  - 1.2 Mail.XML Postage Statement Processing..... 3
    - 1.2.1 Additional Postage Record..... 3

# 1. Mailers (External)

*PostalOne!* Releases 27.0.3 introduces software fixes to the system. These include corrections to issues previously identified from deployed releases. The following items are included in this release.

## 1.1 Mail.dat Postage Statement Processing

### 1.1.1 Repositionable notes

When a Mail.dat job is submitted with repositionable notes for First-Class Mail, the system shall generate Part F to enable proper accounting for repositionable notes for the PS Form 3600 First-Class Mail Postage Statement. Previously the system was failing to generate Part F, charging insufficient postage. 78844

### 1.1.2 Spoiled Pieces

The *PostalOne!* system shall accurately state the total number of spoiled pieces on the postage statement when there are multiple PAR records. Currently, the system uses the number of spoiled pieces on the last PAR record for the total, affecting the total number of spoiled pieces but not the spoiled postage or the total postage. 79947

### 1.1.3 First-Class Mail Nonmachinable Surcharge

For a Mail.dat job submission, the system shall apply line B9, B10 (Nonmachinable Surcharge) to a First-Class Mailing with Nonmachinable Letters. Currently lines B9 and B10 fail to generate, resulting in insufficient postage with no workaround for the user. A postage adjustment transaction must be applied in order to collect the postage. 80217

### 1.1.4 Bound Printed Matter Entry Discount

For Bound Printed Matter, the *PostalOne!* system shall allow CSM Entry Point for Entry Discount - Facility Type C = Origin SCF to map same as X = SCF for the container levels F = FSS Facility and E = FSS Sort Plan. 81830

### 1.1.5 FSS Periodicals Bundle Pricing and Postage Amount

The *PostalOne!* system shall use the following pricing and postage amount for FSS Periodicals:

Row 1: Line D12 maps from Package Level = X AND Container Level = (E, F)

Row 3: Line D4, D8, D12 maps from Package Level = X AND Container Level = Anything but E, F --Change maps all that was D15 to D12

Note: Row 2 uses current pricing logic and is correct.

Row 2: Line D12, D13, D14 maps from Package Level = Anything but X AND Container Level = (E, F). 81832

### 1.1.6 First-Class Mail Automation Letters MPU Weight

The rounding rule implemented on August 8, 2011 for 3.5oz First-Class Mail, Automation Letters will be removed. Any mail piece presented at 0.2188 lbs or higher will be considered a nonautomation piece. The

weight of 0.21875 lbs will not be rounded to 0.2188 lbs. 82775

### 1.1.7 First-Class Packages Not Meeting Content Standards

Until January 22, 2012, additional postage amount required for First-Class Commercial Base packages, not meeting content standards, will be charged by a separate adjustment transaction. The *PostalOne!* System will provide an adjustment reason for First-Class Commercial Base packages not meeting content standards for all entry methods. 82603

### 1.1.8 MicroStrategy Report Performance Improvement

The performance of the MicroStrategy Error Type and Error Verification reports will be improved. The reports are expected to return results in 30 seconds to a few minutes (depending on the date range). This is an improvement from the current performance of 5-10 minutes. 81838

### 1.1.9 Correct bundle pricing and postage amount for FSS Periodicals

*PostalOne!* shall use the following pricing and postage amount for FSS Periodicals:

Row 1: Line D12 maps from Package Level = X AND Container Level = (E, F)

Row 3: Line D4, D8, D12 maps from Package Level = X AND Container Level = Anything but E, F --Change maps all that was D15 to D12

Note Row 2 is current pricing logic and is correct.

Row 2: Line D12, D13, D14 maps from Package Level = Anything but X AND Container Level = (E, F). 81832

## 1.2 Mail.XML Postage Statement Processing

### 1.2.1 Additional Postage Record

For a Mail.XML message submission, when there is a combined mailing with some postage affixed pieces and some non postage-affixed pieces, the correct payer of additional postage shall be identified on the postage affixed postage statements. Currently, additional postage is charged to the incorrect payer. The total additional postage for the combined mailing is correct but attributed to the incorrect payer. 79538

**NOTE:** If you have any questions or need any assistance regarding the *PostalOne!* system please contact our *PostalOne!* Help Desk at 1 – 800 – 522 – 9085.
