

Release 28.0.2 Notes – Version 1

The *PostalOne!* Release 28.0.2 was deployed December 8, 2011 to introduce software upgrades to the system, correcting issues that have been identified.

These Release Notes provide the contents of these releases and its effect on the following areas.

1.	MAILERS (EXTERNAL)	2
1.1	Seamless Acceptance Service Performance (SASP).....	2
1.2	Manage Electronic Verification Activity (eVS).....	2

1. Mailers (External)

PostalOne! Releases 28.0.2 was deployed to introduce software upgrades to the system. Those upgrades include corrections to issues previously identified from previous releases.

The following items are of interest to external users of the *PostalOne!* system.

1.1 Seamless Acceptance Service Performance (SASP)

Copal Mail.dat Tray-Based MLOCR jobs now include the physical siblings. Previously, these jobs were missing the physical siblings of logical pallets. (88317)

1.2 Manage Electronic Verification Activity (eVS)

Users can successfully download reports containing more than 40 pages. These reports include, but are not limited to the "Unmanifested parcels from PTS and Sampling scans" report, "Mis-Shipped DDU parcels from Confirmation Services scans" report, and the "Average per Piece Charge" report. Previously, users received an error downloading reports of this size. (87350)

The eVS sampled package is now rated correctly when the user manually enters in the ZIP code during sample collection. Previously, when a non-concatenated barcode was scanned, the PIC pre-populated on the eVS IMD, but the ZIP did not. Once the user manually entered in the ZIP code, the pre-barcode indicator was switched to 'N' and the package was not rated correctly during sample reconciliation. (88600)

NOTE: If you have any questions or need any assistance regarding the *PostalOne!*® system please contact our *PostalOne!*® Help Desk at 1 – 800 – 522 – 9085.
