Full-Service Performance Metrics

USPS will release a fix on browser runtime issues on May 15th with 43.1.0.0. It will reverse the change to close browsing session when the users receive the multiple browser open error (External only).

MicroStrategy Upgrade 10.2

The upgrade was delayed as it related to poor performance for the Mail Preparer Scorecard for preparers that have 100+ Mail Owners. In testing it was found that under the new version this scorecard is not loading for these users. It has not yet determined exactly when this will be rescheduled but are actively working on it.
