User Group 5

Minutes

- WG 177 update
 - Will be meeting weekly to update Addressing and ACS documents, hope to close in March.

- WG 171 update (sunset)
 - Sunset was announced at the MTAC meeting in November.
 - In many cases a NIXIE became a COA, so it should have been an MLNA or BCNO. Also found that some codes captured a lot of scenarios, recommending creation of a new code of “forwarding time expired”. Carrier training and monitoring was recommended.

- Streamlined Mail Entry Publication
 - Industry encouraged to review, provide feedback by 12/24/15
 - [Click here](#)

- NCOA Licensing Announcements
 - November 27th
 - November 19th
 - November 5th
 - There’s a concern that the new PAF requirements list that all addresses on a PAF be DPV-validated. Charles explained that the DPV validation of the PAF addresses is a one-time request and not an on-going requirement.
 - Almost 20% of the addresses on PAFs were PO Boxes.
 - CASS processing for PAF addresses is not required. Licensees should try to get as good an address as they can, but in certain areas that may not be possible. The requirement is that the physical address be supplied.
 - Should PBSAs be allowed on PAF? Only one has showed up, but PBSAs should not be included on a PAF.
 - Non-DPV addresses will be researched by USPS and if a new address is found it will be sent to the licensee.
 - Could the form be updated to help get the correct data upfront? Charles will take this back.
 - Moving away from email log files, but there isn’t a deadline to submit files via EPF. This is not required in January.
 - Name presentment – for MLOCR, it’s expected that the format is first name last name. Need to explore the different scenarios to make sure the process is

nailed down. Will need to collaborate with NAPM and the PCSC to come to an agreement. It will be difficult to nail this down as the different MLOCR runs would have a mix of name formats. Charles will reach out to the MLOCR vendors to keep this discussion going.

- Colleges & Universities
 - Subgroup meeting Scheduled for Dec 7 at 1pm Central time.
