 - 1.4. Domestic Postage Processing – Postal Wizard 2
 - 1.4.1. PS 3600 First-Class Mail (FCM) 2

1. Mailers (External)

PostalOne! Release 33.0.2 will deploy to introduce software fixes to the system.

1.1. Electronic Postage Processing

1.1.1. Transportation Updates for Finalized Postage Statements

Transportation Update (T) jobs will no longer freeze and reject finalized postage statements. Previously, T-Update jobs were rejected for postage statements in FPP status. Delete jobs (update jobs) were rejected for postage statements in REV status. **ETR 106965**

1.2. Mail.dat Postage Statement Processing

1.2.1. Periodicals with Multiple Standard Enclosure Mail Piece Unit (MPU) IDs

If a mailer submits a job for Periodicals with Standard Enclosures, and use multiple MPU IDs for their enclosures, the enclosures postage statement will now include postage for all MPUs. Previously, the enclosure postage statement only reflected one of those MPU IDs. Other enclosure MPUs were included in the periodical statement. **ETR 108401**

1.2.2. Internal Error – Validation of Job Claiming Incentives / Non-numeric Component IDs

Mail.dat mailings claiming incentives can now be processed with non-numeric Component (CPT) IDs. An internal error prevented the Mail.dat job from loading for First-Class Mail and Standard Mail combined mailings which have the mobile barcode incentive and use alpha characters in the Component (CPT) ID. **ETR 110636**

1.3. Mail.XML Validations

1.3.1. First-Class Commercial Price Type – Single Piece Letters and Postcards

First-Class postage statement can now be processed when claiming Commercial Price Type Single Piece with Postcards (CD) at line level and Letters (LT) at postage level. During postage submission, Error Code 8809 was triggered for a First-Class job claiming Commercial Price Type Single Piece Postcards denoted at the line level and Letters denoted at the postage level. The error only occurred when the letters and cards were both marked as Commercial Price Type and the statement line level was cards, but the statement level was letters. **ETR 111058**

1.4. Domestic Postage Processing – Postal Wizard

1.4.1. PS 3600 First-Class Mail (FCM)

Non-identical mailings will now be processed when lines B4 and B5 are used. Previously, an error prevented in Postage Statement Wizard from processing the PS 3600 First-Class Mail (FCM) single piece non-identical mailing when line B4 and B5 were used together. **ETR 110789**
