1.1.2.	Electronic Data Exchange	2
1.1.2.1.	Mail.dat	2
	a. Mail.dat Processing	2
	b. Mail.dat MLOCR	3
1.1.2.2.	Mail.XML	3
1.1.3.	Dashboard	3
1.1.3.1.	eDocumentation Reports	3
	a. Qualification Report	3
	b. Original Container Information Report.....	3
1.2.	eInduction (FAST)	3

1. Mailers (External)

The primary focus of *PostalOne!* Patch Release 22.0.2 is to implement the changes to Mail.dat validations and system performance.

The following items will be included in Release 22.0.2 and are of interest to external users of *PostalOne!*

1.1. Manage Mailing Activity

1.1.1. Postal Wizard

The system will be updated to allow users to enter Addressed Supplements pieces for a Combined Periodicals mailing. 50326

The system will be corrected to display the Full-Service discount line (Line C32) on a Periodicals postage statement (POS Form 3541) when entering a Periodicals mailing with automated piece selected, and a Price Category option is also selected other than Basic Automated. 50329

1.1.2. Electronic Data Exchange

The following changes apply for customers participating in electronic data exchange with the United States Postal Service (USPS):

1.1.2.1. Mail.dat

The following changes apply to customers participating in electronic data exchange using Mail.dat as a means of electronic submission:

a. Mail.dat Processing

As a reminder, with this release it is required that mailers download the latest Mail.dat software. The latest Mail.dat software is available for download from the Electronic Data Exchange page off the Business Customer Gateway.

1. Periodicals

PostalOne! will be corrected to prevent CPP postage statements from running through the finalization code twice and going to the finalized (FIN) stage instead of Finalized Pending Payment (FPP) stage. When CPP jobs are submitted and the postage statements are finalized, the statements will move to FPP stage allowing mailers to perform further advertising percentage changes. 50666

2. Uploads

PostalOne! will be modified to successfully load transportation updates during the execution of Mail.dat transportation update submissions. 52170

3. Validations

The system will be modified to ignore the validation for cancelled sibling and parent containers to be in a postage statement. 50882

PostalOne! will be modified to reject MPU Create requests and a proper XSD validation will be generated stating the Job ID contains more than 8 characters when Mail Piece Create Requests with mx:MaildatJobID containing 9 characters are submitted. 50230

PostalOne! will be modified to allow In-County pieces and copies to be different for Mail.dat Periodicals jobs. 50248

The system will make performance improvements to the processing of client side validations by removing redundant PDR - PQT referential integrity validations for pkg ID and cqt DB ID. 52152

b. Mail.dat MLOCR

1. Summary ZIP Destination Report

PostalOne! will be modified to include the proper mapping for processing category "CD" (Postcards) to allow Postcards to be included on the Summary ZIP Destination Report. 52192

2. Tray Difference Report

The system will correct the dollar amount and total postage discrepancy on the Tray Difference Report for MLOCR One Pass jobs. 52293

The system will be modified to display a message box at the end of the finalization process of the Master Statement to notify clerks to finalize the Tray Difference Report before the Master Statement for MLOCR One Pass mailings. 50242

1.1.2.2. Mail.XML

The following changes apply to customers participating in electronic data exchange using Mail.XML as a means of electronic submission:

1. Validations

PostalOne! will be modified to reject Mail Piece Create requests and a proper XSD validation will be generated stating the Job ID contains more than 8 characters when Mail Piece Create Requests with mx:MaildatJobID containing 9 characters are submitted. 50230

1.1.3. Dashboard

1.1.3.1. eDocumentation Reports

a. Qualification Report

The system will be modified to allow users to retrieve the Qualification Report successfully from the eDocumentation Summary section of the dashboard without error or timeouts. 49211

The misspelling of the rate levels in the Rate Level Detail section of the Qualification Report for Full-Service Mixed, Bound Printed Matter mailings will be corrected. "Barcoded Basic/Postnetier Route Basic Flats" will be changed to "Barcoded Basic/Postnet Carrier Route Basic Flats" and "Barcoded Full Serviceieier Route Basic Flats" will be changed to "Barcoded Full Service Carrier Route Basic Flats". 50325

PostalOne! will be modified to improve the performance and allow for a successful bundle search when searching from the Container ID link, then Bundle ID link in the container search of the Qualification Report. 50669

PostalOne! will be modified to improve the performance and allow for a successful bundle search when searching from the Container ID link, then Bundle ID link in the container search of the Qualification Report. 50669

b. Original Container Information Report

The system will be modified to allow users to retrieve the Original Container Information (OCI) Report successfully from the eDocumentation Summary section of the dashboard without error or timeouts. 50323

1.2. eInduction (FAST)

PostalOne! will be modified to accept a Drop Ship appointment using Delivery Appointment Create Request message, which includes MaildatSummary blocks, and the generated USPSSummary blocks will include

Destination Discount Indicator = "Yes". The system will fix the issue where *PostalOne!* is pulling an incorrect flag for the FAST system based upon Mail.dat summary from the *PostalOne!* database..

To improve performance in retrieving eInduction reports, the system will delete all eInduction data from the eInduction application dated prior to April 30, 2009. 50000, 50130

NOTE: If you have any questions or need any assistance regarding the *PostalOne!*® system please contact our *PostalOne!*® Help Desk at **1 – 800 – 522 – 9085**.
