MTAC-UG1 Issues

Id	CR	Priority	Title	Functional	Production	Status	Business Description (Mktg)	Business Workaround	Submit
79993	CR	Critical	CR79993_Make Mail.dat Origin Office Periodicals error message a warning message	Mail.dat Validations	(None)	Requirements Review	Warning message: 7084 There are zero origin entry offices for the CPP permit. There must be one origin entry office for a mailing with a CPP permit. Finance number	Contact the acceptance office to correct the Postal Service data on the Periodicals record.	25-Jul-11
79538	ETR	Critical	Mail.xml - Failed to output Additional Postage record	Mail.xml Postage Statement Processing	27.0.3	Construction	Mail.XML Additional Postage Record not generated	If all individual statements within the combined statement include postage affixed, then the Additional Postage (AP) records are generated correctly and this issue is not encountered	24-Jun-11
78844	ETR	Critical	Mail.dat: Repositionable notes, Section F, missing from 3600 postage statement	Mail.dat Postage Statement Processing	27.0.3	Manager Review	Mail.dat misses Part F Repositionable Notes on the PS Form 3600 for First-Class Mail.	None. Pay for repositionable notes on an adjustment transaction or enter postage by other means.	10-Jun-11
77339	ETR	Critical	Mail.dat - Billable Receipts Filter Ignoring Some Billable Events	Mail.dat Postage Statement Processing	(None)	Requirements Review	If billable filter enabled Receipts receipts are downloaded, but not recorded in the receipts file because "Postage Statement Status" event type is populated with "N/A" instead of the status code "CAN", "FIN", "REV", or "UPD".	Disable the 'billable' filter, as this will not filter out these receipts.	10-May-11
74993	COM	Critical	Mail.dat: Correct spoilage calculation of postage refund for affixed postage	Mail.dat Postage Statement Processing	28.0.0	Requirements Review	The postage affixed is refunded (and should not be) for Mail.dat pieces with spoilage indicator W or S.	Use another method to claim spoiled pieces with postage affixed.	21-Mar-11

Id	CR	Priority	Title	Functional	Production	Status	Business Description (Mktg)	Business Workaround	Submit
76845	ETR	High	Mail.dat: Bundle-based Copal - Virtual Sacks	Mail.dat Co-palletization	28.0.0	Construction	Mail.dat submission of virtual sacks in Periodicals mail uses the container level of the virtual sack and should use the pallet.	Set the container level of the virtual sack to be the same as the pallet. This still results in sack/tray lines instead of pallet lines. Call the help desk for data repair.	29-Apr-11
75524	ETR	High	Mail.dat - Connectivity loss during client side validation causes job to remain in pending status	Mail.dat Validations	(None)	Requirements Review	A loss of internet connection while PostalOne! is trying to log client side validation messages to the database causes the job to remain in 'pending' status and the job will not finishing processing.	Rare occurrence. Resubmit the job.	8-Apr-11
75261	COM	High	Must set CSM USPS Pick Up to No even when Yes for non CSA	Mail.dat Validations	28.0.0	Requirements Review	Now that the CSA is required only for First-Class Mail there is validation for CSA when it is not applicable.	To avoid this validation, user must set USPS Pick Up to No even when Yes.	1-Apr-11
74945	ETR	High	Mail.dat - Incorrect error handling when the .oci file includes a container not in the .csm file	Mail.dat Validations	28.0.0	Deployed to SIT	Container in the .oci file but not in the .csm file generates error: SEV7: System Error while connecting to a web service from MdrValidationWSWrapper.	None. Call the help desk to interpret the nonspecific error.	17-Mar-11
74941	ETR	High	Mail.dat - Sacks are being prevented from being passed through in a view in Bundle based Co-Pal jobs	Mail.dat-SASP Interface	28.0.0	Deployed to SIT	Sacks are not passing through the SASP interface for Bundle Based copal jobs.	The impact for this issue is mailers will not receive Full-Service feedback for bundle based copal jobs since the mailings are not imported into SASP.	16-Mar-11
