1. Mailers (External)

PostalOne! Releases 27.0.0.3 deployed to introduce software upgrades to the system. Those upgrades include corrections to issues previously identified from previous releases.

The following items are of interest to external users of the *PostalOne!* system.

1.1 Mobile Barcode Rates

Postage calculations for statements that include Mobile Barcodes and spoilage pieces now include the correct Mobile Barcode Incentive percentages when determining postage amounts. Previously, the Mobile Barcode Incentive applied during postage calculations was incorrect. 79712

Additionally, postage statements with Mail Arrival Dates set to July 1, 2011 or August 31, 2011 now receive the correct rates for Mobile Barcode pieces. Previously, a defect did not apply Mobile Barcode rates to postage statements with Mail Arrival Dates on these two days pieces. 79555

To view a postage statement as a mailer, log on the Business Customer Gateway (BCG), then click **Dashboard (*PostalOne!*)**. Search for the job containing the postage statement, then click the **PS #** link.

1.2 Microstrategy Reports

With this release, the Microstrategy Mail Preparation and Data Quality Dashboard received a minor performance improvement to decrease the wait required before the Dashboard displays. 79670

Additionally, the piece counts are now correct in the Top Reasons for Discount Removal section of the Mail Preparation and Data Quality Dashboard. Previously, the piece counts were incorrect for this section of the report. 79728

To view the Mail Preparation and Data Quality Dashboard as a mailer, log on the BCG, then click **Mailing Reports (*PostalOne!*)**. Click **Mail Quality Reports**, then click **Shared Reports**. Click **Mail Quality Reports**, then click the report.

2. USPS (Internal)

PostalOne! Releases 27.0.0.3 was deployed to introduce software upgrades to the system. Those upgrades include corrections to issues previously identified from previous releases.

The following items are of interest to internal users of the *PostalOne!* system.

2.1. Mobile Barcode Rates

Postage calculations for statements that include Mobile Barcodes and spoilage pieces now include the correct Mobile Barcode Incentive percentages when determining postage amounts. Previously, the Mobile Barcode Incentive applied during postage calculations was incorrect. 79712

Additionally, postage statements with Mail Arrival Dates set to July 1, 2011 or August 31, 2011 now receive the correct rates for Mobile Barcode pieces. Previously, a defect did not apply Mobile Barcode rates to postage statements with Mail Arrival Dates on these two days pieces. 79555

To view postage statements as a postal employee, click **Dashboard** on the left menu bar, then search for the job. Click the **PS #** link.

2.2. Microstrategy Reports

With this release, the Microstrategy Mail Preparation and Data Quality Dashboard received a minor performance improvement to decrease the wait required before the Dashboard displays. 79670

Additionally, the piece counts are now correct in the Top Reasons for Discount Removal section of the Mail Preparation and Data Quality Dashboard. Previously, the piece counts were incorrect for this section of the report. 79728

2.3. Certification Questionnaires

Postal employees with access to BMEU Admin features now only see concurrence and override warning messages on the Certification Questionnaire page if issues exist with an override or concurrence. Previously, a defect sometimes showed these messages when no concur transactions or overrides required completion. To complete the Certification Questionnaire, click **Certification Tool** on the left menu bar. 79713

2.4. Reports

The following changes only impact postal employees using reports:

The Placard Summary Report now allows postal employees to search for a placard. Previously, some users received an "HTTP 500" error message when attempting searches. 79651

The Monthly Cancellation Report no longer includes ADDPOS (Additional Postage) permits. Previously, these permits were included in this report and in nonuse letter generation. 79686

Microstrategy verification reports now correct information for Verification Result Storage Record (VRSR) results. Previously, the Performance of Verifications, Non-Performance of Verifications, and Reasons for Non-Performance reports displayed incorrect VRSR information. 79707

To view reports, click **Reports** on the left menu bar. For Microstrategy reports, click **Verification Reports**, then navigate to the report. For all other reports, click the report name.
