Review minutes

- ✚ The minutes were reviewed.
- ✚ Correction
 - **IMb Duplicate Barcode Threshold**
 - IMR – there is a problem when mixing full service with non-full service mail. The threshold has been **removed** all together as a short term measure until a fix is provided. (The word “removed” was omitted from minutes erroneously)

Mail.dat Changes – January, 2012

- ✚ The presentation was reviewed.
 - Mailers expressed concern that Mail.dat 11-1 will no longer be supported on or after January 22, 2012. A recommendation will be put forth to continue supporting Mail.dat 11-1 after January 22, 2012.
 - Questions / Answers
 - If Service Type IDs for IMBs are changing, will this affect the validation of IMB in *PostalOne!*. We follow-up with the availability of Service Type IDs.
 - Will the “Reply Rides Free” generate an error? It will generate an error in Mail.XML, however in Mail.dat it will dagger and discontinue in the next version. It was recommended the system not generate an error, but just ignore.
 - What is the definition of “High Density Lite?” The definition will be shared when it becomes available.
