Review of Bundle Visibility Feedback

A review of draft Bundle ID options was presented. A request was to present this to the IDEAlliance Group and MSDG. The IV group stated they were hopefully to have a final version of the Bundle ID option by end of week 4/27/2015. More discussion may be needed on this topic.

Mailer Scorecard SLAs

Reviewed SLA metrics as it pertains to when Scorecard data will display. A review of the processing time for data may occur on several time frames. The shorter processing time (36 hours) means data flows through one system and can display faster than 48 or 72 hours. There still remains a concern about receiving the data faster. There were new metrics added to SLAs (Mail Owner Scorecard and Mailer Scorecard). Also new metrics added were the Mailer Profile Data Availability, MicroStrategy Report Availability Window, Mailer Profile Data Availability, MOVE Update Data Availability, FS Data Availability, Seamless Data Availability, eInduction, Single Source ACS, and FS ACS Data.

The report can be located on RIBBS under Intelligent Mail - Latest News titled USPS Weekly Performance Metrics <https://ribbs.usps.gov/index.cfm?page=intellmaillatestnews>
