## **August 2014 Release 38.0.0: New functionality for this release will be available the day of the software release, August 24, 2014.**

- ❑ Every Door Direct Mail (EDDM) Promotional Coupon: New incentive geared for small; mail owners will be identified by the CRID, and subsequently in the eDoc.
- ❑ Periodicals Statement of Ownership: The *Requester Publications Only* (PS Form 3526) and *Requester and General Category Periodicals Publications Only*(PS Form 3526-X) will be combined into a single automated online form.
- ❑ Manifested Parcels for Domestic & International Mailings: volume minimums of 50 pieces or 50 pounds by combining parcels volumes of various classes of mail.
- ❑ Traditional Address Correction Service (ACS) with Shipper Paid Services: New service allows parcel mailers using Traditional ACS with an ancillary service endorsement to enable electronic payment for parcel forwarding or return.
- ❑ Shipping Services File conversion: Additional classes of mail will be converted from Mail.dat to the SSF format for Standard Mail, Parcel Select Light Weight, and the remaining portions of Priority Mail.
- ❑ eVS Customer Onboarding: The Online Enrollment service, accessed through the BCG, will be enhanced to improve online enrollment processes for new eVS customers.
- ❑ Seamless Acceptance will add reports and enhancements to assess Seamless errors. eInduction will enhance numerous electronic processes to increase visibility.

**The following items will not be available until September 7, 2014:**

- ❑ Call Return Tag: =New service allows Merchandise Returns Labels to be generated and delivered by the Postal Service to a customer on behalf of a Merchant.
- ❑ Day Old Poultry Transportation fee (Live Animal Transportation): Priority Mail and Priority Mail Express will be assessed for transporting day old poultry. The Extra Service Line S-25 will be activated.
- ❑ Premium Forwarding Services Commercial: New service will allow commercial mailers to consolidate mail received from multiple Post Office boxes and, street addresses, or both into a single package for delivery to a single address. The Mailer can sign-up through the Business Customer Gateway (BCG).
- ❑ Political and Election Mail: New indicators for Mail.dat and Mail.XML to be used in the eDoc.
- ❑ Intelligent Mail for Package barcode (IMpb) Non-compliance: The Non-compliance threshold will increase slightly

UNITED STATES  
POSTAL SERVICE®

## *Mail.dat Enhancements*

- Mail.dat 13-1: Discontinuing support (cannot be submitted after Price Change date)
- Mail.dat 14-1: Continuing support
- Mail.dat 14-2: New support (.csm Postage Statement Mailing Date on or after Price Change date (effective Aug 24))
- Mail.dat will support identification of Political Mail and Election Mail
  - Version 14-1 only: .ccr Characteristic VV = Political Mail and PI = Election Mail
  - Version 14-2: .ccr Characteristic PM = Political Mail and EM = Election Mail
  - When identifying mail content as Political or Election Mail, the entire postage statement must be only Political or Election Mail. They cannot be mixed.
  - BMEU clerk can modify the Political Mail/Election Mail for Mail.dat or Mail.XML submissions.

Error Code	Severity	Description
7219	Warning	In order to claim Election Mail, all pieces on a statement must claim Election Mail without claiming any Political Mail. The statement will not be identified as Election Mail.
7220	Warning	In order to claim Political Mail, all pieces on a statement must claim Political Mail without claiming any Election Mail. The statement will not be identified as Political Mail.

- Mail.dat will support the identification of Day Old Poultry for Priority Mail
  - Can only be claimed for .cqt Zones 5 through 9
  - Version 14-1 only: .sfr Service Type A = Day Old Poultry
  - Version 14-2: .sfr Service Type DP = Day Old Poultry (Live Animal)
  - Generates Part S, Extra Services line S25 on 3600PM Fee (Per Pound X \$0.20 for Zone 5 -9 Only)
  - Effective September 7, 2014
- Mail.dat will support the implementation of the new EDDM Coupon by accepting the following .ccr Characteristics to claim the coupon:
  - Version 14-1 only: .ccr Characteristic VP = Coupon Promotion
  - Version 14-2: .ccr Characteristic CO = Coupon Promotion
  - Enumerations effective August 24, 2014

*Three possible Warnings: (7223) when Coupon is already used, (7224) when piece threshold is not met, and (7225) when postage threshold is not met*
- Mail.dat will support the Hazardous Material mailpiece by accepting the following .ccr Characteristics:
  - Version 14-1 only: .ccr Characteristic RE = Hazardous Material
  - Version 14-2: .ccr Characteristic HM = Hazardous Material
  - Effective September 7, 2014

- Mail.dat will generate a Shipping Services File to PTR for remainder of add'l mail classes:
  - Standard Mail Parcels
  - First Class Parcels
  - Priority Mail (remaining Part A and now Parts B, C and D)
  - All Package Services Parcels including: BPM, Library Mail, Media Mail, Parcel Select, and Parcel Post
- Mail.dat will no longer support Spoilage or Shortage for Package Services or Priority Mail
- Mail.dat will continue to support IMpb compliance. For mail classes requiring IMpb compliance, Mail.dat will validate that the .pdr Piece Barcode, .upa Address, or .sfr Service Type of NP are populated at or above the set threshold. (effective Sept 7, 2014)
  - IMpb compliance will have 99% for July
  - Delivery Point Verification will have 95% threshold
  - Shipping Services File 1.6 or higher will have 95% threshold *(This will not apply for Mail.DAT jobs, only apply for eVS, Hardcopy, Postal Wizard and Mail.XML)*

*Error 4632 is thrown (Client) when the IMpb is not submitted via the .pdr file using the .pdr IM Barcode field*

- Mail.dat will generate a SSF if the .mpa Mail ID of Mail Owner field is not populated
- Mail.dat will now support the .csm Entry Point for Entry Discount – Facility Type of H = Trans Hub.

*Error Code 4615: thrown when the .csm Entry Point for Entry Discount – Facility Type is H = Tran Hub, the .cqt Destination Entry is not set to S = DSCF for the corresponding Container ID.*

- Mail.dat version 14-2 clean-up: unused fields and values from previous versions. Refer also to the IDEAlliance Mail.dat 14-2 specification, Postal Mail.dat Technical Specification, and *PostalOne!* Release 38 Notes which are posted to RIBBS for details.
  - Segment Record, Mailer Postage Account Record, Component Record, Un-coded Parcel Address Record, Container Summary Record, Container Quantity Record, Package Quantity Record, Seed Name Record, Piece Detail Record, Special Fee Record, Postage Adjustment Record, Header Record
  - Postage Statement Record (PSR) and Package Label Record (PLR) will be deleted
  - .cqt Rate Categories no longer supported: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, Y, TE, TK, TQ, TR, PQ, PR, PG, PK, PI, PE, P5, and, P6  
*Error Code 2209: thrown if rate category is any of the above*
  - .mpu Standard Flat Type is no longer supported in version 14-2. Instead, Catalogs are identified by a .ccr Characteristic of CT = Catalog
  - hdr: Special Fee Barcode, Record Count and Status fields Move to new record positions for

## FSS

- Mail.dat will validate that the correct data is provided when claiming DFSS pricing.
  - When a Destination Entry or Entry Point for Entry Discount – Facility Type of DFSS is claimed, a Container Level of E = FSS Sort Plan must also be claimed for those pieces.

*Warning 4631 (to qualify for DFSS pricing): .pqt Package Level of X = FSS Sort Plan must be used when pallets are claiming a .csm Container Level of E = FSS Sort Plan.*

- Mail.dat will support FSS pricing within Mixed Class mailings
  - Standard Mail and Periodical flats FSS lines within Mixed Class co mail mailings
- Mail.dat will support FSS pricing within Standard Mail and Periodical CoPals
- Mail.dat will support the .csm and .cqt
  - Error Code 4620 : thrown if the .csm Container Level is not populated with E = FSS Sort Plan when the .csm Entry Point for Entry Discount – Facility Type is populated with W = DFSS or the .cqt Destination Entry is populated with P = DFSS.
    - 3602 N/R – Standard Mail
      - .cqt Destination Entry of P = DFSS requires .csm Container Level of E = FSS Sort Plan
      - Impacts lines: D12, D27, E12, E27, F13, F15, F17, F53, F55, F57
    - 3605 – Package Services Part A, Line A36
      - FSS Carrier Route – Flats use the .cqt Rate Category of FC = BPM FSS Carrier Route
      - FSS Presorted – Flats use the .cqt Rate Category of FS = BPM FSS Scheme

- ❑ Updated eDoc Mapping is available > R 38.0 **Postal Service Mail.dat Technical Specifications**  
[https://ribbs.usps.gov/intelligentmail\\_schedule2014/releases/aug\\_sept2014/techspecs.cfm](https://ribbs.usps.gov/intelligentmail_schedule2014/releases/aug_sept2014/techspecs.cfm)
- ❑ 3605 Package Services
  - Part A - Nonpresorted Flats, .cqt Barcode Discount or Surcharge Indicator is no longer required
  - Part C – Parcel Select – Destination Entry
  - Part D – Parcel Select – Nonpresort
  - Part E – Parcel Select – NDC Presort
  - Part F – Parcel Select – ONDC Presort
  - Part G – Parcel Select Lightweight Parcels
  - Part H – Parcel Select – Sample Showcase
  - Part S – Extra Services and Fees
- 3600 Priority Mail
  - Part A – Lines 20-29 (Lines A1-A19 are supported as of the recent April release)
  - Part B – Priority Mail – Permit Imprint – Commercial Base/Plus – Regional Rate Box
  - Part C – Priority Mail – Permit Imprint – Commercial Plus – Cubic
  - Part D – Priority Mail – Permit Imprint – Negotiated Service Agreement
  - Part S – Extra Services and Fees: Lines 1-10, 13, 15-19, 23

POSTAL SERVICE®

# *Mail.XML Enhancements*

- Discontinuing support of 13.0A/B (cannot be submitted after Price Change Date of September 7, 2014)
- Continuing support of 15.0A
- New support of 16.0 (with PostageStatementMailingDate on or after Price Change Date)
- Mail.XML will support identification of Political Mail and Election Mail
  - Version 15.0A: Content of VV = Political Campaign Mail and PI = Election Mail (**PostalOne! Mail.XML Tech Spec Version 3, June 6, 2014**)
  - Version 16.0A: Content of PM = Political Mailing and EM = Election Mail
  - When identifying mail content as Political Mailing or Election Mail, the entire postage statement must be only Political or Election Mail. They cannot be mixed.
    - Warning Code 9669 - (Only in 16.0A) (A Postage Statement cannot be identified as having both Election Mail and Political Mail. The postage statement will not be identified as either.)
    - Error Code 9670 - (When the Content field is populated with EM or PM, the PermitType cannot be populated with OI = Official Imprint or OM = Official Imprint.)
  - Available on September 7, 2014
- Mail.XML will support the identification of Day Old Poultry for Priority Mail
  - Can only be claimed for Zones 5 through 9
  - Version 15.0A: ServiceCode A = Day Old Poultry
  - Version 16.0: ServiceCode DP = Day Old Poultry
  - Generates line S25 on 3600PM
  - Available on September 7, 2014
    - Warning Code 9679 - (The ServiceCode of DP = Day Old Poultry can only be used when the Zone is populated with 5 = Zone 5, 6 = Zone 6, 7 = Zone 7, 8 = Zone 8, or 9 = Zone 9)

- Mail.XML will support the implementation of the new EDDM Coupon by accepting the following Incentive values in the PostageStatementCreateRequest to claim the coupon:
  - Version 15.0A: Incentive of VP = Coupon Promotion
  - Version 16.0: Incentive of CO = Coupon Promotion
  - Available on August 24, 2014
    - Warning Codes 9683 (Coupon already used), Warning 9684 (Piece Threshold not met), and Warning 9685 (Postage Threshold not met)
- Mail.XML will continue to support IMpb compliance. For mail classes requiring IMpb compliance, Mail.XML will validate that the IMPackageBarcode, 9-digit DestinationZipCode, and ServiceCode of NP are populated at or above the set threshold.
  - IMPB compliance will have 99% for July
  - Delivery Point Verification will have 95% threshold
  - Available on September 7, 2014
- Mail.XML will support the EntryFacilityType of H = Tran Hub
  - Available on August 24, 2014
  - Error Code 9671 (When the PostageStatementCreateRequest > CreatePostageStatement > PostageStatementLineItemDate > EntryFacilityType is populated with H = Tran Hub, the EntryDiscount must be populated with S = DSCF.)

- Mail.XML will validate that the correct data is provided when claiming DFSS pricing.
  - Error Code 9672 (When an EntryDiscount, ChargeableEntryLevel, or EntryFacilityType claims DFSS pricing, a ChargeableContainerLevel of E = FSS Sort Plan must also be claimed for those pieces.)
  - Warning Code 9676 (When claiming a ChargeableEntryLevel of P = DFSS on an FSS Sort Plan pallet, the ChargeableBundleLevel must be populated with FS = FSS Sort Plan.)
- The StandardFlatType is no longer supported in version 16.0. Instead, Catalogs are identified by indicating a Content of CT = Catalog in the PostageStatementCreateRequest.
- For Periodical submission to Mail.XML, the EntryLocaleKey within the QualificationReportDetailCreateRequest will be used as a Postage Statement Generation Variable.
  - Error 9680: The QualificationReportDetailCreateRequest > QualificationReport > ContainerInfoData > EntryLocaleKeys must be the same for all ContainerIDs referenced within a single PeriodicalStatementCreateRequest.
- The DeliveryPointZip field within a MailPieceCreateRequest will now only be required when the ServiceLevelIndicator is set to F = Full Service.
  - Error Code 8412 (Error when DeliverPointZIP in IMB is not provided and ServiceLevelCode is F)

# Mail.XML Summary of Postage Statement Changes

- 3602 N/R – Standard Mail
  - EntryDiscount of P = DFSS requires ChargeableContainerLevel of E = FSS Sort Plan
    - D12, D27, E12, E27, F13, F15, F17, F53, F55, F57
- 3605 – Package Services
  - FSS Carrier Route – Flats use the RateCategory of FC = BPM FSS Carrier Route
  - FSS Presorted – Flats use the RateCategory of FS = BPM FSS Scheme

# Mail.XML Container ID and Container Detail ID

The enhancement was introduced with Release 37 in January 2014 for Mail.XML 15.0 Errata A. The enhancement requires for all Full-Service and/or eInduction mailings submitted via Mail.XML to have the Container IDs and Container Detail IDs identified in the three messages:

- Qualification Report messages
- Mail Piece messages
- Postage Statement messages.

This allows for the Full-Service and eInduction system to correctly identify the mail owners for mailpieces submitted on a line of postage statement. The enhancement is carried over into the August 2014 Release and with this release Mail.XML 15.0 Errata A, Mail.XML 16.0, all future Mail.XML versions will support this requirement.

# Mail.XML Container ID and Container Detail ID

## **Mail.XML 13.0B submission:**

In the scenario below the only information available to the *PostalOne!* system is that 3 mail pieces have been identified on Container 1, and that those 3 pieces generated lines A1 and A2. *PostalOne!* cannot know *which* of the 3 pieces generated line A1 or A2.

## **Mail.XML 15.0A submission:**

PostalOne! will be able to identify which mail piece generates which line using the ContainerDetailID. In the scenario below, the ContainerDetailID provides the linkage to between a specific mail piece and a given postage statement line that was generated as a result. A single ContainerID may have multiple ContainerDetailIDs.

The ContainerDetailID will be required for any eInduction, Full-Service, or Seamless mailings and will need to be populated in the following locations to provide the desired linkage:

1. The ContainerDetailData block of the QualificationReportDetailCreateRequest
2. The MailPieceBlockGroup block of the MailPieceCreateRequest
- 3a. The PostageStatementLineItemData block of the PostageStatementCreateRequest
- 3b. The PeriodicalLineItemData block of the PeriodicalStatementCreateRequest
- 3c. The PeriodicalLineItemData block of the ConsolidatedPeriodicalStatementCreateRequest

# *Periodicals Airbox Enhancements*

## Periodicals Airbox Maximum Weight Change:

- The USPS proposes to have Periodicals container charges processed without checks for upper bound maximum weight for Air Box postage. The maximum weight limit was formerly 200 lbs.
  - **Removed Error Code #: 4598**
- The *PostalOne!* system will accept and process Air Boxes as sacks or pallets for postage processing depending on weight restrictions.
  - Air Box less than or equal to 70 lbs will be processed and charged as sacks
  - Air Box over 70 lbs will be processed and charged as pallets.

# *eInduction Enhancements*

- Shipping Summary Report Updates
  - The Shipping Summary Reports Search page will be updated to allow search by:
    - Appointment ID
    - Job ID
    - Mailing Group ID
    - Container Manifest ID
  - Container Barcode will no longer be supported as search criteria

## Shipping Summary Reports Search

Search By\*: 
ID Number\*:

Postage Statement Mailing Date Range: \*

Search With\*:

Display per Page:

Please limit the Date Range to one mon  
Each search will return maximum 1,000 records.

Please click on a job ID to view the shipping summary details for that job.

Job ID ^	Job Name	Postage Statement Mailing Date/Time
EINscn4b	06-23-547530	03/19/2014 12:00:00 AM

- The Shipping Summary Job Summary Report will continue to support the existing fields in the header:
  - Job ID
  - Job Name
  - Mail Preparer
  - Mailing Group ID
  - Process Category
  - Postage Statement Mailing Date
  - USPS Transported Containers
  - Class
  - Total Container Count
  - eInduction Containers
- The Shipping Summary Job Summary Report will no longer support the following fields in the header:
  - Total Pieces
  - Total Weight

- The Shipping Summary Job Summary Report, Job Summary Information header will decode the numerical Class to display descriptive text
  - 1 = First Class
  - 2 = Periodicals
  - 3 = Standard Mail
  - 4 = Package Services

# *Seamless Acceptance Changes*

## Undocumented

- Undocumented intelligence will be created to:
  - Categorize undocumented pieces based on the surrounding piece scans (bookends)
  - Display bookended pieces on Undocumented Reports
  - Identify and reassign undocumented pieces using the undocumented categorization
  - Automatically enroll MIDs for undocumented processing
  - Mail piece scans following a PARS operation will be excluded from the undocumented process
- Undocumented pieces due to eDoc import failure when:
  - Mixed eDoc method (M.dat origin + M.XML consolidated) Tray-based co-palletized mailings have missing fields from the SASP views (PO! 2290).
  - Mail.dat error 4562 should throw when a mailer submits a Mixed or Full service file with a Presentation category of P and a logical container (container status R) that has no physical sibling (PO! 1613).
  - Copal Mail.dat with multiple origin segments and handling units with multiple postage statement mailing dates nested in the same container (SASP 149).
- Manual samplings scans pieces that do not associate because of the barcode uniqueness error are being displayed as undocumented in the reports (PO! 3004).

## **Auto-Finalization**

- Confirmation page will be added for auto-finalized mailings entered at a BMEU.

## **Other Verifications**

- Measure Move/Update compliance for all Service Type IDs and across the calendar month.
- Exclude pieces in a tray from receiving eDoc Nesting/Sortation rate category verification errors when the rate category code of the pieces nested inside are at a finer sortation level (requalification).
- eDoc Nesting/Sortation will be performed for FSS preparation rules, FSS containers, Mail.XML mailings, and co-palletized mails.
- Fix invalid DPV errors logged against non-automation pieces and when there is a lower level match.
- Nesting/Sortation (Sampling) errors will not be logged for a sample when the mail pieces associate with electronic documentation that did not provide container/handling unit information (less than 10,000 pieces).

## Reporting

- Deactivation of Seamless Mail Owner reports.
- The '# Seamless Jobs Not Auto-Finalized' metric on the Mailer Scorecard is being corrected to not include non-Seamless jobs that were not auto-finalized.
- Piece counts on reports being corrected for physical handling units nested to logical containers.
- Change of Address error totals are being corrected (currently lower than the true totals) on the Mailer Scorecard (SASP 228).
- When a Seamless or Seamless Parallel mailer runs the Mailer Scorecard and no data is available for the selected month (such as during the first 1-2 days of the month), the CRID Seamless Status displays as 'None' instead of 'Seamless' or 'Parallel' (PO! 2558).

[Skip Intro, Create Permit](#)

- The Shipping Service program is accessible through BCG's Manage Permits service
- The initiative will improve customer experience and reduce the work hours needed to process permit paperwork

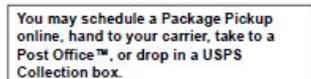

- The types of permits available for creation via the BCG are as follows:
  - Permit Imprint (PI)
  - Postage Meter (MT)
  - Precanceled Stamp (PC)
  - Business Reply Mail (BR)
  - Merchandise Return (MR)
  
- Once customers create the permit online, they must take the confirmation page to their local Post Office to make the fee payments

new service allows Merchandise Returns Labels to be generated and delivered by the Postal Service to a customer on behalf of a Merchant.

USPS Tracking #9201994884299400582704

Scan QR Code to Track  
Your Package.

- Shipping labels can be delivered to a street address, a Post Office for pickup, or an SSK for pickup (future option)
- Will be available for Parcel Return Service and USPS Returns
- Business Customer Gateway Customer Registration
- Merchants can direct returns to a central location or any retail location
- Postage is charged when label receives first physical scan event

# Premium Forwarding Services Commercials

Available on September 7, 2014

## **Premium Forwarding Services Commercial:**

- This new service will allow commercial mailers to consolidate mail received from multiple Post Office boxes and, street addresses, or both into a single package for delivery to a single address.
- The Mailer can sign-up through the Business Customer Gateway (BCG).

# *PostalOne!* Incentive Changes

## **EDDM Coupon – Postal Wizard**

- With the R38 release a new incentive (EDDM Coupon) will be available for eligible participants
- The EDDM Coupon will have a minimum volume and/or revenue requirement for the EDDM pieces that must be met before the coupon will be applied to the postage statement.
- The EDDM Coupon is available for Standard Mail (R/N) postage statements claiming EDDM Letters (Section C) or EDDM Flats (Section F).
  - Section C: 3.3 oz. or less (C13 – C24)
  - Section C: Over 3.3 oz. up to 3.5 oz. (C49 – C60)
  - Section C: Over 3.5 oz. but less than 16 oz. (C73 – C84)
  - Section F: 3.3 oz. or less (F25 – F40)
  - Section F: Over 3.3 oz. but less than 16 oz. (F65 – F80)

## EDDM Coupon – Postal Wizard

- The EDDM Coupon will be available in the existing Incentive selection box if the Mail Owner is coupon eligible.

Mailing Characteristics

Incentive/Discount Claimed:	EDDM Coupon
-----------------------------	-------------

- The EDDM Coupon is a one time use coupon per eligible Mail Owner.
- If the EDDM Coupon is applied, the coupon amount will be deducted from the Total Postage of the postage statement.

Total Postage Amount - Prepaid by CAPS account:	\$ 0.00

## **Earned Value**

- Enhanced to process both 2013 and future credits:
  - The *PostalOne!* system will process any 2013 Earned Value Credit balance first before drawing on 2014 Earned Value Credit balances.
  - Earned Value credits earned in 2013 do not have an expiration date and can still be used before 2014 Earned Value awards are applied.
  - Earned Value promotion for 2014 ran April 1 – June 30; credits earned will be released August 24, 2014 and expire on December 31, 2014 (plus 30 more days because of the delay in the release).
