

UG1 12/15/2011**Mail.dat - Mail.xml - New Issues 12132011**

The following issues were reviewed UG1 12/15/2011 and are not on the current MTAC-UG1 Issues List.

TTrack#	Priority	Production	Business Description	Workaround
89321 Mail.dat	Critical	Next Possible Patch	<p>Error Code 7033 is thrown when a mailer uses a Permit Imprint with additional postage to charge via the MPA/MCR relationship in the job.</p> <p>Error Code 7033: The preparer permit is not properly linked to the user. No valid preparer permit found.</p> <p>This does not impact postage calculation.</p>	There is no work around.
89423 Mail.dat	High	Proposed Jan 2012	<p>When the ad percentage is below 10% for non-profit mailings, the total cost is not being populated for Lines B12-14.</p> <p>The ad pounds are calculated correctly, but the total cost is not. This affects postage.</p>	BMEU needs to make manual adjustment.
89419 Mail.dat	Critical	Next Possible Patch Post January	<p>eInduction Error Code 7082 thrown when T update is sent after statement finalization.</p> <p>7082: For eInduction processing, the .csm Label: IM/TM/ Container Or IM/TM/ Tray Barcode field for IMcb(s)/pallets must be unique amongst all containers associated to the .seg eDoc Sender CRID value that were finalized within the last 45 days.</p> <p>Occurs only after stmt finalization.</p>	The mailer will have to submit T updates prior to finalization.

88635 Mail.dat	Medium	Proposed April 2012	<p>The Error Code #3516 is proposed to be removed.</p> <p>Error Code #3516: Alphanumeric Data Type Error: Entry Point - Actual/Delivery Locale Key must be an alphanumeric value and must contain "ORIGIN" when the Entry Point for Entry Discount Facility is set to O, H.</p> <p>For Entry Discount Facility, Error Code 3516 forces mailers to enter "ORIGIN" when "O" and "H".</p> <p>The mailer must enter ORIGIN for Facility Type O or H to get through the error.</p>	The warning is an additional error which requires LOCXXXXXX for O
88610 Mail.dat	High	Proposed April 2012	<p>Even though only one Ride-Along is permitted in a mailing, the Ride-Along weight is populated with NULL for Combined 3541 or 3600 postage statements.</p> <p>This value should be populated in order to see Mailing Information section of the statement instead of N/A.</p> <p>This does not affect postage.</p>	BMEU to accept N/A in Mailing Information section.
87482 Mail.dat	High	Proposed April	<p>Validation errors 3630/3631 is thrown when PQT header file status is N.</p> <p>The validation should be updated to reflect record counts to be same for .hdr Segment record and the record count of the Segment Record.</p>	If header status is N, customer should not send .cqt file (N = not included).
89504 Mail.dat	High	Currently in CAT Testing for fix before Release to PROD	<p>A server validation error is thrown incorrectly when the Rate Category FB is used on a standard mail enclosure: "A Standard Mail Enclosure statement failed to account for all copies."</p> <p>The cause occurs during the mapping for FB rate category for enclosures for 11-2 files in TEM and PROD.</p>	The mailer can submit using 11-1.

TTrack#	Priority	Production	Business Description	Workaround
89669 Mail.XML	Medium	None	<p>Currently, when submitting a BundleDetailCreateRequest, the job fails with Error Code 8551 when Zone 'ICD' is provided. Error Code 8551: Zone must be populated with N, 1, 3, 4, 5, 6, 7, 8, ICD, ADC, DDU, or SCF when FormType is PE and Zone is provided.</p> <p>Workaround: Do not populate Zone or populate with another acceptable value.</p>	<p>According to the base schema ICD is used for "In County DDU" zone. USPS is testing to ensure DDU can be entered rather than ICD and output the correct Postage Statement and Qual Report.</p>
