4.5, Specific Requirements, of the LACS^{Link} Developer Licensee Performance Requirements – for software to be used only by NCOA^{Link} Full Service Providers, LACS^{Link} Developer Licensees will not need to create a “one time only, restart code”.

3. Standards of Performance

- 3.1 The use of the LACS^{Link} Product is allowed either as a standalone service or as an adjunct process in combination with ZIP + 4[®] coding and NCOA^{Link} processing.
- 3.2 LACS^{Link} interface will be tested with a CASS[™]/LACS^{Link} Stage II test file in accordance with the LACS^{Link} Developer license. Separate certification for LACS^{Link} End User Licensees is not required.
- 3.3 The software used by NCOA^{Link} Full Service Provider Licensees for NCOA^{Link} processing will not be required to terminate LACS^{Link} processing when a False Positive address is encountered on a mailer’s file. In this instance, the list can be processed to completion but may not be released to the mailer until authorization to do so is received from the National Customer Support Center.
- 3.4 NCOA^{Link} Full Service Provider Licensee is required to collect all addresses matched to False Positives and submit the addresses to the NCSC via email to dsf2stop@usps.gov in the format provided below, along with the mailer’s name, the total number of addresses processed and number of addresses matched. This information will be analyzed to determine whether the processed list can be returned to the mailer.

- 4.1 NCOA^{Link} Full Service Provider Licensees will provide USPS with a monthly electronic statistics report. The statistical information required for LACS^{Link} reporting is incorporated into the NCOA^{Link} Full Service Provider Customer Service Log which can be found under Exhibit H.

APPENDIX C
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
Suite^{Link}™ REQUIREMENT

Introduction

The United States Postal Service® (USPS®) has developed a technology product called the Suite^{Link}™ Product. This product will enable mailers to provide improved business addressing information by adding known secondary (suite) information to business addresses, which will allow USPS delivery sequencing where it would not otherwise be possible. The Suite^{Link} Product is made available under license from USPS.

Records that have been processed through CASS Certified™ ZIP + 4® matching software and identified as highrise defaults are potential candidates for Suite^{Link} processing. The input data is queried using one or more keys, which are built using significant words in a building's Enhanced Modified Delivery Point (EMDP) of the business name and address, through the secure hash algorithm. The keys are then used to probe the data table and keys that successfully match the table must then be evaluated to build a sufficient confidence level before applying the suite information to the default address. The Suite^{Link} System cannot be used as part of a standalone process.

1. General Requirements

- 1.1. NCOA^{Link} Full Service Provider Licensees shall be required to offer Suite^{Link} services.
- 1.2. NCOA^{Link} Full Service Provider Licensees shall obtain (either by lease, purchase or through software development) a USPS licensed and certified Suite^{Link} Interface Product.
- 1.3. NCOA^{Link} Full Service Provider Licensees will obtain the Suite^{Link} Product directly from USPS. If the Full Service Provider Licensee wishes to redistribute the Suite^{Link} data to customers and pay the applicable fee for Data Distribution, the Suite^{Link} Data User/Data Distributor License Agreement must be executed.

2. Specific Requirements

- 2.1. All NCOA^{Link} Full Service Provider Licensees shall be bound by the restrictions and requirements of the Suite^{Link} Data User/Data Distributor License Agreement and Licensee Performance Requirements (obtain the most current copy at <http://ribbs.usps.gov/files/SuiteLink>) with the following exception:

APPENDIX C
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
Suite^{Link}™ REQUIREMENT

- 2.1.1. Section 10.1, Payments, of the Suite^{Link} Data User/Data Distributor License Agreement – Licensee using the Suite^{Link} data solely to fulfill this requirement will not be required to pay the Suite^{Link} license fee to obtain data directly from the USPS.
- 2.2. Licensees must utilize a monthly ZIP + 4[®] and City/State Product with the Suite^{Link} Product to provide the most up-to-date business addressing information. Refer to Figure 2 for acceptable use dates for these products.
- 2.3. Licensees must use CASS Certified Address Matching Software for all standardized ZIP + 4 coded input addresses to query the Suite^{Link} Product.

3. Standards of Performance

- 3.1 The Suite^{Link} System cannot be run as part of a standalone process.
- 3.2 The Suite^{Link} Interface Product will be tested with the CASS/Stage II test file in accordance with the Suite^{Link} Developer license. Separate certification for Full Service Providers processing the Suite^{Link} Product is not required.
- 3.3 NCOA^{Link} Full Service Provider Licensees will complete a Suite^{Link} process for all business address lists presented for NCOA^{Link} processing whether or not the customer wishes to have the Suite^{Link} data and return code information.

4. Reports and Administrative Requirements

- 4.1 NCOA^{Link} Full Service Provider Licensees must provide USPS with a monthly electronic statistics report. The statistical information required for Suite^{Link} reporting is incorporated into the NCOA^{Link} Full Service Provider Customer Service Log which can be found under Exhibit H.

LICENSEE PERFORMANCE REQUIREMENTS
MAIL PROCESSING AGENT PROGRAM

Introduction

The USPS[®] has authorized the use of a separate Processing Acknowledgement Form (PAF), entitled the NCOA^{Link}® Mail Processing Agent Processing Acknowledgement Form (MPA PAF), to be submitted to NCOA^{Link} Full Service Provider Licensees to process mailing lists used in the preparation of a mailing for acceptance, handling and delivery exclusively by USPS.

The purpose of the NCOA^{Link} Mail Processing Agent program is to allow NCOA^{Link} Full Service Provider Licensees to process mailing lists for which updated address information cannot be returned to the original list owners or other parties submitting address lists for processing.

Listed below are the difference between the regular NCOA^{Link} PAF and the MPA PAF.

NCOA^{Link} PAF vs. MPA PAF

- 1) NCOA^{Link} PAF – The NCOA^{Link} PAF is submitted with an address list for processing when an updated address list is returned to the party that submits the PAF. That party may then return the updated address list to the mailer or the owner of the address list who is indicated on the PAF. This PAF may be submitted to all types of NCOA^{Link} Service Providers.
- 2) NCOA^{Link} MPA PAF – The MPA PAF can be submitted only to NCOA^{Link} Full Service Providers by a party that uses an address list of another party to prepare mail that the Mail Processing Agent then deposits with USPS. Both the Mail Processing Agents and NCOA^{Link} Full Service Providers are required to destroy the updated address lists, and are not authorized to release the updated address lists to other parties, including the party that originally provided the address list to the Mail Processing Agent.

APPENDIX D
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
MAIL PROCESSING AGENT PROGRAM

1. General Requirements

- 1.1. The Mail Processing Agent program is solely for NCOA^{Link} processing by a Full Service Provider who receives a properly completed MPA PAF from a Mail Processing Agent. Neither Limited Service Providers nor third parties can broker full service NCOA^{Link} services to Mail Processing Agents.
- 1.2. The Mail Processing Agent must not use updated address lists to create new movers' lists nor shall the Agent use updated lists for any purpose other than mailing the original mail pieces from the original list owner or other party that furnishes it with an address list. Furthermore, the Agent must not disclose any updated address information to any third parties for any purpose whatsoever.
- 1.3. The USPS has the right to audit and inspect Mail Processing Agents' NCOA^{Link} processes and procedures without prior notice. Mail Processing Agents must retain copies of MPA PAFs for six (6) years after depositing mail with USPS, and maintain records of dates on which it destroyed mailing lists after depositing mail with USPS.
- 1.4. Since no updated address information will be returned to the original list owners or other parties outside of the U.S. territory, foreign based processing is permitted with this program. However Mail Processing Agents must reside within the U.S. territory.

2. Specific Requirements

- 2.1. Licensee shall only return the updated list to the Mail Processing Agent. Updated address information shall not be returned to the original list owners or other party that has furnished the address list that Mail Processing Agent submits to the NCOA^{Link} Full Service Provider.
 - 2.1.1. If the original list owners request to receive the updated address information, the list owner cannot participate in the Mail Processing Agent program. Instead, they must follow the standard NCOA^{Link} procedures, including completing the standard NCOA^{Link} PAF.
- 2.2. Once the Licensee returns the updated mailing list to the Mail Processing Agent, the Agent must destroy both the original and updated lists and any replications or derivatives thereof, within 30 calendar days from the date the mail pieces are deposited in the mail stream. The Mail Processing Agent may wish to use the

APPENDIX D
NCOA^{Link®} FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
MAIL PROCESSING AGENT PROGRAM

updated mailing list and deposit the mail as expeditiously as possible because the Licensee similarly is required to destroy the original and updated address lists.

- 2.3. Licensee must destroy both the original and updated lists within 45 days from the date the updated list is returned to the Mail Processing Agent.

3. Processing Requirements

- 3.1. Mail Processing Agents must submit to Full Service Providers a minimum of 100 unique names and addresses for each list for NCOA^{Link} processing. Mail Processing Agents cannot combine smaller lists it receives from different parties to achieve the minimum of 100 unique names and addresses.
- 3.2. As part of full service NCOA^{Link} processing, DPV[®], LACS^{Link®} and Suite^{Link™} processing must be performed on lists from Mail Processing Agents. Licensees shall be bound by all requirements and restrictions for the abovementioned Products, unless USPS elects to grant written exceptions to an NCOA^{Link} Full Service Provider Licensee.
- 3.3. Licensee performing NCOA^{Link} processing for Mail Processing Agents are limited to the following three (3) processing modes: Business and Individual (C); Individual (I); and Business (B).
- 3.4. Once lists have been processed through the NCOA^{Link} service, records with a return code of 01 (Foreign Move), 02 (Moved Left No Address – MLNA) or 03 (Box Closed No Order – BCNO) must be suppressed if the time period is longer than 18 months. However if the records with the aforementioned return codes are less than 18 months, Licensee may elect to mail to these addresses.

4. Reporting

- 4.1. The Mailing Processing Agents must utilize the Mail Processing Agent NCOA^{Link} PAF and Required Text document with this program. The Mail Processing Agent PAF and Required Text Document is posted to the RIBBS website at <http://ribbs.usps.gov/files/NCOALINK/FSP%5FINFO/>. For specific information on the completion of the Mail Processing Agent NCOA^{Link} PAF, please reference the PAF Guide on the RIBBS website at http://ribbs.usps.gov/files/NCOALINK/PAF_GUIDE.PDF.

APPENDIX D

MAIL PROCESSING AGENT PROGRAM

REQUIRED TEXT

<<Full Service Provider Licensee>> is a non-exclusive Licensee of the USPS[®] (United States Postal Service[®]) to provide Full Service NCOA^{Link}, ZIP + 4[®] Coding, DPV[®], LACS^{Link} and Suite^{Link}™ processing to <<Mail Processing Agent>>, a Mail Processing Agent.

Full Service Providers receive the full 48 month data set weekly under direct license from the USPS.

The full NCOA^{Link} file is a consolidated file of move information that on average contains approximately 160 million permanent changes-of-address (COAs) filed with the United States Postal Service (USPS). These COAs are retained on the file for a four-year period from the move-effective date and the file is updated weekly.

Before being added to the NCOA^{Link} file, the **Old** address supplied by the Postal customer must be ZIP + 4 coded. The **New** addresses must be ZIP + 4 coded and validated using the USPS' proprietary database of actual delivery points. (NOTE: The delivery point database does not include NAMES or COA information.) Each delivery point confirmed **New** address is included on the NCOA^{Link} file. If unable to validate the **New** address, the NCOA^{Link} process will indicate that a move exists but will not provide the undeliverable **New** address.

New address information is provided only when a match to the input name and address is attained. The typical profile of the **New** address information contained on the NCOA^{Link} file is as follows:

- 80.92% Forwardable moves containing delivery point confirmed **New** addresses –
New address provided
- 1.18% Moves containing unconfirmed **New** addresses – **New** address not provided
- 13.80% Moved, left no address
- 3.92% PO Box Closed
- 0.18% Foreign moves

When possible, postal customers who move multiple times within the NCOA^{Link} time period are “linked” or “chained” to ensure that the latest address is furnished when an NCOA^{Link} match is attained. This is not always possible if subsequent COAs are not filed in exactly the same manner as a COA filed previously (e.g., name spelling differences or conflicting secondary information).

The provision of change of address information is controlled by strict name and address matching logic. However, some address updates are based on near matches. NCOA^{Link} processing will only provide new address information when queried with a specific algorithm of the name and input address from a mailers address list which matches the information on the NCOA^{Link} Product. Data contained in and information returned by NCOA^{Link} is determined by the name and move type (Business, Individual or Family; however the Family move type is not applicable to the Mail Processing Agent Program) indicated on a Postal customer's Change of Address form.

APPENDIX D
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
MAIL PROCESSING AGENT PROGRAM

The data contained within the NCOA^{Link} Product is comprised of approximately 40% family moves, 54% individual moves, and 6% business moves.

All matches made to the NCOA^{Link} file require a ZIP + 4 coded, parsed input address.

The three types of processing modes available to Mail Processing Agents are Business and Individual (C); Individual (I); and Business (B).

Business and Individual Processing Mode (C)

- The NCOA^{Link} customer may choose to omit all “Family” match inquiries and allow only “Individual” and “Business” matches to be acceptable. This matching process is also known as C Processing Mode.

Individual Processing Mode (I)

- The NCOA^{Link} customer may also choose to omit “Business” match inquiries when processing individual names for mailing lists that contain no business addresses.

Business Processing Mode (B)

- The NCOA^{Link} customer may choose to process for only “Business” matches when processing a “Business-to-Business” mailing list which contains no residential (Individual or Family) addresses.

The USPS has established a process called the “Rules Table.” This process will produce matches that otherwise would not be possible, e.g. JOHNY and JOHNNY.

The USPS has created a standard nickname list, which allows for alternate presentations of an input name, i.e. James and Jim. The standard nickname list allows for potential matches to the NCOA^{Link} data set. Only reasonable derivatives of the original input name are acceptable.

Occasionally matches will be made based on the above processes.

The standard output of a USPS Full Service NCOA^{Link} process for the Mail Processing Agent is:

- a) Each original unaltered input name and address as it was presented.
- b) The standardized new (updated) address from all processes, including CASS, DPV, LACS^{Link} and Suite^{Link}, appended with the correct ZIP + 4/DPC, 11-digit Delivery Point Barcode (DPBC) and carrier route information.
- c) When a match is made, the following elements must be returned: the move effective date, the specific name and address utilized in the query that obtained the match, and the move type. The move type is determined by the Interface based on the specific name inquiry utilized to obtain the match.
- d) The urbanization name information, when applicable.

APPENDIX D
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
MAIL PROCESSING AGENT PROGRAM

- e) The carrier route information for the standardized input address or the standardized new (updated) addresses.
- f) DPV results for the input address, if requested.
- g) LACS^{Link} results, if requested.
- h) Suite^{Link} results, if requested.
- i) Processing summary report containing information to identify the specific list and the statistics resulting from the NCOA^{Link} process performed on the list.

The Mail Processing Agent must submit a minimum of 100 unique names and addresses on each mailing list for NCOA^{Link} processing exclusively for acceptance, handling and delivery by the USPS. The Full Service Provider must only return the updated list to the Agent. Upon receipt of the updated mailing lists, Agent must destroy the original and updated mailing lists within 30 days from the date the mail pieces are deposited into the mail stream.

The Mail Processing Agent cannot use this process for the purpose of returning updated mailing lists to its customers. To obtain the updated lists, Agent's customers must use the standard NCOA^{Link} process and complete the standard NCOA^{Link} Processing Acknowledgement Form (PAF).

The Mail Processing Agent shall not disclose any updated address information to any third parties for any purpose whatsoever.

NCOA^{Link} processing has the potential to reduce returned mail, yet the USPS does not make any guarantees, express or implied, on the reduction of such mail. Thus any costs associated with returned mail are the Licensees' and/or their Mail Processing Agent's sole responsibility.

A Mail Processing Agent with questions about the specific results returned from an NCOA^{Link} process must first contact the NCOA^{Link} Full Service Provider for explanation and resolution.

Prior to the processing of NCOA^{Link} data, every Mailing Processing Agent must have completed and returned to their NCOA^{Link} Full Service Provider Licensee the "MAIL PROCESSING AGENT NCOA^{Link} PROCESSING ACKNOWLEDGEMENT FORM (FULL SERVICE PROCESSING ONLY)" provided to them by their Licensee. It is inappropriate to misrepresent any of the information on the form. Punitive action will be taken by the USPS if the Mail Processing Agent or Licensee is found to have knowingly supplied false information. Depending on the severity of the offense, actions may include litigious or even criminal charges being brought against the offender.

If USPS determines that a Mail Processing Agent is not in compliance with the guidelines set forth in the Mail Processing Agent NCOA^{Link} Processing Acknowledgement Form, the NCOA^{Link} Mail Processing Agent Information Package and/or any documentation pertaining to this program, the USPS, at its sole discretion, has the right to prohibit all NCOA^{Link} Full Service Provider Licensees from entering into an agreement with the Agent to perform mail processing services.

APPENDIX D
NCOA^{Link}® FULL SERVICE PROVIDER
LICENSEE PERFORMANCE REQUIREMENTS
MAIL PROCESSING AGENT PROGRAM

USPS, or its designated agents or representatives, shall have the right to visit Agent's premises and examine Agent's computer systems, processing files, documents, and other materials relating to the Mail Processing Agent program with or without notice to the Agent. Agent shall provide USPS or its agents or representatives access during normal business hours to the premises, books, and records that relate to the use of the program by Agent.

The following trademarks are owned by the United States Postal Service®: CASS, DPV, LACS^{Link}, NCOA^{Link}, Suite^{Link}, USPS and ZIP + 4.

MAIL PROCESSING AGENT NCOA^{Link®} PROCESSING ACKNOWLEDGEMENT FORM (FULL SERVICE PROVIDER PROCESSING ONLY)

The collection of information on this Processing Acknowledgement Form (PAF) is required by the Privacy Act of 1974. The United States Postal Service[®] (USPS[®]) requires that each NCOA^{Link} Full Service Provider Licensee have a completed NCOA^{Link} PAF for each of their NCOA^{Link} Mail Processing Agents prior to providing the NCOA^{Link} service. The Full Service Provider Licensee is also required by the USPS to retain a copy of the completed form for each of its Mail Processing Agents and to obtain an updated PAF from each of its Mail Processing Agents at minimum once per year. Any signature upon this PAF shall be considered valid for all purposes and have the same effect whether it is an ink-signed hardcopy document or equivalent alternative.

I, the undersigned, an authorized representative of _____, a Mail Processing Agent, do hereby acknowledge that I have received, reviewed and agree to comply with the terms in the NCOA^{Link} Full Service Provider Mail Processing Agent Information Package supplied to me by _____, an NCOA^{Link} Full Service Provider Licensee. I understand that the sole purpose of the NCOA^{Link} service is to provide a mailing list correction service for lists that will be used for preparation of mailings. I understand that NCOA^{Link} may not be used to create or maintain new movers' lists. Furthermore I agree to the following terms and conditions:

- Agent must submit to the Full Service Provider Licensee a minimum of 100 unique names and addresses on each mailing list for NCOA^{Link} processing for acceptance, handling and delivery by the USPS.
- Agent will not return updated address records to the original owner nor will the updated list be used for any purpose other than for mailing the original mail pieces from the original mailing list owner.
- Agent must destroy the original and updated mailing list within 30 days from the date the mail pieces are deposited into the mail stream.
- Agent acknowledges that the USPS has the right to audit and inspect the Agent's processes and procedures pertaining to the NCOA^{Link} service without prior notice.
- Agent shall not disclose any updated address information to any third parties for any purpose whatsoever.
- Agent understands that failure to comply with these terms and conditions may result in the loss of eligibility to participate in the NCOA^{Link} Mail Processing Agent Program.
