

# ***PostalOne!* Release Notes**

## **R43.0.0.0**

### **March/April 2016**

**Version 1**  
**February 25, 2016**

*Absent Congressional or Court action to make the existing exigent surcharge for Market Dominant products and services part of the rate base or to otherwise extend it, the Postal Service™ will be providing notice to the Postal Regulatory Commission of the adjusted prices that are posted on Postal Explorer® at [pe.usps.com](http://pe.usps.com). The Postal Service intends to provide such notice of the adjusted prices to the Commission 45 days before it is anticipated that the exigent surcharge revenue target will be reached.*

The Release Numbers for the next release are:

43.0.0.0 for *PostalOne!*®

33.0.0.0 for FAST

16.0.0.0 for Program Registration

# 1. Summary of R43.0.0.0

Absent Congressional or Court action to make the existing exigent surcharge for Market Dominant products and services part of the rate base or to otherwise extend it, the Postal Service™ will be providing notice to the Postal Regulatory Commission of the adjusted prices that are posted on Postal Explorer® at [pe.usps.com](http://pe.usps.com). The Postal Service intends to provide such notice of the adjusted prices to the Commission 45 days before it is anticipated that the exigent surcharge revenue target will be reached.

There are no structural changes required, only price cell changes. The Mailing Services (Market Dominant) classes that are subject to price changes include First-Class Mail, Periodicals, Standard Mail, Package Services, and First-Class Mail International. Mailing Services prices for Extra Services and Annual Permit Fees are also subject to change.

Please note that only those price cells which contain prices will change on the relevant statements. No new prices will be added if the price cells are currently blank. The prices that are changing on the Postage Statements are highlighted in yellow in the Excel price files posted on [Postal Explorer](#) under “Spring 2016 Rollback Pricing Files”.

Also identified are USPS products or programs that would require *PostalOne!* system enhancements. These items are not associated with the potential Market Dominant price cell changes.

This document describes changes for release 43.0.0.0 to be deployed (To Be Determined).

## 1.1 Applicable Technical Specifications

This table identifies which Mail.dat and Mail.XML versions are supported for R43.0.0.0.

	Mail.dat	Mail.XML (eDoc)	Data Distribution	Profiles (MID-CRID)	FAST	Shipping Services/eVS
<b>Supported</b>	All 14-2, errata versions including 14.2.1.8 All 15-1, errata versions including 15.1.0.4	16.0, 17.0	12.0A, 12.0B, 14.0A, 16.0	12.0A, 12.0B, 14.0A, 16.0	12.0A, 12.0B, 14.0A, 16.0	1.4, 1.6, 1.7, 2.0
<b>Discontinued</b>	none	none	none	none	none	none

## 1.2 Mail.dat Client Requirements

Please note the following regarding the Mail.dat client download.

Mail.dat client	Status
43.0.0.0 PROD	Download required. All older versions will expire.

## 1.3 Padding Oracle on Downgraded Legacy Encryption (POODLE)

In efforts to remediate Padding Oracle on Downgraded Legacy Encryption (POODLE) vulnerability (see US Computer Emergency Readiness Team a.k.a. US-CERT report [SSL 3.0 Protocol Vulnerability and POODLE Attack](#)), the *PostalOne!* system and Mail.dat will be disabling Secure Socket Layer version 3 (SSLv3) and only allow Transport Layer Security (TLS) web protocols. CAT, PREPROD and TEM have been updated to disable SSLv3. All Mail.dat customers are encouraged to test and verify *PostalOne!* transactions and Mail.dat Client communications in the TLS environments at each of their Mail.dat client sites using their current proxy server

## 2. Pricing Updates

### 2.1 Price Changes to Domestic Mail by Mail Class

#### 2.1.1 First-Class Mail

To support the First-Class Mail (FCM) price changes, the USPS potentially will institute price cell changes in PS Form 3600-FCM.

#### 2.1.2 Standard Mail (Regular and Nonprofit)

To support the Standard Mail Regular and Nonprofit price changes, the USPS potentially will institute price cell changes in PS Form 3602-R and PS Form 3602-N.

#### 2.1.3 Periodicals

To support the Periodicals price changes, the USPS potentially will institute price cell changes in the PS Form 3541.

#### 2.1.4 Package Services

To support the Bound Printed Matter, Library Mail Media Mail, and Alaska Bypass price changes, the USPS potentially will institute price cell changes for Package Services.

#### 2.1.5 Domestic Extra Services

Potential changes to Extra Services fees for First-Class Mail, Standard Mail, Library Mail, Media Mail and Bound Printed Matter include:

- Certificate of Mailing
- Collect on Delivery (COD)
- Insurance
- Insurance Restricted Delivery
- Registered Mail
- Registered Mail Restricted Delivery
- Registered Mail COD
- Signature Confirmation Restricted Delivery
- Return Receipt (Form 3811)
- Certified Mail
- USPS Tracking - Standard Mail Parcels Electronic
- Certified Mail Restricted Delivery
- Certified Mail Adult Signature Required
- Certified Mail Adult Signature Restricted Delivery
- Signature Confirmation
- Adult Signature Required
- Adult Signature Restricted Delivery
- Certificate of Bulk Mailing (Form 3606-D)
- Return Receipt for Merchandise

#### 2.1.6 Other Domestic Services

Other Domestic Services prices potentially will change, including:

- Address Correction Service
  - Manual address correction notices
  - Other than First-Class Mail (includes notices provided after 60 days for Periodicals full-service pieces and notices provided after 30 days for Standard Mail and BPM full-service flats)
  - Standard Mail letters (per additional notice) (includes third and subsequent additional notices after 30 days for Standard Mail full-service letters)
- Per piece forwarding fee (when service is provided in conjunction with ACS and applicable ancillary service endorsements):
  - Forwarded Standard Mail, Letter
  - Forwarded Standard Mail, Flat
- Business Reply Mail per piece price
  - Qualified Business Reply Mail
- Caller Service and Reserve Number
- Post Office Boxes for Market Dominant Sizes 1-5, will also see a change.
  - Customer Initiated Lock Replacement
- Parcel Airlift
- Address Management Systems (AMS) Products

#### 2.1.7 Price Change Updates to Submission Methods

- Price changes will be implemented for all postage statement submission methods including the following:
  - *PostalOne!* System for Mail.dat and Mail.XML
  - *PostalOne!* System for Business Mail Entry for Hard Copy postage statement submissions

- Program Registration
- Electronic Verification System (eVS)
- Scan Based Payment (SBP)
- Manifest Mailing System (MMS)
- Postage Statement Wizard
- Self-Service Terminal
- Intelligent Mail Small Business (IMSB)
- Mailings submitted before the Price Change date will reflect the exigent pricing:

## **2.2 Price Changes to International Mail by Product**

### **2.2.1 First-Class Mail International**

To support the First-Class Mail International (FCMI) Letters, Cards and Flats price changes, the USPS potentially will institute price cell changes in the PS Form 3700.

### **2.2.2 International Extra Services**

Potential changes to International Extra Services fees will include:

- Customs Clearance and Delivery Fee (First-Class Mail International only)
- International Business Reply, Card
- International Business Reply, Envelope (up to 2 ounces)
- International Certificate of Mailing
- International Registered Mail (First-Class Mail International only)
- International Return Receipt (First-Class Mail International only)

## **2.3 Mailing Fees**

Annual Permit and Annual Account Maintenance fees potentially will also change.

### 3. Enhancements and New Functionality

#### 3.1 *PostalOne!* Enhancements

##### 3.1.1 *PostalOne!* System Enhancements to Support Mail Entry Initiatives

The Shipping Summary Report will be enhanced to allow Mail Owners to receive information about their mailings. Mail Owners will be identified using the established By/For Order of Precedence. The report will display data or counts only for the specific Mail Owner or Mail Preparer viewing the report. This report will provide capability to identify pre-induction and post-induction errors for pallets that are part of the eInduction program. The table below lists the post-induction errors that are displayed as part of the Shipping Summary Report

Pre- Induction and Post-Induction Errors	Error Codes Displayed on Report
Appointment validation.	AV
Duplicate Barcode responsible for container hold.	BD
Invalid Barcode responsible for container hold.	BI
Missing Barcode responsible for container hold.	BM
Scan duplicate Barcode responsible for container hold.	D
Container cleared for release.	C
Entry point discount claimed does not match entry point scheduled.	EPD
No payment on record.	P
Payment not finalized.	PF
Scheduling issue responsible for container hold.	S
Verification issue responsible for zone validation.	Z
Verification issue responsible for USPS Transporting.	TR
Verification issue responsible for labeling validation.	LB
Verification issue responsible for container manifest validation.	CM
Verification issue responsible for container manifest postage validation.	CMP
Validation Error.	E
Post-Induction Payment validation failure.	PP
Post-Induction Duplicate Barcode validation failure.	PBD
Post-Induction Undocumented Container.	PU
Post-Induction Entry point Discount validation failure.	PEPD
Post-Induction Zone validation failure.	PZ
Post-Induction Misshipped validation failure.	PM
The deepest entry discount claimed at the piece level is greater than the entry discount claimed at the container level.	DDC
An entry discount has been claimed on a USPS Pickup container.	EDU

##### 3.1.2 Support for the 2016 Mailing Promotions

Changes will be made to the *PostalOne!* system to reflect the Emerging and Advanced Technology/Video in Print Promotion and 2016 Earned Value Reply Mail Promotion.

###### 1.1.1.1 A/B Testing

This year's 2016 "Emerging and Advanced Technology/Video in Print Promotion" allows participants to opt-in to use "A/B Testing" during the enrollment. Participants who opt-in to participate in A/B testing and who submit electronic postage statements using Mail.dat and Mail.XML must continue to use the Characteristic Incentive code "ME" (Emerging Mobile Technology). In doing so, the mailing will receive the 2% discount at the time of mailing for the qualifying A pieces. The A and B pieces are required to be reported on separate postage statements, using the existing postage statement generation variables. Since B pieces will not meet the requirements of the Emerging and Advanced Technology/Video in Print Promotion, they will not receive the 2% (Emerging Mobile Technology) discount at time of mailing but may later qualify for A/B credits. To indicate that the mailing is participating in the Emerging and Advanced Technology/Video in Print Promotion and A/B Testing option, the Characteristic Content code of "0X" (A/B Testing Content) must always be used and reported in the Mail.dat Characteristic field or Mail.XML message. In order to earn the credit amount mailers are required to submit their A/B testing results along with sample A/B test pieces to the Program Office. Program office reviews the applications and approves them for credit amount assignments to the registered Permits. To redeem A/B credits approved by the Program Office, mailers then must

use the Characteristic Incentive code of “MT” (Mailer Type); the permit number (selected during enrollment for the A/B Credit to accrue), must be in the Permit Holder field of the electronic postage statement.

**Note:** The A/B promotion can be redeemed in a job that also has A/B test content in it. For example, a job can participate in AB Testing with ME incentive, 0X Content and also redeem MT amount (already accrued) to pay for the mailing.

**Note:** If design “B” comprises of more than 10% of the mail volume then only 10% of the mailing will be considered for the credit.

**Note:** “A” pieces on a Postage Statement are identified by Mail Characteristic values of “ME” (Emerging Mobile Technology) and “0X” (A/B Testing Content). B pieces on a Postage Statement are identified by Mail Characteristic value of “0X” (A/B Testing Content). The table below lists the eDoc (Mail.dat and Mail.XML) data elements currently used to identify various types of promotions.

Promotion/Incentive	Mail Class	Mail.dat CPT.CCR and Mail.XML Incentive Characteristic	Discount
Earned Value	FCM, STD	RR (Incentive)	Credit
Personalized Color Transpromo	FCM	CP (Incentive)	2%
Tactile, Sensory & Interactive Mailpiece Engagement	STD	SS (Incentive)	2%
Mobile Shopping	STD	MI (Incentive)	2%
Emerging & Advanced Technology/Video in Print	FCM, STD	ME (Incentive)	2%
A/B Testing Credit Redemption	FCM, STD	MT (Incentive)	Credit
Emerging & Advanced Technology with A/B Testing Content/Participation	FCM, STD	0X (Content) + ME (Incentive) for A statement 0X (Content) for B statement ME for Potential Credit for B statement  0X (Content) + ME (Incentive) for A statement + 0X (Content) for B statement + MT Credit for B statement	2% for ME Potential Credit for B statement

### 3.1.2.1 Earned Value Reply Mail Promotion

This year’s 2016 Earned Value Reply Mail Promotion will build on the success of the Earned Value Reply Mail Promotion in prior years. Mailers who satisfy the promotion requirements will receive a two-cent postage credit for each qualifying Business Reply Mail (BRM) and Courtesy Reply Mail (CRM) piece that is returned to the mailer during the promotion period. Mailers that participated in 2015’s Earned Value Reply Mail Promotion and either meet or increase their volume of qualifying BRM and/or CRM pieces in 2016 will receive an additional cent (three cents total) for each returned BRM and CRM piece. Interested mailers must enroll in the 2016 Earned Value Reply Mail Promotion to qualify. For more information: see [Promotions & Incentive Programs for First-Class Mail & Standard Mail](#). Unused credits earned will expire December 31, 2016. No new technical requirements are expected by Mail.dat and Mail.XML postage statement submissions. However, if a mailer has earned both an A/B Credit and Earned Value Credit, the Mail.dat and Mail.XML Characteristics of MT and RR can be claimed for the qualifying mailing. The *PostalOne!* System will apply, in this order, the A/B Credit then the Earned Value Credit.

### 3.1.3 Excel (.xls) Mailing Report Enhancement

The downloadable MS Excel (XLS) version of the Mailing Report will be updated to be consistent with the PDF version. The downloadable XLS version of the Mailing Report now includes the additional information that exists on the downloadable PDF version, as shown below.

- Form Number (3600, 3602R, etc.)
- Processed by
- Origin
- Account Holder CRID
- Mail Owner Information
- Mail Owner CRID
- Post Office of Mailing
- Processing Category
- Federal Agency Cost Code

- Statement Seq No
- No. & Type of Containers
- SSF Transaction #
- For Mailing Enclosed with Another Class
- For Automation Rate Pieces, Enter Date of Address Matching and Coding
- For Pieces Bearing a Simplified Address Enter Date of Delivery Statistics file for Alternative Method
- Move Update Method
- Political Mailing Indicator
- Official Election Mail Indicator
- Part Completed
- Rate at Which Postage Affixed
- Postage Affixed pcs and amount
- Net Postage Due
- Incentive/Discount Claimed
- A/B Testing
- Type of Fee
- Line Level Entry and Price Category 5950 {B}

## 3.2 Facility Access and Shipment Tracking (FAST) Enhancements

### 3.2.1 Improvement of FAST Appointment Procedure Allows for rescheduling FAST Appointments

- New appointment rescheduling procedure – rescheduling can occur any time before and 72 hours after the appointment, using the FAST online application or FAST Mail.XML appointment update messages. Updates can be made to content of the appointment up to one hour before the appointment.

***Note:** Content changes to an appointment can take place only up to 1 hour prior to the appointment time; Content changes are not allowed during this extended rescheduling period.*

- Rescheduling information updates – information from initial appointment can be re-used for rescheduled appointment. CR457 {B}

## 4. Corrections to Known Issues

### 4.1 Balance and Fees

The permit location will no longer be displayed in the Fees section of the *PostalOne!* System Balance and Fees page for BMEU and Business Customer Gateway (BCG) users. Prior to this release, the location field continued to be displayed on the Balance and Fees page, even though it was only relevant for Business Reply and Return Services permits. In addition, some permits were incorrectly displayed an Official Mail Accounting System (OMAS) location even though the permit was actually a non-government permit type. [3460 {B}](#)

### 4.2 Business Reply Mail (BRM) / Return Services

An issue will be resolved that previously resulted in users receiving a blank page in the *PostalOne!* System Business Reply Mail module. The issue occurred on the BRM Mail Type page following the user's selection and submission of information on the page. This was a display issue and did not result in any lost data. [8954 {B}](#)

### 4.3 Customer Assistance

The *PostalOne!* System will be updated to correctly display the company name and company address on the Customer Assistance page and the Business Reply / Merchandise Return Fees and Invoicing page. Previously, a defect in data retrieval led to the company name and company address being incorrectly displayed on these pages in cases where the associated permit was linked to an external location with a different company name and address. [8733 {B}](#)

### 4.4 Dashboards

- The Mail Owner Report will be updated to eliminate an error that occurred when users attempted to access the report link from the *PostalOne!* System Dashboard Job Information Summary. The error prevented data from being displayed for the report. [8294 {B}](#)
- The *PostalOne!* System Dashboard Job Detail page will be updated to accurately reflect the Mailing Complete Percentage for consolidated Periodicals (PE) postage statements. The Mailing Complete Percentage represents the total number of Finalized (FIN) status pieces divided by the total number of pieces that are not in EST, CAN, or REV status. Prior to this release, a defect incorrectly included counts from consolidated PE statements in Finalized Pending Payment (FPP) status in addition to counting the pieces from statements in FIN status. As a result, the Mailing Complete Percentage was understated by the number of copies in FPP status postage statements. [8468 {B}](#)
- An issue will be resolved that results in an incorrect piece weight being displayed on the postage statement receipt and placard under certain conditions. The issue occurred when a clerk changed the piece weight during postage statement entry. A defect then allowed an incorrect piece weight to be displayed on the postage statement receipt and placard instead of the Mailer-Declared Unit Weight as it should have been. This was a display issue only and did not affect postage. [8828 {B}](#)
- A display issue will be corrected on the PDF download of a combined Standard Mail (PS Form 3602) Flats postage statement submitted via Mail.dat or Mail.XML. The correction enables the total postage displayed on the PDF download to match the total postage amount shown on the BMEU and Business Customer Gateway (BCG) Dashboard for these statements. Prior to this release, the PDF Download of a combined Standard Mail Flats statement incorrectly displayed the total postage amount truncated to two decimal places instead of rounded. This was a display issue only and did not affect the postage charged to the customer. [8793 {B}](#)

### 4.5 eInduction

An issue will be resolved that resulted in outdated Facilities Access and Shipment Tracking (FAST) appointments being incorrectly associated to eInduction container barcodes on the Shipping Summary Report. The issue occurred when container barcodes that were reused within the *PostalOne!* System, were associated to an older FAST appointment. Appointments are linked to containers using the following order of precedence: via the scan (scheduled or unscheduled) associated to the container, via a FAST appointment, or via the appointment ID within the eDoc. If the container was awaiting a scan, and a new appointment did not exist for the barcode, then the existing FAST appointment was used. This was a display issue only and did not affect postage. As a workaround, the user could wait for the scan. The Surface Visibility (SV) site with the scheduled or unscheduled appointment will override the incorrect FAST appointment association. [8362 {B}](#)

## 4.6 Electronic Data Exchange

- The Informed Visibility Report on the Data Distribution Dashboard will no longer generate duplicate rows in the listing for users who are associated with multiple Customer Registration IDs (CRIDs). Prior to this release, the Informed Visibility Report incorrectly generated duplicate rows for users with multiple CRIDs assigned (i.e., two rows for each unique record). Since the report is used for container tracking purposes and does not provide aggregate counts, the duplicate rows could be ignored. [7241 {B}](#)
- Mail.dat and Mail.XML postage statement processing will be updated to handle statements in Rework (REW) status. This enables the mailer to send an update mailing job, setting the Container Status to Ready to Pay. A corrected postage statement is then generated for finalization. [8507 {B}](#)
- Mail.dat reporting logic will be updated to suppress the generation of additional Qualification Reports for bundle-based co-palletized update jobs when a Qualification Report has already been created for the original Mail.dat mailing submission. Prior to this release, the process did not check for the existence of a Qualification Report for the original Mail.dat bundle-based co-palletized mailing submission before creating additional Qualification Reports for each successive update job. As a result, data (e.g., total pieces, total weight, etc.) was inflated on the Qualification Reports for which a bundle-based co-palletized update had been submitted. [8542 {B}](#)
- The Data Distribution Dashboard will be updated to accurately reflect the number of Full-Service ACS Change of Address (COA) Report records and the number of Full-Service ACS Nixie Report records available for download on the summary page. Prior to this release, the number of COA/NIXIE records available for download shown on the Data Distribution Dashboard for the date range did not match the number of records actually downloaded for that range. This was the result of a logic defect in storage of the report data with regard to the timestamp date the data was recorded in the database. [6548 {B}](#)
- Mail.dat performance will be improved for the upload of large consolidated Periodicals (PE) mailing jobs (i.e., those that produce more than 3,000 consolidated postage statements). [7659 {B}](#)
- Calculation of container postage for Carrier Route, 5-digit Carrier Route, and 5-digit pallets, sacks, and trays on Periodicals submitted by Mail.dat will now correctly exclude charges for containers with both In-County and Outside-County mail pieces, as stated in DMM Section 207.2.1.9. [8817 {B}](#)
- Container counts will now properly reflect on the postage statement header for Mail.dat statements in status Estimated Postage (EST) or Ready to Pay. Prior to this release, a defect prevented the container counts from displaying on the header for Mail.dat statements with EST status, and incorrectly multiplied the container counts for Mail.dat statements in Ready to Pay status. [8834 {B}](#)
- Mail.dat processing will be updated to generate a receipt only for the master postage statement in cases where the master statement is cancelled. Previously, receipts were generated for both master and child statement results when the master statement was cancelled. [8838 {B}](#)
- Mail.dat postage statement processing will be updated to correct an issue that affected Full-Service mailings submitted by Mail.dat that were eligible for a Negotiated Service Agreement (NSA) rate. Previously, Mail.dat processing incorrectly doubled the Full-Service Discount for mailings that included a mix of statements where some permits were associated with an NSA rate and some permits were not. As a result of the issue, the postage was understated for the affected statements and will be assessed. [8874 {B}](#)
- The *PostalOne!* System will be updated to allow mailers to identify a Standard Mail Non-profit parcel in their Mail.dat .mpu file by using Standard Parcel Type = F (“Not a Marketing Parcel”). The .mpu Standard Parcel Type “F” maps to Section I on the Non-profit Standard Mail postage statement (PS Form 3602-N). [7804 {B}](#)
- Mail.dat validation will be updated to allow the scenario where a Mail.dat MLOCR mailing has physical co-palletized trays linked to physical overflow siblings. Previously, this scenario failed validation 3635 with the message “[3635] - Referential Integrity Error: A physical container cannot be a referenced as a sibling by another container. The value provided was {1}”. Mail.dat validation error code 3635 will be updated to check that the .hdr Presentation Category is set to “M” and if so, to allow Mail.dat MLOCR mailing submissions that have a physical container referenced as a sibling. [7816 {B}](#)
- Mail.dat validation will be updated to properly handle validation for mailing submissions that include an adjustment for spoilage or shortage mailpieces. Prior to this release, the validation message 4564 incorrectly cited an incentive which did not exist for the mailing submission and directed the mailer to edit the .par Adjustment Amount based on the non-existent incentive. The description for informational message 4564 is: “The .par file submitted with Adjustment Type = 3 (Spoilage) or 4 (Shortage) has adjusted a postage statement with an incentive; the incentive amount on spoiled pieces should be deducted from the .par Adjustment Amount”. The action for message 4564 is “Deduct the incentive amount from the .par Adjustment Amount if the Adjustment Type = 3 (Spoilage) or 4 (Shortage) and the piece received an incentive”. [8296 {B}](#)
- A display issue will be corrected for tray-based co-palletized mailing jobs submitted via Mail.XML. The issue resulted in error code 0001 being incorrectly displayed, even though the postage statement extract was created and sent to Seamless Acceptance and Service Performance (SASP) within the allotted timeframe. The error code that was incorrectly generated was “After finalization, *PostalOne!* did not notify SASP of finalized postage statement x because finalization occurred more than 30 days after the Postage Statement Mailing Date.” [8661 {B}](#)

- Mail owner volume metrics will be correctly reflected in the Mail Owner tab of the Mailer Scorecard for Mail.XML combined mailings. Previously, a defect incorrectly reported the mail owner's Customer Registration ID (CRID) as null (blank) for combined mailings submitted by Mail.XML. As a result, the volume for the mail owner could be missing from the Mailer Scorecard Mail Owner tab. [8906 {B}](#)

#### 4.7 Electronic Verification System (eVS)

eVS processing will be updated to correctly handle Parcel Select Lightweight (PSLW) parcels with misshipped or presort errors. PSLW parcels between 13 oz. and 15.999 oz. are now correctly priced as First-Class Package Service mail pieces. Previously, a related change implemented in the January 17, 2016 *PostalOne!* System release resulted in eVS incorrectly pricing PSLW pieces that had misshipped or presort errors as Priority Mail instead of First-Class Package Service. [8922 {B}](#)

#### 4.8 Fee Transactions

Fee waiver functionality will be updated to correctly reset the waiver cycle at the end of the one-year period. Previously, a defect prevented a permit's fee waiver cycle from being reset at the end of the cycle year. [8785 {B}](#)

#### 4.9 Mailer View Functionality

The Fee Renewal page will be updated to properly display international permit addresses. Prior to this release, permits with international addresses were incorrectly missing the country/state/province and postal code when displayed on the Fee Renewal page. The issue did not affect Fee Renewal email messages. [5762 {B}](#)

#### 4.10 International Postage Statements

International postage statements can now be successfully linked to meet minimum piece and volume requirements. Previously, international statements utilizing sections B, E, G, or H that did not meet the minimum piece and volume requirements could not be finalized. A defect prevented the postage statement review page from providing options for the user to specify a reason for the statement not meeting the minimums (such as the statement being part of a group of statements that will meet the minimums in total).<sup>8</sup> As a result, the statement could not be finalized since an exception reason is required. [8948 {B}](#)

#### 4.11 Postage Statement Wizard

- The *PostalOne!* System Postage Statement Wizard will receive a performance upgrade with this release. Postage Statement Wizard user interface had processes that were running un-bounded SQL queries causing downgrade in system performance. User interface code is being updated to convert these unbounded SQL queries to be with bounds (with where clause). [1561 {B}](#)
- An issue will be resolved that resulted in the Postage Statement Wizard incorrectly displaying postage as double what it should have been for Standard Mail Section F (Carrier Route Flats and Every Door Direct Mail (EDDM)). This was a display issue only and postage was charged correctly. [8332 {B}](#)

#### 4.12 Reports

- The Postage Statement Register will be updated to reflect accurate counts for the number of pieces and copies for Periodicals (PE) postage statements. Prior to this release, a defect in calculations caused the Postage Statement Register to display incorrect totals for the number of pieces and number of copies for PE postage statements. [2836 {B}](#)
- The *PostalOne!* System will be updated to properly handle consistent display of the Publication Name for Periodicals (PE) on *PostalOne!* System pages, forms, and reports. Previously, the PE Publication Name was incorrectly displayed on the Transaction Summary Report for Periodicals and the Advertising Percentage and Frequency Report. [8056 {B}](#)
- The Advertising Percentage and Frequency Report will be updated to properly handle data retrieval when the Post Office of Mailing is different from the Post Office of Permit. Previously, a logic defect resulted in no data being found for Periodicals transactions where the transaction showed a different cost center than the one that the Periodicals publication was associated with. [8422 {B}](#)
- The Mail Entry Additional Postage Assessment Report will be updated to include Nesting/Sortation metrics from Census errors. [8730 {B}](#)
- The Shipping Summary Report will be updated to consistently display the mail preparer associated with the permit and finance number of postage statements reflected in the report. Prior to this release, a logic defect caused incorrect mail preparer information to be displayed on the Shipping Summary Report for some jobs submitted by Mail.dat. [6964 {B}](#)

## 5. 43.0.0.0 Error Code Additions

This section lists the validations that will be added as part of this release.

### 5.1 Mail.dat

Validation Code	Severity	Validation Description	Validation Action	Source - Comments
1170	ERROR	A tray based copal consolidator cannot be deleted.	Do not attempt to delete a tray based copal consolidator.	ETR 8722 – No description/action change, updated conditions to throw in delete job doesn't include OCI file
3635	OFF	Referential Integrity Error: A physical container cannot be referenced as a sibling by another container. The value provided was {1}.	Do not reference a physical container as a sibling container.	ETR 7816 – Turned error code off so MLOCR scenarios having physical siblings copal trays linked to overflow siblings pass
4564	INFO	The .par file submitted with Adjustment Type = 3 (Spoilage) or 4 (Shortage) has adjusted a postage statement with an incentive; the incentive amount on spoiled pieces should be deducted from the .par Adjustment Amount.	Deduct the incentive amount from the .par Adjustment Amount if the Adjustment Type = 3 (Spoilage) or 4 (Shortage) and the piece received an incentive.	ETR 8296 – No description/action change, updated conditions to throw only when incentive is included in job
4689	ERROR	Linked Container ID {}, present in the .csm file, does not have a corresponding .oci record.	Ensure all linked containers in the copal job have associated records in the .oci file.	ETR 9038 - Mail.dat eInduction Co-pal - Validation needed to prevent users from submitting co-pal jobs without linked containers having associated .OCI file records

### 5.2 Mail.XML

No changes

## 6. Change History

Date	Section	Title	Description
