

Release 27.0.3 Content Overview

Id	Functional Subsystem	Title	Description
78844	Mail.dat Postage Statement Processing	Mail.dat: Repositionable notes, Section F, missing from 3600 postage statement	When a Mail.dat job is submitted with repositionable notes for First-Class Mail, the system shall generate the Part F accounting for repositionable notes for the PS Form 3600 First-Class Mail Postage Statement. Previously the system was failing to generate Part F and charging insufficient postage.
79538	Mail.xml Postage Statement Processing	Mail.xml - Failed to output Additional Postage record	For a Mail.xml message submission, when there is a combined mailing with some postage affixed pieces and some non postage-affixed pieces, the correct payer of additional postage shall be identified on the postage affixed postage statements. Currently, additional postage is charged to the incorrect payer. The total additional postage for the combined mailing is correct but attributed to the incorrect payer.
79947	Mail.dat Postage Statement Processing	Mail.dat - Spoiled pieces not calculated correctly when more than one PAR line	The PostalOne! system shall accurately state the total number of spoiled pieces on the postage statement when there are multiple PAR records. Currently, the system uses the number of spoiled pieces on the last record for the total. This impacts the total number of spoiled pieces but not the spoiled postage or the total postage.
80217	Mail.dat Postage Statement Processing	Mail.dat - Not populating Nonmachinable Surcharge lines for First-Class Mail	For a Mail.dat job submission, the system shall apply line B9, B10 (Nonmachinable Surcharge) to a First-Class Mailing with Non-Machinable Letters. Currently the lines B9 and B10 fail to generate and there is insufficient postage with no workaround for the user. A postage adjustment transaction must be applied to collect the postage.
81830	Mail.dat Postage Statement Processing	Add Entry Point for Entry Discount - Facility Type C = OSCF as an allowable value for Bound Printed Matter	For Bound Printed Matter, the PostalOne! system shall allow CSM Entry Point for Entry Discount - Facility Type C = Origin SCF to map same as X = SCF for the container levels F = FSS Facility and E = FSS Sort Plan.
81831	Mail.dat Postage Statement Processing	Add Entry Point for Entry Discount - Facility Type C = OSCF as an allowable value for Standard Mail	For Standard Mail, the PostalOne! system shall allow CSM Entry Point for Entry Discount - Facility Type C = Origin SCF to map same as X = SCF for the container levels F = FSS Facility and E = FSS Sort Plan.
81832	Mail.dat Postage Statement Processing	Correct bundle pricing and postage amount for FSS Periodicals	<p><i>PostalOne!</i> shall use the following pricing and postage amount for FSS Periodicals:</p> <p>Row 1: Line D12 maps from Package Level = X AND Container Level = (E, F)</p> <p>Row 3: Line D4, D8, D12 maps from Package Level = X AND Container Level = Anything but E, F --Change maps all that was D15 to D12</p> <p>Note Row 2 is current pricing logic and is correct.</p> <p>Row 2: Line D12, D13, D14 maps from Package Level = Anything but X AND Container Level = (E, F)</p>
81838	Mail Quality Reports	Microstrategy Report Performance Improvement	The performance of the MicroStrategy Error Type and Error Verification reports shall be improved. The reports are expected to return results in 30 seconds to a couple minutes (depending on the date range), which is better than the current performance, of 5-10 minutes.
82603	Financial Activity Management	CR 82530 - Add a new reason for Adjustment for First-Class Packages Retail when FC doesn't meet Content Requirement	Until Jan 22, additional postage amount required for First-Class Commercial Base packages not meeting content standards will be charged by a separate adjustment transaction. For all entry methods, the PostalOne! System will provide an adjustment reason for First-Class Commercial Base packages not meeting content standards.
82775	Mail.dat Postage Statement Processing	Remove requirements implemented by CR 75236	The validation should be updated to disallow the MPU weight of 0.2188lbs (over 0.21875 lb = 3.5 oz) for automation letters. The PostalOne! System will remove the requirement included in CR75236 to allow First Class Automation Letters up to a weight of 0.2188lbs.
