

Release 30.0.1 Notes – Version 1

The *PostalOne!* Release 30.0.1 was deployed April 15, 2012 to introduce software upgrades to the system, correcting issues that have been identified.

These Release Notes provide the contents of these releases and its effect on the following areas.

- 1. MAILERS (EXTERNAL) 2**
 - 1.1 Mail.dat 2
 - 1.2 Mail.XML 2
 - 1.3 Manage Electronic Verification Activity (eVS)..... 2
 - 1.4 Scan Based Payment..... 2
 - 1.5 Reporting..... 2

1. Mailers (External)

PostalOne! Releases 30.0.1 was deployed to introduce software upgrades to the system. Those upgrades include corrections to issues previously identified from previous releases.

The following items are of interest to external users of the *PostalOne!* system.

1.1 Mail.dat

The pre-validation requiring the system not to allow job submission when the record status is set to "N" in the .hrd has been removed and jobs will process successfully. Previously, the pre-validation error would occur and require the file removed in order for the job to submit successfully. (98379)

The charges in the *PostalOne!* system for Postage Statement 3541 for Outside County containers and bundles in Mixed Class (Periodicals and Standard Mail Flats) have been corrected. Previously, the Mixed Class (Periodical and Standard Mail) with Outside County pallets, container levels 'AE' (NDC) and 'AF' (Protected NDC) were incorrectly converted to Mixed ADC Pallet Price Levels. (94620)

1.2 Mail.XML

The performance in *PostalOne!* system for the QualificationReportDetailCreateRequest message has been updated and improved, allowing completion of qualification messages and postage statement create request submitted. (98240)

The performance in the *PostalOne!* system for the OriginalContainerLinkageCreateRequest message has been updated and improved, allowing Full Service feedback. (98212)

1.3 Manage Electronic Verification Activity (eVS)

The *PostalOne!* system accepts Parcel Select machinable mailpieces containing a routing barcode of '1' and surcharge type of 'D2.' Previously, the system rejected the rate ingredient combination as invalid. (98391)

eVS postage statements containing both Parcel Post and Parcel Select lines are successfully submitted for finalization. Previously, eVS postage statements with both Parcel Post and Parcel Select were unable to be submitted and finalized. (98382)

The carbon calculation computation contains Greenhouse Gas (GHG) for manifests. Previously, the carbon calculation was missing the computation of GHG for manifests. (95934)

1.4 Scan Based Payment

The *Monthly Account and Sampling Summary* page currently displays the correct number of samples. Previously, the summary displayed zero samples; however, the Sampling Report displayed samples. (98198)

1.5 Reporting

The *Records of Mailing Report* includes all required data. The close_date for all impacted records has been populated. Previously, the report was missing data due to records for the month of March 2012 missing a close_date. (98432)

The performance for the *Transaction History Summary Report* has been updated and improved. Previously, performance was slow and caused problems with related items. (98380)

The performance for the *Undocumented Summary Report* has been updated and improved resulting in completion of the process and capturing accurate data. Previously, performance was poor and caused incomplete processing and inaccurate data. (98516)

The *Address Quality Report* is capturing all related data to display Move Update information. Previously, the data was not populating correctly. (98366)

NOTE: If you have any questions or need any assistance regarding the *PostalOne!*® system please contact our *PostalOne!*® Help Desk at **1 – 800 – 522 – 9085**.
