

SRS 576 – MicroStrategy Reporting

Existing Report Enhancements

Mail Data Quality Reporting

The following reports will be updated with enhancements:

- Mailing Daily Quality Summary Report
- Mailing Data Quality Error Type Report
- Error Verification Report
- Detailed Error Verification Report
- Full Service eDoc Verification Invoice Report
- Full Service eDoc Verification Invoice Detailed Report
- Mail Preparation and Data Quality Dashboard

The *PostalOne!* system will provide the ability to display the breakdown between Errors and Warnings on Mail Data Quality Reports.

The *PostalOne!* system will not display mail owner for container and handling unit errors/warnings for MLOCR jobs.

The *PostalOne!* system will provide the ability to display both Error Description and Error Code on the Mail Data Quality and Invoice Reports.

The *PostalOne!* system will provide the ability to display Job ID, User License Code, Mailing Group ID, and Customer Group ID on Mail Data Quality Reports.

The Invoice Report will display threshold percentage used to identify jobs with additional postage, an indicator for submission to *PostalOne!* and the percentage of pieces affected by errors.

The *PostalOne!* system will provide the ability to display Error Type columns at the top level of the MicroStrategy Invoice Report.

The *PostalOne!* system will provide a new Full Service eDoc Verification Job List Report to display Job Information.

The *PostalOne!* system will provide the ability to display a CRID prompt on the Mail Preparation and Data Quality Dashboard.
