

LICENSING ANNOUNCEMENT

AUGUST 5, 2016

PO BOX™ THROWBACK TABLE IN THE DPV® PRODUCT

Primary Audience: DPV® Licensees

In an effort to facilitate and grow the packaged-service business, the USPS® has made the decision to include the PO Box Throwback table in the DPV Product. The PO Box Throwback table (Dph.hst) indicates a delivery point is a street address but no mail is delivered by the carrier to the street; however the delivery is made to the customer's PO Box address. The addition of this table will further assist mailers in making sure their deliverables reach their intended destinations.

The table will be included in the September release of the DPV Product. The file size of the DPV Flat Product will remain unchanged; however the file sizes of the DPV Full and Split Products will increase by 67 MB. Attached is the updated DPV Software Developer Guide (SDG).

Please share this information with all pertinent contacts at your company. If you have any questions regarding this notice, contact Licensing and Certification Department at ncoalink@usps.gov.
