

Patch Release Notes 41.0.6.0

The *PostalOne!* system Patch Release 41.0.6.0 is being deployed June 10, 2015 to introduce software fixes to the system. This includes corrections to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems.

Contents of this document are subject to change.

1. EXTERNAL TROUBLE REPORTS (ETRS) AND ENGINEERING CHANGE REQUESTS (ECRS)	2
1.1 Full Service MicroStrategy Reports	2

1. External Trouble Reports (ETRs) and Engineering Change Requests (ECRs)

1.1 Full Service MicroStrategy Reports

- The MicroStrategy Barcode Scan Rate Report has been updated to handle the scenario when SASP is unable to determine the facility in which a given barcode scan took place. Previously, when SASP could not make this determination, the scan was attributed to an unknown facility on the Mailer Scorecard, but was not included on the Barcode Scan Rate Report. Scan data associated with an unknown facility is now reported on the Barcode Scan Rate Report under an unknown area/district. This was a display issue only and did not affect postage. [7195 {B}](#)
- The MicroStrategy Postage Assessment Summary Report has been updated to properly reflect the data for “# Seamless Acceptance Jobs - Assessment Eligible”. Prior to this release, a defect in the Postage Assessment Summary Report resulted in the column displaying as blank, even though the number of Seamless Acceptance jobs that were assessment eligible was available in the MicroStrategy database. [7373 {B}](#)
- A logic defect in the update of data tables used for MicroStrategy scorecard reporting has been corrected. The issue occurred when one job segment had Change of Address (COA) errors across multiple mail owners. Multiple records were created under that scenario; however, the oldest record from the batch was deleted, causing the number of COA Errors reported on the eDoc Submitter Scorecard to potentially be deflated. The issue did not affect the Mail Owner Scorecard or other MicroStrategy reports. [7398 {B}](#)
- The eDoc Submitter Scorecard Mailer Profile tab has been updated to enable the Mail Service Provider (MSP) flag to properly reflect the current status. Prior to this release, the MSP flag on the eDoc Submitter Scorecard Mailer Profile tab failed to display the updated status in cases where the indicator had been updated. This was a display issue only and did not affect postage. [7364 {E}](#)
