

## MTAC Workgroup 129 Meeting Minutes July 8, 2009

The team completed a review of a few remaining items to clarify whether these were within the scope of the team and ranked some new items (indicated below).

Greg reviewed the survey results and they showed that the majority of the team would like a face-to-face meeting which will be scheduled for Tuesday, August 11, 2009. It was also agreed that we would decide in DC about the call scheduled August 19.

Our next call will be on Wednesday, July 22, 2009 at 10:00 AM.

The team discussed and ranked remaining items on the issues list as below:

<b>Item #</b>	<b>Comments</b>	<b>Ranking H-M-L</b>
89	Mixed class co-mail: there are a couple of vendors that handle these – has been working well. PostalOne! needs to be updated and will allow for info to be input from mail.dat files for full service IMb. Testing process however is not working well. How can this be improved?	H
90	This concept is called “householding” and can be done currently.	L
91		M

The team also began discussions regarding feasibility of the HIGH priority items. Items

Item 46 – Frank Auer will review QSG 507d to see if that satisfies this item.

Items 39, 40 and 41 were discussed and deemed as potential items to consider for implementation.
