

# Facility Access and Shipment Tracking (FAST)

## Version 14.2.0 – Pre-Release Notes

This identifies the contents of the Release 14.2.0 deployed Sunday May 23, 2010 to address known issues.

### 1. External (Mailers)

#### 1.1. FAST Web Services

The following changes apply to customers utilizing FAST Web Services:

##### Mail XML 8.0B

- Web Services customers utilizing the Mail.XML 8.0B DeliveryContentCreateRequest or DeliveryContentUpdateRequest message for Origin Entry or drop ship will no longer receive “9999 – Associated Scheduler not present” when providing an invalid logistics scheduler ID. Customers will now receive “3104 / Invalid Logistic Scheduler ID for Logistic Scheduler Corp ID”.
- Web Services customers utilizing the Mail.XML 8.0B DeliveryContentCancelRequest message for Origin Entry or drop ship with multiple content will no longer receive the same error/warning for all content blocks. Customers will now receive an error/warning validation specific to each content block.
- Web Services customer utilizing the Mail.XML 8.0B DeliveryContentUpdateRequest message will no longer be able to update content with a Mail.XML version lower than the version used to create and associate content to the appointment. Customers will now receive “3075 / Invalid Mail.XML Version - Content has been previously updated with a higher version”.
- Web Services customers utilizing the Mail.XML 8.0B DeliveryApptUpdateRequest/DeliveryApptCreateRequest message for an Origin Entry appointments will receive “3145 / Pallet Presort Level Counts must equal Pallet Level Counts” if the “PalletPreSortLevel” element is provided and the sum of the “PalletPreSortLevel” elements does not equal the pallet count within a “Pallet” block.

##### PartnerAppointmentQuery Message

- Mailers utilizing the PartnerAppointmentQueryRequest message for appointments in which they are specified as the Mail Owner, Mail Preparer or Scheduler will receive the ConsigneeContentID. Previously, the ConsigneeContentID was not provided.
- Mailers utilizing the PartnerAppointmentQueryRequest will no longer receive all content information associated to an appointment. Customers will now only receive content information in which they are specified as the Mail Owner, Mail Preparer or Scheduler.

##### RecurringApptQueryRequest Message

- Mailers utilizing the RecurringApptQueryRequest message will no longer receive “1002 – Unrecognized Facility” when retrieving a recurring Origin Entry appointment at an Origin Entry only active facility.

#### DeliveryContentQueryRequest Message

- Mailers utilizing the DeliveryContentQueryRequest message for a single Origin Entry or drop ship content will receive the facility information if provided. If the content has been associated to an appointment the facility information of the associated appointment will be returned.
- Mailers utilizing the DeliveryContentQueryRequest message for an Origin Entry or drop ship appointment will receive the sum of the “ContainerWeight” element in the “Pallet” and “Bedload” blocks.
- Mailers utilizing the DeliveryContentQueryRequest message for an Origin Entry or drop ship appointment will receive the sum of the “ActualPieceCount” element in the “Pallet” and “Bedload” blocks.

#### Mail XML 6.0

- Web Services customers utilizing the Mail.XML 6.0 DeliveryApptUpdateRequest/DeliveryApptCreateRequest message for an Origin Entry appointments will receive “3145 / Pallet Presort Level Counts must equal Pallet Level Counts” if the “PalletPreSortLevel” element is provided and the sum of the “PalletPreSortLevel” elements does not equal the pallet count within a “Pallet” block.

### 1.2. **Online User Interface**

- Online drop ship external users will no longer receive “Appointment must have at least one drop ship content” when updating the logistics information of a recurring appointment shell. Customers will now be able to update the logistics information of a recurring appointment shell.
- Online drop ship external users (Mail Preparer or Content Creator) will no longer receive “Appointment must have at least one drop ship content” when cancelling the last content associated to a recurring appointment. Customers will now be able to cancel the last content associated to a recurring appointment if it was initially created as a recurring appointment shell.
- Online Drop Ship external users (Mail Preparer or Content Creator) will be able to view/manage their content if an internal user has updated the logistics information of the recurring appointment sequence. Previously an error message displayed stating “Appointment must have at least one drop ship content”.
- Online origin entry and drop ship external users will be able to create Origin Entry One-Time appointments for Origin Entry only active facilities.

### 1.3. **Online Scheduler Hierarchy**

- Online external users attempting to create a new FAST account via the Business Customer Gateway shall receive the following error message on the “*Apply for BSA FAST Service*” page if the Customer Registration system is unavailable “There has been an error retrieving your company information. Please try again later. If this issue continues contact the FAST Help Desk. Please return to Business Customer Gateway”.
