

Release 23.0.0 – Notes – Version 2

Patch Release 23.0.0.1 – Notes – Version 1

The *PostalOne!* 23.0.0 Release was deployed January 4, 2010 to introduce price changes for Shipping Services. These Release Notes are to notify you of what was included in this release and how it affects the following areas. These notes have been updated from Version 1 with issues discovered during Customer Acceptance Testing (CAT) and additional items included in the release. Appendix A identifies the changes from Version 1.

Additionally, a patch to release 23.0.0 will be deployed Thursday, January 7, 2010 (Release 23.0.0.1) to remedy a performance issue that developed after the deployment Sunday. The content of the patch release is identified in Appendix B of these notes.

1.1.1.	Performance	14

1. Mailers

The primary focus of Release 23.0.0 is to implement software upgrades to the system to support Shipping Services price changes that have become effective January 4, 2010. Those upgrades include, but are not limited to, new products and services (Priority Mail Flat-Rate Padded Envelopes, Priority Mail ½ lb pricing, Priority Mail Cubic Tier pricing). We also addressed issues identified in previous Full-Service Releases.

The following items are included in *PostalOne!* Release 23.0.0 and are of interest to external users of the *PostalOne!* system.

1.1. General Information

The *PostalOne!* system was updated to implement changes to the system to support the price changes for Shipping Services. Prices and fees used are those specified in the Federal Register, Domestic Mail Manual and Ratefold (Notice 123).

The system was updated to be comparable to the hardcopy postage statement effective January 4, 2010. This includes changes to all line numbering, section ordering and formatting.

1.2. Manage Mailing Activity

1.2.1. Test Environment for Mailers (TEM)

The system has updated the Business Customer Gateway Manage Mailing Activity's View Transactions page in Mailing Reports in the Test Environment for Mailers (TEM) to deactivate the link allowing users to download the QMR Verifications to Excel. 49424

The TEM was updated enable a link "Go to TEM" added under the TEM Mail.XML group list under Business Customer Gateway (BCG) Electronic Data Exchange (EDE). This link will navigate the user to the TEM Mailer Summary view. The system also implemented a link "Verify Web Service in TEM" under the TEM Mail.XML group list. This link will provide the URL:
<https://mailxmltem.uspspostalone.com/MLXMLServicesWeb/services/POAppointmentServices/wsdl/POAppointmentServices-MailXML60.wsdl> as a pop-up. 50926

The system updated the TEM to add eDoc data Quality Test data, By/For Conflict data, additional Mail.XML users, and additional Full-Service test data (STC, ACS, CV and NIXIE). 50238

Known Issue: TEM Fallout: When entering a 3541 postage statement from PW, user was unable to enter a Mailer Agent ID for a Periodicals mailing with Addressed Supplements. 54135

Workaround: Mailers must submit a hardcopy postage statement with Addressed Supplements, enter through Postal Wizard without Addressed Supplements, or enter with publication only (no Mailer Agent ID).

Known Issue: TEM Fallout: The qualification report is only displaying Firm Bundles under the Rate Level Summary Information. It should show the rest of the Rate levels from the postage statement. The reconciliation report only shows the Firm Bundles and should show the rest of the Rate levels. 54136

Workaround: Mailers must submit hard copy Qualification Reports to allow BMEU clerks to verify.

1.2.2. Balance and Fees

The system was modified to adjust permit fee expiration in the Test Environment for Mailers (TEM) to ensure the data more closely replicates the production environment. 49114

Known Issue: Fallout: Resolution for this issue was not implemented during this release.

Workaround: This issue will be scheduled for resolution in a subsequent release.

1.2.3. Postal Wizard

The changes in the following section apply to customers participating in electronic data exchange using the Postal Wizard as a means of electronic submission:

1.2.3.1. General

The Mailer online Help was updated for changes since the last update. 50427.

The system now displays a Customer Reference ID field, edit box, and label on online views, review screens, and receipt pages for PS Form 3602, PS Form 3600, and PS 3605 for all postage payment methods. The change is included for permit types Metered, Precanceled, and OMAS (OI and OM). 51760, 51765, 51784, 51791, 50467, 50468, 50472, 50641, 50642, 50469, 50643, 50644, 50645, 50646, 50647, 50648, 51761, 51774, 51775, 51777, 51778, 50978, 50984, 50981, 50988, 50991, 51756, 50979, 50983, 50985, 50987, 50980, 50994, 50989, 50992, 51786, 51788

The system was corrected to allow users to download transactions in PDF format from Postal Wizard's View Transactions page. 50322

1.2.3.2. Data Entry

The system no longer requires the capture of the Exemption and Exclusion Legend/Proof of Filing Citation (EEL/PFC) and has removed all associated references and data entry options for this field from all International postage statements, online and downloadable (PDF, CSV, XLS) views. 50169, 50163, 60166, 50176, 50170, 50168, 50172, 50175, 50174, 50171, 50173

The system was corrected to allow users to enter information for second and subsequent postage statements of a Combined mailing after the first statement is entered and submitted. 49622

The system was corrected to filter out other Mailer or Preparer's information from the PDF download version of the Master Statement of Comail jobs. 53958

The system updated Postal Wizard to show price amounts from the new rate tables for Commercial Plus Cubic Prices by Tier selection. Users are able to change the cubic prices if CCA is checked in Account Management. Although the system checks for a maximum piece weight of 20 lbs per piece of a Priority Mail Commercial Plus Cubic price piece, if the user selects Processing Category Letters, an error message is generated. Users may select Commercial Plus and Commercial Plus Cubic. However, Commercial Base is not an option with Commercial Plus and Commercial Plus Cubic. 50283, 50466, 50296, 51837, 51839, 51841

If Commercial Plus is selected on the Permit Entry screen, the system allows Postal Wizard users to enter the new postage amounts for Commercial Plus 1/2 pound prices. 50335, 50459

Parcel Select single-piece (nonbarcoded and oversized) entry was moved to new Section G and OBMC Presort was moved to new Section F. 50196, 50197, 51998, 51999, 52000

The system was modified to send an error message if the mailing entered in Postal Wizard does not contain the minimum 200 pieces or 50 lbs of Priority Mail Commercial Plus Cubic mail, only if this is the only section entered. 51750

The system associates Account Identifier Code (AIC) 211 for Parcel Select on PS 3605 sections C, D, E, and F, and AIC 212 for Parcel Post on PS 3605 section G. Extra Services for Parcel Select and Parcel Post on PS 3605 section S is mapped to AIC 211. 54078, 54129

1.2.3.3. Price Change

The system was updated to support the Shipping Services price change effective January 4, 2010. Prices changed for Express Mail, Parcel Select – Destination Entry, and Priority Mail (Retail, Commercial Plus, and Commercial Base). Changes also include introduction of the Priority Mail Commercial Plus Flat-rate Padded Envelope, a Priority Mail Commercial Plus ½ pound price, a Priority Mail Commercial Plus Cubic Tier pricing, and changing the Priority Mail one-pound price to a zoned price. 334, 50164, 50167, 50154, 50155, 50313

The system added a section for address matching for First-Class Mail (PS Form 3600) and Standard Mail (PS Form 3602). Users are able to enter a date or select a date from a calendar dropdown for any address matching or carrier route sequencing dates that are applicable to the mailing. 51847, 51820, 51822, 51818, 51823, 51833, 51832, 51814, 51830

Parcel Post single-piece (nonbarcoded and oversized) entry was moved to new Section G and OBMC Presort was moved to new Section F. 50946, 50950, 50971

The *PostalOne!* system updated the current Part D which includes Repositional Notes and Extra Services to Part E to match the January 2010 postage statement. 50948

The system will be modified to prevent a user from entering an international postage statement with a date prior to the price change date. Users are not able to enter a domestic postage statement with a date prior to the price change date.

Note: Postal users are able to enter postage statements with old prices (previous price change prices) for up to 120 days after the implementation date. Mailers that require statements entered with a pre-price change date must present a hard copy postage statement to the BMEU for manual entry. 52403, 50156

1.2.4. Electronic Data Exchange

1.2.4.1. Mail.dat

The changes in the following section apply to customers participating in electronic data exchange using Mail.dat as a means of electronic submission:

a. Mail.dat Processing

The system was updated to support the Shipping Services price change effective January 4, 2010. Prices changed for Parcel Select – Destination Entry and Priority Mail (Commercial Base). Updates also included changing the Priority Mail one-pound price to a zoned price. 334, 50164, 50167, 50154, 50155, 50313

The *PostalOne!* system was to be modified to find the mail preparer by reading the CRID [from the Mail.dat Mailer Postage Account (MPA) file field CRID of Preparer] and finding the Company Name for the CRID and the Address for the CRID in customer registration. 50137

Known Issue: CAT Fallout: Mail.dat Preparer from MPA CRID of Preparer was not implemented.

Workaround: This issue is scheduled for resolution in a subsequent release; tentatively Release 24.0 (March 14, 2010).

Performance improvements were made to prevent internal errors from occurring during the Qualification Report generation process. 53614

b. Mail.dat Statements

The *PostalOne!* system updated the current Part D, which includes Repositional Notes and Extra Services, to Part E to match the January 2010 postage statement. 50948

The system now displays a Customer Reference ID field, edit box, and label on online views, review screens, and receipt pages for PS Form 3602, PS Form 3600, and PS 3605 for all postage payment methods. The change is included for permit types Metered, Precanceled, and OMAS (OI and OM). 51760, 51765, 51784, 51791, 50467, 50468, 50472, 50641, 50642, 50469, 50643, 50644, 50645, 50646, 50647, 50648, 51761, 51774, 51775, 51777, 51778, 50978, 50984, 50981, 50988, 50991, 51756, 50979, 50983, 50985, 50987, 50980, 50994, 50989, 50992, 51786, 51788

The system was corrected to filter out other Mailer or Preparer information from the PDF download version of the Master Statement of Comail jobs. 53958

c. Mail.dat MLOCR

1) General

The system was adjusted to load and transfer 08-2 Mail.dat MLOCR files without error. 52438

2) Postage Statement

The system was corrected to have the *precanceled* stamp postage statement receipt page (3607) display the same net postage due as the postage statement, and to deduct the same amount as shown on the postage statement. 48628

The system was adjusted to deduct the correctly rounded Net Postage Adjustment Transaction Amount from a Mail.dat First-Class Mail metered at Lowest. 53896

3) Qualification Report

The Qualification Report was modified to have the total number of pieces match the master statement total number of pieces from MLOCR jobs. 48614

4) Summary ZIP Destination Report

The Summary ZIP Destination Report was modified to display rates for a piece as the calculated postage affixed for that piece, including the Full-Service discount if applicable. This modification makes the displayed rate consistent with the Metered, Lowest Rate. The report will have a Full-Service Discount section added when a discount exists. Full-Service Pieces and Full-Service Discount columns were added to the Grand Total Summary section for all payment types when a discount exists. 52360

1.2.4.2. Mail.XML

a. Mail.XML Processing

The system updated the Electronic Data Exchange page to add/update a "Download Mail.XML WSDL files" link to http://ribbs.usps.gov/intelligentmail_guides/documents/tech_guides/xmlspec/wsdl/wsdl.htm. The link now navigates to a page on RIBBS that contains all of the available Web Services Description Language (WSDL) zip files. 49882

The title of the Full-Service Container Visibility links were changed to Full-Service Start-the-Clock located in Mailing Reports section of the Business Customer Gateway. This name change applies to all screen names and navigational links (breadcrumbs). The system removed "Change of Address (COA)" from the Full-Service ACS report link. 49999, 50131

b. Periodicals

The system corrected the issues when timestamp errors were received when a Mail.XML file is submitted to adjust the Mailing Certification Date on one of the statements in a combined Periodicals job. 54019

c. Push/Pull

The system has corrected a state code issue in COA Push messages for LA and MT. 52433

1.2.5. Dashboard

1.2.5.1. eDocumentation Reports

a. General

The system was to be updated to display the Permit/USPS Publication number for statements on the Mailer's dashboard view of corresponding jobs. 49637

Known Issue: CAT Fallout: Permit/USPS number is not displaying on the corresponding statement on the dashboard.

Workaround: This issue is scheduled for resolution in Release 24.0 (March 14, 2010).

b. Qualification Report

The system was updated to activate the nonworking and missing hyperlinks on the Qualification Report container search and allow users to navigate through the various pages of the report results. 38391

c. Register

The system will be modified to display the number of pieces and corresponding postage on the Standard Mail Register of Postage Statements so that the actual number of pieces for both piece rate and pound rate statements are accurately reflected. 48031

1.2.6. Mailing Reports

1.2.6.1. Mailing Summary Report

The system optimized the query for the Mailing Summary report to prevent timeouts when there is a large volume of data to be returned. 49866

1.3. Manage Electronic Verification Activity – eVS

The changes in the following section apply to customers participating in the electronic verification system (eVS) program:

1.3.1. eVS General

The system was modified to discontinue filtering Package Identifier Codes (PICs) with service type code "56" from the Product Tracking System (PTS) unmanifested extract report. eVS will transfer PICs from the Missing Manifest Summary to the Unmanifested Report on the 5th of the reconciliation month and will be removed from the Postage Adjustment Factor (PAF) calculation. 47909, 50142

The system corrected the Postage Adjustment Factor (PAF) flag on the eVS/PRS landing page to display as a "Y" based on PAF values for one or more mail classes. 50338

1.3.2. eVS Price Change

The system was updated to support the price change for Shipping Services for eVS and PRS for Priority Mail, Express Mail, Parcel Select, and Parcel Return Services. The system is using prices and fees as specified in the Federal Register, the Domestic Mail Manual (DMM), and the Price List (Notice 123) for eVS and PRS. 49702, 50227, 50228, 50229

eVS uses rate indicator "FE" to identify Priority Mail Flat-Rate Envelope mailpieces. 49704

The system designates Zone "LC" to represent Local Zone for Priority Mail and Express Mail parcels. 49705, 49706

The system applies the new prices and fees for postage calculation of samples collected on or after the price change date of January 4, 2010. Previous prices will apply for samples reconciled to manifests with mailing dates prior to the price change date. If a sample is missing a manifest, the postage is calculated based on prices in effect on the date of sampling. The system accepts and processes samples for Commercial Plus Flat-Rate padded Envelopes, Commercial Plus 1/2 Pound pricing, Commercial Plus Cubic pricing, and Regular/Medium Flat-Rate Box with the appropriate rate indicators. 49707, 49708, 49709, 49710

The system accepts and processes the Commercial Plus Flat-Rate Padded Envelope for mailers eligible for Commercial Plus pricing. The system charges postage at the Commercial Base Priority Mail single-piece rate using zone and weight calculations for Flat-Rate Padded Envelopes submitted by non-Commercial Plus or non-Commercial Plus Cubic mailers. Rate ingredient "FP" is used to designate the Flat-Rate Padded Envelope. 49711, 49712, 49713, 49714

The system supports and calculates the Commercial Plus Cubic price tier based on the Length multiplied by Height multiplied by width. There are five (5) tiers for pricing applicable resulting from the cubic dimension calculations. The system validates that the weight for an individual parcel claiming Cubic pricing does not exceed 20 lbs. Pieces claiming Cubic pricing for non-Commercial Plus Cubic mailers are charged postage at the Priority Mail single-piece rate for their eligible pricing tier using zone and weight calculations. 49718, 49720, 49722, 49723

1.3.3. eVS Reports

1.3.3.1. Manifest Confirmation Report

The system was modified to display the correct CAPS postage on the Manifest Confirmation Report, even in instances where the Electronic File Number (EFN) is repeated after 180 days. 50474

1.3.3.2. Package Summary Report

The Package Summary Report was corrected to show the sample weight value for all PRS samples that were moved from PRS to eVS. This includes all historic PRS samples through 11/15/2009. 50941

1.4. Manage Electronic Return Activity – PRS

The changes in the following section apply to customers participating in the Parcel Return Services (PRS) program:

1.4.1. PRS General

The system was updated to support the price change for Shipping Services for Parcel Return Services Priority Mail (Retail, Commercial and Commercial Base). The system is using prices and fees as specified in the Federal Register and the Domestic Mail Manual. 50165, 50201

The Monthly Account Summary section 1.a.b.c of the monthly summary page was corrected to display the correct postage totals for PRS mailers, not "0". 52308

1.5. OPSWeb

1.5.1. FAST

The system was modified to extend the *PostalOne!* Mail.dat recurring content threshold to five (5) days past the appointment date/time. 52104

NOTE: If you have any questions or need any assistance regarding the *PostalOne!*® system please contact our *PostalOne!*® Help Desk at **1 – 800 – 522 – 9085**.

Appendix A - Updates

Version 23.0.0 – Release Notes, Version 1 Updates

1. Change in the verb tense to reflect changes from pre-release to deployment.
2. Removed the following from section 1.2.3.1 Postal Wizard

The system was modified to allow users to remain logged in to the *PostalOne!* system when returning to the Business Customer Gateway (BCG) by clicking on the Home hyperlink after completing and submitting a postage statement. 49504

3. Removed the following from section 1.2.4.1.a Mail.dat Processing:

As a reminder, with this release it is required that mailers download the latest Mail.dat software. The latest Mail.dat software is available for download from the Electronic Data Exchange page off the Business Customer Gateway.

4. Added the following notes to sections as indicated (renumbered sections to accommodate additions):

Section	Title	Release Note
1.2.1.	TEM	The system has updated the Business Customer Gateway Manage Mailing Activity's View Transactions page in Mailing Reports in the Test Environment for Mailers (TEM) to deactivate the link allowing users to download the QMR Verifications to Excel. 49424
1.2.1.	TEM	The system was updated to have a link "Go to TEM" added under the TEM Mail.XML group list under Business Customer Gateway (BCG) Electronic Data Exchange (EDE). This link will navigate the user to the TEM Mailer Summary view. The system has also added a link "Verify Web Service in TEM" under the TEM Mail.XML group list. This link will provide the URL: https://mailxmltem.uspspostalone.com/MLXMLServicesWeb/services/POAppointmentServices/wsd/POAppointmentServices-MailXML60.wsdl as a pop-up. 50926
1.2.1.	TEM	The system updated the Test Environment for Mailers (TEM) to add eDoc data Quality Test data, By/For Conflict data, additional Mail.XML users, and additional Full-Service test data (STC, ACS, CV and NIXIE). 50238
1.2.1.	TEM	<u>Known Issue:</u> TEM Fallout: When entering a 3541 postage statement from PW, user was unable to enter a Mailer Agent ID for a Periodicals mailing with Addressed Supplements. 54135 <u>Workaround:</u> Mailers must submit a hardcopy postage statement with Addressed Supplements, enter through Postal Wizard without Addressed Supplements, or enter with publication only (no Mailer Agent ID).
1.2.1.	TEM	<u>Known Issue:</u> TEM Fallout: The qualification report is only displaying Firm Bundles under the Rate Level Summary Information. It should show the rest of the Rate levels from the postage statement. The reconciliation report only shows the Firm Bundles and should show the rest of the Rate levels. 54136 <u>Workaround:</u> Mailers must submit hard copy of the Qualification Report to allow BMEU clerks to verify
1.2.2	Balance and Fees	<u>Known Issue:</u> Fallout: Resolution for this issue was not implemented during this release. <u>Workaround:</u> This issue will be scheduled for resolution in a subsequent release.

Section	Title	Release Note
1.2.3.1. 1.2.4.1. b	Postal Wizard – General Mail.dat Statements	The system now displays a Customer Reference ID field, edit box, and label on online views, review screens, and receipt pages for PS Form 3602, PS Form 3600, and PS 3605 for all postage payment methods. The change is included for permit types Metered, Precanceled, and OMAS (OI and OM). 51760, 51765, 51784, 51791, 50467, 50468, 50472, 50641, 50642, 50469, 50643, 50644, 50645, 50646, 50647, 50648, 51761, 51774, 51775, 51777, 51778, 50978, 50984, 50981, 50988, 50991, 51756, 50979, 50983, 50985, 50987, 50980, 50994, 50989, 50992, 51786, 51788
1.2.3.1.	Postal Wizard - General	The system was corrected to allow users to download transactions in PDF format from Postal Wizard's View Transactions page. 50322
1.2.3.2	Postal Wizard – Data Entry	Parcel Select single-piece (nonbarcoded and oversized) entry was moved to new Section G and OBMC Presort was moved to new Section F. 50196, 50197, 51998, 51999, 52000
1.2.3.2. 1.2.4.1. b	Postal Wizard Data Entry Mail.dat – Statements	The system was corrected to filter out other Mailer or Preparer's information from the PDF download version of the Master Statement of Comail jobs. 53958
1.2.3.2.	Postal Wizard – Data Entry	If Commercial Plus is selected on the Permit Entry screen, the system allows Postal Wizard users to enter the new postage amounts for Commercial Plus 1/2 pound prices. 50335, 50459
1.2.3.2.	Postal Wizard – Data Entry	The system was modified to send an error message if the mailing entered in Postal Wizard does not contain the minimum 200 pieces or 50 lbs of Priority Mail Commercial Plus Cubic mail, only if this is the only section entered. 51750
1.2.3.2.	Postal Wizard – Data Entry	The system updated Postal Wizard to show price amounts from the new rate tables for Commercial Plus Cubic Prices by Tier selection. Although the system checks for a maximum piece weight of 20 lbs per piece of a Priority Mail Commercial Plus Cubic price piece, if the user selects Processing Category Letters, an error message is generated. Users may select Commercial Plus and Commercial Plus Cubic, however, Commercial Base is not an option with Commercial Plus and Commercial Plus Cubic. 50283, 50466, 50296, 51837, 51839, 51841
1.2.3.2.	Postal Wizard – Data Entry	The system associates Account Identifier Code (AIC) 211 for Parcel Select on PS 3605 sections C, D, E and F, and AIC 212 for Parcel Post on PS 3605 section G. Extra Services for Parcel Select and Parcel Post on PS 3605 section S is mapped to AIC 211. 54078, 54129
1.2.3.3. 1.2.4.1. b2	Postal Wizard – Price Change Mail.dat - Statements	The <i>PostalOne!</i> system updated the current Part D which includes Repositional Notes and Extra Services to Part E to match the January 2010 postage statement. 50948
1.2.3.3.	Postal Wizard – Price Change	The system was modified to prevent a user from entering an international postage statement with a date prior to the price change date. Users are not able to enter a domestic postage statement with a date prior to the price change date. Note: Postal users are able to enter postage statements with old prices (previous price change prices) for up to 120 days after the implementation date. Mailers that require statements entered with a pre-price change date must present a hard copy postage statement to the BMEU for manual entry. 52403, 50156
1.2.4.1 a	Mail.dat – Processing	<u>Known Issue:</u> CAT Fallout: Mail.dat Preparer from MPA CRID of Preparer was not implemented. <u>Workaround:</u> This issue is scheduled for resolution in Release 24.0 (March 14, 2010).

Section	Title	Release Note
1.2.4.1. a	Mail.dat - Processing	The <i>PostalOne!</i> system was to be modified to find the mail preparer by reading the CRID [from the Mail.dat Mailer Postage Account (MPA) file field CRID of Preparer] and finding the Company Name for the CRID and the Address for the CRID in customer registration. 50137 <u>Known Issue:</u> CAT Fallout: Mail.dat Preparer from MPA CRID of Preparer was not implemented. <u>Workaround:</u> This issue is scheduled for resolution in a subsequent release; tentatively Release 24.0 (March 14, 2010).
1.2.4.1. a	Mail.dat – Processing	Performance improvements were made to prevent internal errors from occurring during the Qualification Report generation process. 53614
1.2.4.1. c1	Mail.dat – MLOCR	The system was adjusted to load and transfer 08-2 Mail.dat MLOCR files without error. 52438
1.2.4.1. c2	Mail.dat – MLOCR	The system was adjusted to deduct the correctly rounded Net Postage Adjustment Transaction Amount from a Mail.dat First-Class Mail metered at Lowest. 53896
1.2.4.1. c2	Mail.dat – MLOCR	The system was corrected to have the <i>precanceled</i> stamp postage statement receipt page (3607) display the same net postage due as the postage statement, and to deduct the same amount as shown on the postage statement. 48628
1.2.4.1. c3	Mail.dat – Processing	The Qualification Report was modified to have the total number of pieces match the master statement total number of pieces from MLOCR jobs. 48614
1.2.4.1. c4	Mail.dat – MLOCR	The Summary ZIP Destination Report was modified to display rates for a piece as the calculated postage affixed for that piece, including the Full-Service discount if applicable. This modification makes the displayed rate consistent with the Metered, Lowest Rate. The report will have a Full-Service Discount section added when a discount exists. Full-Service Pieces and Full-Service Discount columns was added to the Grand Total Summary section for all payment types when a discount exists. 52360
1.2.4.2. b	Mail.XML – Periodicals	The system corrected the issues when timestamp errors were received when a Mail.XML file is submitted to adjust the Mailing Certification Date on one of the statements in a combined Periodicals job. 54019
1.2.4.2. c	Mail.XML – Push/Pull	The system has corrected a state code issue in COA Push messages for LA and MT. 52433
1.2.5.1	eDocumentation Reports	The system was to be updated to display the Permit/USPS Publication number for statements on the Mailer's dashboard view of corresponding jobs. 49637 <u>Known Issue:</u> CAT Fallout: Permit/USPS number is not displaying on the corresponding statement on the dashboard. <u>Workaround:</u> This issue is scheduled for resolution in Release 24.0 (March 14, 2010).
1.2.5.1	eDocumentation Reports	The system was updated to activate the nonworking and missing hyperlinks on the Qualification Report container search and allow users to navigate through the various pages of the report results. 38391
1.2.5.1	eDocumentation Reports	The system was modified to display the number of pieces and corresponding postage on the Standard Mail Register of Postage Statements so that the actual number of pieces for both piece rate and pound rate statements are accurately reflected. 48031
1.3.3.1	eVS Reports	The system was modified to display the correct CAPS postage on the Manifest Confirmation Report, even in instances where the Electronic File Number (EFN) is repeated after 180 days. 50474
1.3.3.2	eVS Reports	The Package Summary Report was corrected to show the sample weight value for all PRS samples that were moved from PRS to eVS. This includes all historic PRS samples through 11/15/2009. 50941

Section	Title	Release Note
1.4.1	PRS – General	The Monthly Account Summary section 1.a.b.c of the monthly summary page was corrected to display the correct postage totals for PRS mailers, not "0". 52308
1.5.1.	FAST	The system was modified to extend the <i>PostalOne!</i> Mail.dat recurring content threshold to five (5) days past the appointment date/time. 52104

DRAFT

Appendix B – Patch Release 23.0.0.1 Contents
