

Facility Access and Shipment Tracking (FAST)

Version 14.3.0 – FAST External Patch Post Release Notes

This identifies the contents of the FAST Patch Post Release 14.3.0 deployed Sunday August 15, 2010.

External FAST Users (Customers)

I. Online User Interface

A. General

1. Online drop ship and Origin Entry users will now see “2010” as the date listed for the copyright description located on the footer of the FAST pages.
2. Online drop ship and Origin Entry users will now view the USPS Help Desk contact information (email FAST@usps.com and telephone 1-877-569-6614) on the pre-login and post-login FAST Welcome pages. The FAST Help Desk will be available as of August 30, 2010.
3. Online drop ship and Origin Entry users scheduling appointments at the Guam facility (NASS Code: 969) will now see the correct local time, the Pacific/Guam timezone. Previously, there was no Pacific/Guam timezone. This has been added in order to calculate time correctly.

B. Stand-Alone Content Modules

1. Online users will no longer have the horizontal scroll bars on the following pages of the Stand-Alone content module to provide a better view of the online pages for the user:
 - *Create Stand-Alone Content* page
 - *Associate Stand-Alone Content* page
 - *Stand-Alone Content Summary* page
 - *Manage Stand-Alone Content* page
 - *Stand-Alone Content Confirmation* page
 - *Add/Edit Content information* page
2. Online users will be able to view the Content Creator on the following pages of the Stand-Alone content module in order to have additional information and ensure that the correct Stand-Alone content is associated.
 - *Associate Stand-Alone Content* page
 - *Stand-Alone Content Confirmation* page
 - *Stand-Alone Content Summary* page
3. Online users will be able to search for the Desired Induction Facility with a facility search tag. Previously, users had a free form text field.
4. Online users will receive a warning message if the Desired Induction Facility of the Stand-Alone content being associated to an appointment is not the same as that of the facility being used to create the appointment.
5. Online users will be able to filter the associated Stand-Alone contents to only show those that have a Desired Induction Facility equal to the facility where the Appointment is being scheduled.
6. Online users will be able to “Select All” Stand-Alone contents on the *Associate Stand-Alone Content* page. Previously, users had to select each content individually.

C. Customer / Supplier Agreements

1. When downloading the CSA .csv file from the online application, the Processing Code for Parcels will now be displayed as “PARC” instead of “PRCLS”.
2. Online users will no longer view the “YX – Midwest Airlines” Processing Code Label when downloading the .csv file for CSAs.
3. Online users will be able to view the “DL –Delta Airlines” Processing Code Label when downloading the .csv file for CSA’s. Previously the Delta airline code was not available.
4. Online CSA users will no longer view Facilities that are inactive in FDB from the Facility search tag in the CSA module. Users will now be limited to only viewing those Facilities that are active in FDB as well as FAST.

II. FAST Web Services

The following changes apply to customers utilizing FAST Web Services:

A. Mail XML 8.0B

1. FAST Web Services customers utilizing the Mail.XML 8.0B DeliveryContentCancelRequest message for drop ship will no longer receive "314 – You have experienced an error with the application. Please contact your FAST or Web Services system administrator for assistance." when cancelling a Stand-Alone content that was previously rejected. Customers will now be able to cancel the content.
2. FAST Web Services customers utilizing the Guam facility (NASS Code: 969) in Mail.XML 8.0B will now see the correct local time, the Pacific/Guam timezone. Previously, there was no Pacific/Guam timezone. This has been added in order to calculate time correctly.

B. Mail XML 6.0D

1. FAST Web Services customers utilizing the Mail.XML 6.0D DeliveryContentCancelRequest message for drop ship will no longer receive "314 – You have experienced an error with the application. Please contact your FAST or Web Services system administrator for assistance." when cancelling a Stand-Alone content that was previously rejected. Customers will now be able to cancel the content.
2. FAST Web Services customers utilizing the Guam facility (NASS Code: 969) in Mail.XML 6.0D will now see the correct local time, the Pacific/Guam timezone. Previously, there was no Pacific/Guam timezone. This has been added in order to calculate time correctly.
