

LICENSING ANNOUNCEMENTS

January 18, 2008

AMS API Licensees,

Below is an important announcement regarding the creation of a centralized email account.

Creating a Centralized Email Account

To assist in disseminating critical USPS information, the USPS is requiring all AMS API Licensees establish a centralized email account for the disbursement of USPS electronic correspondence. The AMS API License Agreement was updated to reflect this requirement.

Section 45.0 of the AMS API License Agreement in part states 'Licensees shall establish a central email address for receipt and disbursement of USPS electronic correspondence within Licensee's organization. All electronic correspondence will be directed to a central email address within the company's organization. The email address must be ncscinfo@<yourcompany.com>...'

Your company's centralized email account must be established by March 31, 2008. Once the email address has been set up, send written notification to amsapi@usps.gov.

Reminders

- ◆ For any changes made to the license and supporting documents, check the Modifications document at <http://www.ribbs.usps.gov/files/AMSAPI/>.
- ◆ Please forward your questions or concerns to amsapi@usps.gov.
