

Patch Release 40.0.2.0

The *PostalOne!* system Patch Release 40.0.2.0 is to be deployed February 5, 2015 to introduce software fixes to the system. This includes a correction to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems. Contents of this document are subject to change.

- 1. ALL USERS 1**
 - 1.1 Domestic Postage Processing 1
 - 1.2 Electronic Data Exchange 1
 - 1.3 Reports 1
 - 1.4 Value Added Refund (VAR) 1
- 2. MAILERS 1**
 - 2.1 Business Reply Mail (BRM) 1

1. All Users

1.1 Domestic Postage Processing

Value Added Refund (VAR) has been updated to include First-Class postcard transactions. [6206](#)

1.2 Electronic Data Exchange

Performance has been improved for updating or adding container content data on Mail.dat submissions for non-Periodical postage statements. [6289 \[B\]](#)

1.3 Reports

The Container Management Search Report has been updated to restore the container search functionality. A defect introduced in the January 25, 2015 release prevented the Container Management Search Report from returning any results when users attempted to search for containers via the Job ID, Pallet ID, or Appointment Number. The containers in question were shown on the Shipping Summary Report, which could be used as a workaround to view the containers. [6262 \[B\]](#)

1.4 Value Added Refund (VAR)

VAR processing has been updated to properly account for all exception scenarios, enabling VAR transactions for combined postage statements to successfully complete. Prior to this release, some VAR transactions for Combined statements incorrectly generated a database error caused by the failure to account for valid scenarios where multiple permits may be associated with a postage statement (e.g., one active permit and one inactive permit). [6311](#)

VAR Refunds can now be consistently processed successfully. Prior to this release, a defect incorrectly set the Reference Transaction Number to zero for some VAR refund transactions. As a result, clerks were prevented from completing the required second employee concurrence, which delayed refunds for the affected customers. [6293 \[B\]](#)

Note: Special Postage Payment System mailing which result in a VAR should not be finalized on the Self Service Terminal (SST)

2. Mailers

2.1 Business Reply Mail (BRM)

Users are able to successfully view Business Reply Mail (BRM) invoices through the Business Customer Gateway (BCG). Previously, a defect resulting from a missing data element incorrectly generated an error when users attempted to view BRM invoices through the BCG. [6263 \[E\]](#)
