

# User Group 1 “PostalOne! / SASP / Intelligent Mail”

## Minutes

### Thursday, January 27, 2011

---

#### Agenda Items

- ✚ Review minutes – January 13 and 20, 2011
- ✚ Mailer Concerns on Postage Statement Changes for April 17, 2011
- ✚ PostalOne! Release 26.0.0 Notes
- ✚ Group Input

#### Review minutes – January 20, 2011 (*Kathryn Mackey*)

- ✚ No corrections
- ✚ Flats Sequencing Strategy Bundle Issue
  - TPR 70383
  - Mailers would like to know the expected time of resolution.

#### Mailer Concerns on Postage Statement Changes for April 17, 2011 (*Becky Dobbins*)

- ✚ Deferred to a future meeting.

#### PostalOne! Release 26.0.0 Notes (*Valerie Yates*)

- ✚ Release Notes, *Version 5 January 18, 2011* (available on RIBBS) were reviewed.
- ✚ We are currently developing preliminary release notes for Release 26.1.0 and 27.0.0, which should be available by early February.
- ✚ There will be an update to the MDR Client with the January 30, 2011 patch release; however a download is not required for 2 weeks following the release. There will be a DMM Advisory issued.

#### Other

- ✚ Flats Sequencing Strategy (FSS) Implementation Work Group

If anyone is interested in joining the group and/or sending specific cases for testing, please forward your request to [PO\\_CAT.usps.gov](mailto:PO_CAT.usps.gov). Please include “Release 27 CAT” in the subject line.
- ✚ Delivery Point Validation (DPV) Issue Update

A preliminary meeting was held which resulted with a short term solution to convert the error to a warning. A warning will not trigger an email, but will appear on the Data Quality reports. A second meeting will be held next week to determine a long term solution. We will message the results to User Group 1. Please continue to forward your concerns to Valerie Yates at [Valerie.d.yates@usps.gov](mailto:Valerie.d.yates@usps.gov).
- ✚ Host Statement Component ID Validation Concern

Listed below is the section from the Release 26.0 notes regarding the Host Statement Component ID validation. This validation was temporarily removed in Patch Release 26.0.0.4 because the Pitney Bowes Group 1 presort software could not populate this field and the software is commonly used throughout the industry. Group 1 reported their problem fixed on 3/12/2011 and it was reported that *PostalOne!* plans to re-implement the validation on 3/27/2011. This is of great concern since the industry will still have hundreds of Group 1 files in the pipeline that were generated before they made their fix. There is a proposal that this validation be re-implemented along with Release 27.0 scheduled June 5, 2011.

#### MCR Validation

*“The PostalOne! system will validate that the Host Statement Component ID field in the .mcr*

file is

populated when the Full-Service Participation Indicator field in the .seg file is populated with 'F' for Full Service or 'M' for Mixed Service and when a Mail Piece Unit ID is associated to multiple Component IDs within the .mcr file. The SASP system will be sent the .mcr Component ID or .mcr Host Component ID in order to assign the .cpt Mailer ID of Mail Owner and .cpt CRID of Mail Owner to the MPU based on the following:

- o If the .mcr file shows a one to one relationship between the Mail Piece Unit ID and the Component ID, SASP will be sent the .mcr Component ID.
- o If the .mcr file shows a one to many relationship between the Mail Piece Unit ID and the Component ID, SASP will be sent the .mcr Host Statement Component ID.

**Known Issue:** The MCR validation for Host Statement Component ID that was deployed on January 2, 2011 will be removed in patch Release 26.0.0.4 on January 16, 2011."
