1. External Trouble Reports (ETRs) and Engineering Change Requests (ECRs)

1.1 Mail.dat

The Mail.dat validations that check the referential integrity between original and update submissions have been disabled. This includes errors (4688) CQT - CQT Database ID, (4689) PQT - CQT Database ID, Package ID, (4691) PDR - Piece ID. This is correcting a performance issue which impacts large Mail.dat update submissions and was introduced with Release 41.0.0 on May 17, 2015. [7365 {B}](#)

1.2 Returned Services for Parcels

The Annual renewal of the Returns Fee for newly converted Return Services Permits must renew according to the last payment date of the original BR/MR permit rather than requiring fees to be paid at the time the new Returns Services Permit is created (i.e. May 31, 2015). [7366 {B}](#)
