

MTAC Task Team (TT) #23

Date: February 26, 2016

Attendees: Pritha Mehra, Adam Collinson, Mark Kolb, Angela Dyer, Tarlochan Mann, Heather Dyer,

Discussion Items

- Angela updated the TT on the testing results, there were FS = 90 test, 5 failure, after investigation; it was determined to be valid, Therefore FS is tentatively declared as a pass and ready for industry. For eInduction: 49 test, 16 failure as misshipped, the misshipped was due to errors on the scanner setting, EPD, error was logged correctly and is currently being investigated. 38 postage assessments(Rolling) were performed and no issues found.
- Mark's feedback on the test scripts is that the scripts can be little challenging follow and to convert them to possible excel format for ease of use. It was suggested the mailer does not have to use our test scripts, they can use their own methods of validating scorecard data and report any issues to the help desk.
- TT reviewed the Q/A and included TT's feedback, DMM language was also reviewed.

Action Items

- Review Publication, Q/A, and DMM language - TT
- Send testing results document to TT on weekly basis – Randy/Tarlochan/Angela
- Rolling postage assessment need to be tested for accuracy – Angela
