

# WG-158 Status Report - Concluded

---

The Work Group was proposed to develop an approach to streamline and simplify the **capture, reporting and processing** of key data elements in two postage payment forms:

PS Forms 3526 (Statement of Ownership, Management and Circulation)

PS Form 3510 (Application for Reentry or Special Price) for Periodicals.

## Summary Findings

### PS 3510

During development discussions, the Work Group determined there was an existing writable pdf version for the PS 3510. This version was generally available to mailer via the Business Customer Gateway. The PCSC in New York confirmed continuing acceptance of this pdf version for PS 3510 filers. The workgroup indicated future development of the existing pdf would be more desirable than a new development.

It should be noted the availability of a pdf PS 3510 was not generally known by the industry or postal group members.

### PS 3526

There is not a commonly available pdf version of the PS 3526. The two key developments requested by WG158 are the ability to fold the 3526X into existing form format and the ability to create multiple stockholder entries (*up to 100 positions for the requirement of each 1% or greater owner*).

## General Information

The Work Group met every other week for six sessions. The group concluded with 35 attendees representing a wide section of Postal and Industry technical specialties.
