

Release 27.0.2.2 Notes – Version 1

The *PostalOne!* Release 27.0.2.2 deployed on September 1, 2011 to introduce software upgrades to the system, correcting an issue that was identified. These notes provide the contents of the release.

- 1. **MAILERS (EXTERNAL)** 2
- 1.1 Mail.XML Validations..... 2

1. Mailers (External)

PostalOne! Releases 27.0.2.2. deployed September 1, 2011 to introduce software upgrades to the system. The upgrade includes a correction to the Mail.XML processing.

1.1 Mail.XML Validations

A timing issue was discovered with the OpenMailingGroupRequest response; it was not always created. The Mail.XML processing sometimes failed when the request record is not yet committed by the service layer and the system attempted to write the response to the response-staging table that is used by the service layer to respond. The Mail.XML processing software was revised to remove unnecessary dependencies and to write the response record to response staging table before the record is committed. [82605]
