

Release Notes 41.1.3.0

The *PostalOne!* system Release 41.1.3.0 was deployed July 16, 2015 to introduce software fixes to the system. This includes corrections to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems.

Contents of this document are subject to change.

- 1. EXTERNAL TROUBLE REPORTS (ETRS) AND ENGINEERING CHANGE REQUESTS (ECRS) 2**
 - 1.1 eInduction 2
 - 1.2 Mail.dat 2
 - 1.3 MicroStrategy Reports 2
 - 1.4 Return Services 2

1. External Trouble Reports (ETRs) and Engineering Change Requests (ECRs)

1.1 eInduction

- The eInduction process has been updated to eliminate an issue that previously resulted in excess misshipped errors under certain conditions. The issue occurred when an eInduction container was accepted at a non-Surface Visibility (SV) facility using an Intelligent Mail® Data Acquisition System (IMDAS) scanner, then cross-docked to an SV-enabled facility via USPS transportation, where it was scanned again. If the second scanning facility was not a valid entry location for the container, as determined by the Mail Direction File (MDF), the container was incorrectly categorized as misshipped. To alleviate this issue, the eInduction logic has been updated to use a Mail Shipment Indicator setting of “MS” (Mailer Shipment) to enable the process to ignore the container scan from the second scanning facility in this scenario. [7527 {B}](#)
- eInduction processing has been updated to bypass validation for E4P (Entry Point Discount (EPD)), E13P (Non-numeric Zone), and E29P (Misshipped) in the scenario when a locale key returned from SV does not match a locale key in the MDF. Prior to this release, validation errors were incorrectly generated for EPD, Non-numeric Zone, and/or Misshipped containers when the SV locale key was not found in the MDF. [7540 {B}](#)

1.2 Mail.dat

A Mail.dat performance issue has been corrected, which previously caused a number of job submissions to be stuck “In Progress” and unable to complete. With this release, alleviation of the performance issue also allows the affected Mail.dat jobs to complete processing. [7600 {B}](#)

1.3 MicroStrategy Reports

The Mailer Scorecard has been updated to exclude non-eInduction containers that were marked as finalized when counting the number of undocumented containers. The “# of eInduction Undocumented Containers” count shown on the Mailer Scorecard previously included non- eInduction containers that had been finalized, however those containers should not have counted toward the undocumented total. [7598 {B}](#)

1.4 Return Services

Return Services supports commercial base pricing for First-Class Mail Parcels weighing 1-13 oz. in both the Postage Assessment Module (PAM) and non-PAM processes. In accordance with Notice 123, the single-piece prices are listed below. [7591 {B}](#)

Weight Not Over	Single-Piece Price
1 oz.	\$2.04
2 oz.	\$2.04
3 oz.	\$2.04
4 oz.	\$2.13
5 oz.	\$2.22
6 oz.	\$2.35
7 oz.	\$2.53
8 oz.	\$2.71
9 oz.	\$2.89
10 oz.	\$3.07
11 oz.	\$3.25
12 oz.	\$3.44
13 oz.	\$3.63
